WESTPAC DELIVERS STRONG RESULTS

Highlights FY12 (Compared with FY11)¹

- Cash earnings of \$6,598 million, up 5%
- Cash earnings per share of 215.9 cents, up 3%
- Final fully franked dividend of 84 cents per share; total dividend 166 cents, up 6%
- Revenue up 6%, ahead of expense growth of 4%
- Statutory net profit of \$5,970 million, down 15%, as previous year benefited from one-off St.George tax consolidation
- Return on equity of 15.5%
- Net interest margin 5bps lower at 2.17%
- Expense to income ratio improved 70bps to 40.8%
- Improved APRA Basel III common equity ratio by 79bps to 8.2%, within our preferred range (equivalent to 10.6% on Basel III fully harmonised basis)
- Strengthened balance sheet, including customer deposit to loan ratio up 5 percentage points to 67.6% and liquid assets boosted to \$110 billion

Westpac Group today announced cash earnings of \$6,598 million for the 12 months to 30 September 2012, up 5% compared to the same period last year.

Statutory net profit was lower over the year principally as a result of a large one-off tax benefit from St.George tax consolidation that was reported in the 2011 full year result.

Westpac Group Chief Executive Officer Gail Kelly said: "This is a strong result in a lower growth economic environment, and it reflects the progress we have made over the past five years in building a stronger, more productive and more customer focused company.

"We have strengthened our balance sheet while delivering attractive returns to shareholders and investing for future growth. Our performance, particularly in the second half, demonstrates that we have increasing momentum across our businesses.

"Our disciplined approach to productivity has improved customer service and increased efficiency. Importantly, we continue to be the most efficient Australian bank, with an expense to income ratio down to 40.8%."

Mrs Kelly said a highlight of the result was the strong performance of the new Australian Financial Services division (AFS), which includes the Australian retail banking, business banking and wealth operations.

"Revenue growth in AFS was pleasing, particularly in the second half. At the same, time expense growth was low despite ongoing investment in our wealth and banking distribution capabilities," Mrs Kelly said.

"Westpac Retail & Business Banking is performing strongly, benefiting from the investment in Westpac Local over the past four years. St.George's performance is improving under new, energised management while BT Financial Group led the market in net market flows of funds onto its platforms and continued its strong insurance cross-sell.

"Westpac Institutional Bank's strong growth in core earnings² reflects its industry leadership and strength in relationship management, including supporting its customers in what continue to be volatile times. Westpac New Zealand is also performing strongly with significant front-line investment and improving credit quality supporting a 22% increase in cash earnings compared to the prior year.

¹ Reported on a cash earnings basis unless otherwise stated. For an explanation of cash earnings and reconciliation to reported results refer to pages 4-6 of the Group's Full Year Results 2012 announcement.

² Core earnings is operating profit before income tax and impairment charges.

RESULTS ANNOUNCEMENT TO THE MARKET
PRESS RELEASE
AND OUTLOOK

“Strengthening our balance sheet and improving our funding profile has been a key area of focus in recent years. At our half year results, I stressed that a priority was growing deposits so I am pleased that our total customer deposits grew 12% or \$38 billion this year, more than funding our growth in loans. Combined with a reduction in short-term wholesale debt, this has materially improved our funding mix.

“Our capital ratios are at the upper end of the banking sector globally, with our APRA Basel III common equity ratio improving to 8.2%. Our credit quality and provisioning are leading the sector.”

Other key aspects of the FY12 result compared to FY11 include:

- Lending increased 4% or \$18 billion with a 4% rise in Australian housing loans and solid business loan growth in Westpac Retail & Business Banking;
- Net interest margin was 2.17%, down 5bps. The decline was due to higher funding costs, mostly from the increased benefit customers received from higher deposit interest rates relative to market rates;
- Solid revenue growth and productivity savings have enabled the Group to continue to invest in growth areas, which accounted for the majority of the expense growth of 4%;
- Impairment charges were \$219 million higher, due to total economic overlays increasing \$17 million, compared to a \$107 million reduction in FY11, and lower write-backs in Westpac Institutional Bank compared to the previous year; and
- Funding profile materially improved with the stable funding ratio up 6 percentage points to 83% and liquid assets higher at \$110 million.

Dividend

Westpac declared a record fully franked final dividend of 84 cents per share, up 2 cents, or 2% over first half 2012. Total dividends for the year were 166 cents, up 6% over the prior year, and reflected a pay-out ratio of 77%.

Mrs Kelly said: “Our strong balance sheet and sustainable earnings performance allows us to return three quarters of our profit as dividends to shareholders, the vast majority of whom are Australians owning shares directly or through their superannuation funds.”

Strong progress on our strategic priorities

In Westpac’s FY11 results, the Group outlined key indicators in a number of priority areas. Each of these metrics improved over the year highlighting strong progress in growing revenues from deeper customer relationships and building shareholder returns. In particular:

- Revenue per FTE increased 10%, from significantly enhanced productivity;
- Wealth and insurance products cross-sell¹ is sector leading at 18.4%. Westpac Retail & Business Banking cross-sell ranked first among the large banks at 20.8% and St.George had the greatest improvement, up 235bps to 15%. In addition, customers with four or more products increased 170bps to 30.2% in Westpac Retail and Business Banking and 200bps to 28.6% at St.George;
- Customer return on credit risk weighted assets improved 8bps to 4.09%;
- Customer numbers increased with growth in Bank of Melbourne particularly strong, up 13%; and
- Westpac Institutional Bank grew customer revenue 8% and was ranked No. 1 lead domestic transactional bank for the 9th consecutive year, according to the Peter Lee² survey.

Continued investment in digital and IT innovation and stability

Significant IT investment in recent years is resulting in simpler products and processes, improving reliability and driving digital innovation.

The Strategic Investment Priorities program, having completed its third year, is meeting its milestones and is 70% complete. It has materially improved the stability of the Group’s IT infrastructure and delivered much improved functionality and performance benefiting customers and lifting employee productivity. Highlights for the year include:

¹ Data based on Roy Morgan Research, see investor discussion pack slide 119 for more details.

² Peter Lee Associates Large Corporate & Institutional Transactional Banking survey, Australia 2004-2012.

RESULTS ANNOUNCEMENT TO THE MARKET
PRESS RELEASE
AND OUTLOOK

- Completion of the roll-out of new call centre and teller platforms across Westpac Retail & Business Banking, delivering efficiency benefits and faster response times to customers;
- A major upgrade in payments infrastructure combining Westpac Retail & Business Banking and St.George systems and supporting over \$3.2 trillion worth of payments each year. This has improved stability and performance;
- A new 'state of the art' data centre in Western Sydney; and
- Significant progress in upgrading online and digital banking capabilities and infrastructure. This includes introducing the innovative Westpac iPad application, upgrading St.George's internet banking platform, and providing Westpac and St.George PayWay applications that assist small business operators to receive payments from customers.

In Wealth, the Group has commenced the development of a next generation platform to help build on its leading position in wealth platforms and deliver a more comprehensive solution for customers wanting to self manage their superannuation.

Westpac New Zealand (NZ\$)	707	361	346	22	4

Australian Financial Services

In November 2011, the Group established the Australian Financial Services division to improve and better coordinate the performance of our brands and reduce duplication.

Westpac Retail & Business Banking delivered a strong 14% increase in cash earnings, as the investment in its Westpac Local strategy continues to deliver benefits through empowered local staff, improved cross-sell and customer retention. While sector credit growth has remained modest, the division achieved sound balance sheet growth, including 11% deposit growth, 3% mortgage growth and 4% business loan growth, with a 3bps reduction in margins. Expenses were flat, with productivity initiatives offsetting annual salary rises and increased investment costs.

St.George Banking Group cash earnings were little changed over the year. However, a feature of the St.George performance was the improved momentum through the year with second half 2012 cash earnings increasing 14% compared to the first half 2012. The second half improvement was built on higher home and auto lending, improved margins, solid expense control and lower impairment charges.

BT Financial Group had a strong second half, with cash earnings increasing 17% compared to the first half 2012. Cash earnings were down 10% compared to FY11, impacted by lower asset markets, a reduced contribution from the equities business and the de-risking of its lenders mortgage insurance business. The strong underlying performance was supported by further growth in its planner network and a strong result across life and general insurance. The division continued to lead the market in funds under administration flows and insurance and wealth cross-sell.

Westpac Institutional Bank

Westpac Institutional Bank delivered a solid increase in cash earnings of 3% compared to FY11, with strong core earnings growth of 13% on the back of improved customer activity in financial markets, an increased contribution from Hastings and well-managed expenses. A highlight has been strong deposit growth as the division leverages its leading transactional banking position. Strong core earnings growth was partially offset by relatively higher impairment charges, due to significant provision write-backs in 2011 not being matched in 2012.

RESULTS ANNOUNCEMENT TO THE MARKET
PRESS RELEASE
AND OUTLOOK

Westpac New Zealand

Westpac New Zealand performed strongly in FY12, with cash earnings increasing 22% compared to FY11. The division continues to benefit from its investment in upskilling staff and the revitalisation of its branch network. Despite subdued economic conditions, the business achieved sound balance sheet growth, improved margins, strong wealth and insurance cross-sell and well managed expenses. Deposits increased 11%, asset quality continued to improve and impairments were down 21%.

Asset quality

Asset quality continued to improve over the year with the proportion of stressed loans to total committed exposures steadily declining. At 30 September 2012 the ratio had fallen to 2.17%, down 31bps over the year and down 9bps since 31 March 2012. The rate of improvement eased in the second half of the year with reduced stress in the commercial property sector partially offset by a small rise in stress from sectors affected by the persistently high Australian dollar and consumer caution, which has affected domestic spending.

Consumer asset quality remains sound as deleveraging, healthy employment levels and lower interest rates contribute to improving household balance sheets. As a result, mortgage delinquencies greater than 90 days declined over the year to 51bps, down 4bps.

Balance sheet strength

Westpac further strengthened its balance sheet over the year across all elements of capital, funding and liquidity. The Group's APRA Basel III common equity ratio increased 79bps on FY11 to 8.2%. On a fully harmonised Basel III basis, Westpac's common equity ratio would be 10.6%, placing the Group at the upper end of banks globally.

In assessing appropriate capital levels under APRA's Basel III standards, the Group has set a preferred range of 8.0% to 8.5% for its common equity ratio, well above regulatory requirements.

The Westpac Group's funding and liquidity position strengthened over the year. The stable funding ratio increased 6 percentage points; the customer deposit to loan ratio rose 5 percentage points to 67.6%; short-term funding was reduced by \$31 billion and, there was a further increase in liquid asset holdings of \$9 billion over the half to \$110 billion.

Outlook

Australian economic indicators have remained relatively robust throughout 2012 with good growth, low unemployment and controlled inflation. However, a gradual softening of global economic activity has continued to weigh on domestic business and consumer confidence.

For the banking sector, these conditions have seen modest demand for finance. System housing credit growth eased further over the year to 4.7% per annum, while business credit growth gradually lifted after declining for most of the previous three years. As a result, total financial system credit growth increased 4% for the year. System deposit growth, on the other hand, continued to expand at a rate double that of credit growth.

In New Zealand, economic conditions improved through the year with some growth in consumer spending, a stronger housing sector and improving agricultural commodity prices. Despite these trends, the economy remains in a deleveraging phase, with credit growth remaining low at around 3% and deposit growth stronger at 9%.

As Westpac has previously indicated, these economic shifts are part of broader structural changes for the banking sector which also include significantly increased regulatory demands and costs. Westpac is reshaping the organisation to be well positioned in this changed environment. In particular:

- The Group has materially repositioned its balance sheet with stronger capital levels, an improved funding position with a higher deposit to loan ratio and materially higher holdings of liquid assets;
- With the sector's leading expense to income ratio Westpac made good progress on its productivity agenda including implementing its new divisional structure and supplier program. Nevertheless, there remain significant opportunities to simplify processes and improve efficiency;
- From a growth perspective, the Group is building on its strength in wealth through increasing focus on superannuation and insurance, investing in developing a next generation wealth platform and increasing the number of advisers;
- Westpac is also directing more effort and resources to sectors generating higher growth and return including the pre and post retirement customer segment, small to medium enterprises, natural resources, agriculture, trade and transaction banking; and

RESULTS ANNOUNCEMENT TO THE MARKET
PRESS RELEASE
AND OUTLOOK

- The Group is growing in Asia by expanding its capabilities and distribution network. The key focus is assisting Australian and New Zealand customers in the region and expanding Westpac's reach to Asian customers operating in the bank's core markets of Australia and New Zealand.

In conclusion, Mrs Kelly said: "We expect continued modest credit growth and strong saving levels. Volatility in global markets is likely to continue and as a result of the structural changes that are now occurring, both overseas and domestically, the operating environment will remain challenging. However, the Australian economy is robust relative to most other developed economies and its connections to Asia's growth markets support its underlying strength.

"We have a clear strategy in place and, as a result of the work we have undertaken in recent years, Westpac is in good shape. Our balance sheet is strong and we are well advanced in repositioning our business for the slower growth environment. We will continue to deepen customer relationships, invest in growth opportunities and drive productivity. We expect our good momentum to continue."

Non-interest income	2,834	2,647	7	5,481	4,917	11
Net operating income before operating expenses and impairment charges	9,151	8,832	4	17,983	16,913	6
Operating expenses	(4,013)	(3,896)	(3)	(7,909)	(7,406)	(7)
Net profit before impairment charges and income tax expense	5,138	4,936	4	10,074	9,507	6
Impairment charges	(604)	(608)	1	(1,212)	(993)	(22)
Profit before income tax	4,534	4,328	5	8,862	8,514	4
Income tax expense	(1,499)	(1,327)	(13)	(2,826)	(1,455)	(94)
Net profit for the period	3,035	3,001	1	6,036	7,059	(14)
Profit attributable to non-controlling interests	(32)	(34)	6	(66)	(68)	3
NET PROFIT ATTRIBUTABLE TO OWNERS OF WESTPAC BANKING CORPORATION	3,003	2,967	1	5,970	6,991	(15)

Net profit attributable to owners for Full Year 2012 was \$5,970 million, a decrease of \$1,021 million or 15% compared to Full Year 2011. Features of this result were a 6% increase in operating income, a 22% increase in impairment charges and a 94% increase in income tax expense.

Net profit before impairment charges and income tax was \$567 million higher as net operating income increased in all of the Group's divisions. An increase in operating expenses reflected higher business restructuring costs and the impact of prior period investments on depreciation and amortisation.

Net interest income increased \$506 million, or 4%, compared to Full Year 2011, reflecting growth in loans and deposits. This is discussed further in Section 3.2.1.

Non-interest income increased \$564 million, or 11% compared to Full Year 2011, reflecting growth in the retail banking divisions, strong wealth earnings including additional income from the acquisition of J O Hambro and higher markets income. The drivers of non-interest income are discussed in Section 3.2.2.

Operating expenses increased \$503 million, or 7%, compared to Full Year 2011. This primarily reflects some rise in salaries, other staff costs and restructuring costs, including higher operating costs from expansion in Asia and Bank of Melbourne and restructuring costs associated with the Group's supplier program. Prior period investment also resulted in higher equipment and occupancy costs which included higher software amortisation expense. An additional expense was incurred from an increase in provisions for long standing legal proceedings. Expenses are discussed further in Section 3.2.3.

Impairment charges on loans increased \$219 million, or 22%, compared to Full Year 2011. Full Year 2011 benefited from a \$107 million net reduction in economic overlay provision and the benefits of improved asset quality and write-backs. Full Year 2012 included a small \$17 million increase in economic overlay and a reduced benefit from write-backs. This is discussed further in Section 3.2.4.

The effective tax rate was 31.9% in Full Year 2012 compared to 17.1% in Full Year 2011. The increase in income tax expense reflected finalising the tax consequences of the St.George merger. In Full Year 2012 income tax expense included a tax charge of \$165 million relating to the retrospective impact of new Taxation of Financial Arrangements (TOFA) legislation and its application to the merger with St.George, while in Full Year 2011 a benefit of \$1,110 million was received relating to the impact of tax consolidation of the St.George merger.

Cash Earnings Policy

In assessing financial performance, including divisional results, Westpac Group uses a measure of performance referred to as "Cash Earnings"¹. Cash Earnings is not a measure of cash flow or net profit determined on a cash accounting basis, as it includes non-cash items reflected in net profit determined in accordance with A-IFRS. The specific adjustments outlined below include both cash and non-cash items. Cash Earnings, as calculated by Westpac, is viewed as a measure of the level of profit that is generated by ongoing operations and is expected to be available over the long term for distribution to shareholders. To calculate Cash Earnings Westpac adjusts the reported results for the items outlined below. This allows the Group to more effectively assess performance for the current period against prior periods and to compare performance across business divisions and across peer companies.

Three categories of adjustments are made to reported results to determine Cash Earnings:

- Material items that key decision makers at the Westpac Group believe do not reflect ongoing operations;
- Items that are not considered when dividends are recommended, such as the amortisation of intangibles, impact of Treasury shares and economic hedging impacts; and
- Accounting reclassifications between individual line items that do not impact reported results, such as policy-holder tax recoveries².

¹ Cash Earnings adjustments are explained on pages 5 and 6.

² Policy-holder tax recoveries – Income and tax amounts that are grossed up to comply with the A-IFRS accounting standard covering Life Insurance Business (policy-holder tax recoveries) are reversed in deriving income and taxation expense on a Cash Earnings basis.

Total Cash Earnings adjustments	400	228	75	628	(690)	191
Cash Earnings	3,403	3,195	7	6,598	6,301	5

Outlined below are the Cash Earnings adjustments to the reported result:

- TPS revaluations – Adjustment for movements in economic hedges, including associated tax effects impacting the Foreign Currency Translation Reserve, relating to hybrid instruments classified as non-controlling interests. The adjustment is required as these hybrid instruments are not fair valued, however, the hedges are fair valued and therefore there is a mismatch in the timing of income recognition in the reported results. The mismatch is added back to reported results in deriving Cash Earnings as it does not affect the Group's profits over time;
- Treasury shares – Under A-IFRS, Westpac shares held by the Group in the managed funds and life business are deemed to be Treasury shares and the results of holding these shares are not permitted to be recognised as income in the reported results. In deriving Cash Earnings, these results are included to ensure there is no asymmetrical impact on the Group's profits because the Treasury shares support policyholder liabilities and equity derivative transactions which are re-valued in deriving income;
- Ineffective hedges – The gain/(loss) on ineffective hedges is reversed in deriving Cash Earnings for the period because the gain or loss arising from the fair value movement in these hedges reverses over time and does not affect the Group's profits over time;
- Fair value gain/(loss) on economic hedges (which do not qualify for hedge accounting under A-IFRS) comprises:
 - The unrealised fair value gain/(loss) on foreign exchange hedges of future New Zealand earnings impacting non-interest income is reversed in deriving Cash Earnings as they may create a material timing difference on reported earnings but do not affect the Group's Cash Earnings during the life of the hedge;
 - The unrealised fair value gain/(loss) on foreign exchange hedges of fees payable for the use of the Government guarantee on foreign denominated wholesale funding is reversed in deriving Cash Earnings as they may create a material timing difference on reported earnings but do not affect the Group's Cash Earnings during the life of the hedge; and

FULL YEAR RESULTS 2012
GROUP RESULTS
REPORTED RESULTS

- The unrealised fair value gain/(loss) on hedges of accrual accounted term funding transactions are reversed in deriving Cash Earnings as they may create a material timing difference on reported earnings but do not affect the Group's Cash Earnings during the life of the hedge;
- Gain/(loss) on buyback of Government guaranteed debt – During 2011, the Group bought back some Government guaranteed debt which reduced Government guarantee fees (70 basis points) paid. In undertaking the buybacks, in addition to the 70 basis point fee saving, a cost was incurred reflecting the difference between current interest rates and the rate at which the debt was initially issued. In the reported result the cost incurred is recognised at the time of the buybacks. In Cash Earnings the cost incurred is being amortised over the original term of the debt that was bought back. The Cash Earnings adjustment gives effect to the timing difference between reported earnings and Cash Earnings;
- Tax provision – In Full Year 2011, the Group increased tax provisions by \$70 million in respect of certain existing positions for transactions previously undertaken by the Group. The increase reflected the recent trend of global taxation authorities challenging the historical tax treatment of cross border and complex transactions. This increase in tax provisions was treated as a Cash Earnings adjustment as it related to the global management of historical tax positions and does not reflect ongoing operations. The Group's management of tax positions has moved to disclosing any such transactions to the taxation authorities at or around the time of execution;
- Supplier program – In Full Year 2012, the Group incurred and provisioned for non-recurring expenses as part of its program to increase the use of global specialists in certain technology and back office operations. These expenses included costs associated with streamlining and better documenting systems and processes, technology costs to enable infrastructure and enhance interaction with suppliers, and costs associated with restructuring the workforce. Given these significant expenses are not considered in determining dividends they are being treated as Cash Earnings adjustments;
- Amortisation of intangible assets – The acquisition of J O Hambro, previously a privately owned London-based equity investment manager, by BT Investment Management (BTIM) during First Half 2012 resulted in the recognition of management contract intangible assets. These intangible items are amortised over their useful lives, ranging between five and twenty years. The amortisation of intangible assets (excluding capitalised software) is a Cash Earnings adjustment because it is a non-cash flow item and does not affect cash distributions available to shareholders; and
- Litigation provision – The Group recognised a provision of \$111 million (\$78 million after tax) with respect to longstanding legal proceedings. This has been treated as a Cash Earnings adjustment due to its size, the historical nature of the proceedings and it does not reflect ongoing operations.

St.George merger related Cash Earnings adjustments:

- As part of the merger with St.George, transaction and integration expenses incurred over three years following the merger were treated as a Cash Earnings adjustment as they did not impact the earnings expected from St.George following the integration period. The integration project was completed in Full Year 2011;
- Amortisation of intangible assets – The merger with St.George resulted in the recognition of core deposit intangibles and customer relationships intangible assets that are amortised over their useful lives, ranging between five and nine years. The amortisation of intangible assets (excluding capitalised software) is a Cash Earnings adjustment because it is a non-cash flow item and does not affect cash distributions available to shareholders;
- The accounting for the merger with St.George resulted in the recognition of fair value adjustments on the St.George retail bank loans, deposits, wholesale funding and associated hedges, with these fair value adjustments being amortised over the life of the underlying transactions. The amortisation of these adjustments is considered to be a timing difference relating to non-cash flow items that do not affect cash distributions available to shareholders and therefore, have been treated as a Cash Earnings adjustment;
- Tax consolidation adjustment – Finalisation of tax consolidation related to the merger with St.George gave rise to a reduction in income tax expense of \$1,110 million in First Half 2011. The tax consolidation process required Westpac to reset the tax value of certain St.George assets to the appropriate market value of those assets at the effective date of the tax consolidation (31 March 2009). These adjustments have been treated as a Cash Earnings adjustment due to their size and because they do not reflect ongoing operations; and
- TOFA tax consolidation adjustment - New legislation that included retrospective amendments to the income tax law as it applies to TOFA and tax consolidated groups was introduced during the 2012 financial year. The amendments have an adverse application to certain liabilities that were consolidated as part of the merger with St.George. This gave rise to an additional income tax expense of \$165 million for the 2012 financial year. Consistent with other tax adjustments relating to the merger with St.George this adjustment has been treated as a Cash Earnings adjustment due to its size and because it does not reflect ongoing operations.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

3.0 REVIEW OF GROUP OPERATIONS

3.1 Cash Earnings Summary

Throughout this review of Group operations, reporting of financial performance for Second Half 2012, First Half 2012, Full Year 2012 and Full Year 2011 will refer to "Cash Earnings results".

Overview

The Westpac Group delivered a strong performance in Full Year 2012 with core earnings growth of 7%, a significant strengthening of the balance sheet and continued good progress on the Group's strategic agenda.

Cash Earnings of \$6,598 million for Full Year 2012 increased \$297 million, or 5%, compared to Full Year 2011 with Cash Earnings per share of 215.9 cents, up 3% over the year. Shares on issue increased 2% due principally to shares issued under the dividend reinvestment plan. The return on equity for Full Year 2012 was 15.5%, down from 16% in Full Year 2011 mostly due to average equity rising a strong 8%, well above the growth in Cash Earnings.

Earnings growth for the year reflected sound growth in lending, strong growth in deposits and continued leadership in Wealth flows. This growth was partially offset by lower margins. Interest margins were 5 basis points lower over the year principally due to deposit interest rates declining less than equivalent market benchmark rates, and hence becoming relatively more expensive.

A feature of the year has been the very strong growth in non-interest income, up 11% over the year, supported by further improvements in building deeper customer relationships reflected in selling more products to customers.

Expenses were well managed, rising 4% in Full Year 2012 with productivity gains helping to absorb normal salary increases and increased investment related expenses (salaries, technology costs and higher amortisation/depreciation). Improving productivity has been a key focus of the Group in recent years and a further \$238 million in efficiency gains were delivered in Full Year 2012. The net result of these moves has been a 70 basis point decline in the expense to income ratio to 40.8% for Full Year 2012.

Asset quality improved over the year although impairment charges were higher, principally due to increased write-backs in 2011 that were not repeated in 2012.

Across the Group, all divisions experienced good momentum. Westpac RBB and New Zealand were the strongest performers with Cash Earnings growth of 14% and 22% over the prior year respectively. Westpac Institutional Bank (WIB) Cash Earnings were up 3% in Full Year 2012 with very strong core earnings growth of 13% partially offset by higher impairment charges from reduced impairment write-backs. BTFG reported lower Cash Earnings over the year and St. George Cash Earnings were relatively flat, although both delivered significantly improved performances in the second half of the year. Pacific Banking delivered a very strong uplift in earnings for Full Year 2012, up 41%, while the contribution from the Group Business Unit was down 13% over the year.

Westpac's strategy is focused on improving returns by growing the customer base and building deeper customer relationships. This strategy is supported by our portfolio of brands and by reorientating our business to higher growth sectors and segments. The Group has made good progress on this strategy over recent years with key metrics continuing to show improvement. Over the last year this can be seen in:

- A further 8 basis point rise in the customer return on credit risk weighted assets to 4.09%;
- A deepening of customer relationships including:
 - Higher insurance and wealth cross-sell of 18.4% up 143 basis points;
 - Customer deposit growth well ahead of system at 12%; and
 - A 16% increase in sales of foreign exchange and interest rate risk management products in AFS, leveraging the support of institutional bank specialists.
- Customer numbers increased across all brands, with the total Group's customer numbers increasing 3%.

In implementing the Group's strategy, highlights for the year have included:

- Establishing and implementing a new operating structure to enhance productivity and improve coordination between the Group's brands;
- Continued to be a leader in the development of online and mobile banking technology including the introduction of a new St. George banking website, launch of an innovative iPad app and a new small business payment app, PayWay;
- Finalised the development of a new supplier model improving both the quality and efficiency of managing certain processes and systems;
- Delivering on the Bank of Melbourne investment opening 12 additional branches through the year and achieving key project milestones including increasing customer numbers 13% and growing deposits 35%; and
- Continued to make good progress with the Group's SIPs program. Three years into the five year program the investment is now 70% complete with major elements of the program now fully operational.

A feature of the Group's performance for the year has been the continued strengthening of the balance sheet to further reinforce the Group's financial position and enhance flexibility. Changes have included:

- Capital levels have continued to strengthen with the common equity ratio 29 basis points higher and the Tier 1 ratio 57 basis points higher. On a fully harmonised basis the Group's common equity ratio was 10.6% placing Westpac's capital position at the upper end of banks globally;
- The Group's funding position was enhanced with the customer deposit to loan ratio up more than 5 percentage points to 67.6% and liquidity boosted by a \$7 billion rise in liquid assets to \$110 billion; and
- Asset quality continued to improve with stressed assets to total committed exposures falling 31 basis points to 2.17%. The level of provisioning cover also remained strong.

While improving financial strength has an impact on earnings, these initiatives are considered appropriate given the more volatile operating environment, increased regulatory requirements and the preferences of investors and rating agencies.

Given the quality of the Group's performance, the Board has declared a final dividend of 84 cents, fully franked, up 2 cents or 2% on the First Half 2012 interim dividend. This translates to total dividends for the year of 166 cents, up 10 cents or 6% compared to Full Year 2011. Dividends for the full year represent a pay-out ratio of 77%. This pay-out ratio reflects the strength of the Group's capital position, a desire to pay out excess franking credits and the Group's confidence in the future.

Operating environment

Reported economic indicators in Australia have, in aggregate, remained relatively robust throughout much of 2012 with moderate growth, low unemployment and benign inflation. Despite these strengths, the experience across sectors has been diverse, business and consumer confidence remains soft, and a loss of momentum emerged as the year progressed. The mining sector has continued to be the growth driver of the economy, with other sectors experiencing more challenging conditions given consumer caution and ongoing strains from the high Australian dollar.

Conditions globally have also remained challenging. World growth lost momentum in 2012 and is sub-trend. Europe is in recession, US growth is moderate and China's economy has cooled as a result of past policy tightening. Policy makers in the major economies are now responding to these developments with more aggressive stimulus measures. This is likely to lead to a gradual strengthening of activity. However, the outlook remains uncertain. Europe may continue to contract and the pace of recovery elsewhere in the developed world will be constrained by fiscal consolidation, excessive household debt and weak financial systems. Prospects for the developing economies are likely to improve as those regions have ample scope for effective policy stimulus.

The Reserve Bank of Australia (RBA) has resumed the monetary policy easing cycle in response to global and domestic developments and given the scope provided by a benign inflation environment. The stance of monetary policy is now expansionary, with additional policy easing widely expected.

For the banking sector, these conditions have seen demand for finance remain relatively modest while deposit growth has continued to grow solidly. System housing credit growth eased further over the year rising by 4.7% while business credit growth has gradually lifted after declining for most of the last three years. As a result, total financial system credit growth totalled 4.0% for the year to September 2012. Deposit growth on the other hand has continued to expand at a rate double that of credit expanding around 8.1%.

These conditions have impacted our business in various ways. In addition to the low demand for credit, customer caution has contributed to more funds being directed to paying down debt, strong deposit flows and an increased aversion to more risky investments. These trends have resulted in a strengthening of household and business balance sheets and solid demand for hedging and protection products.

In New Zealand, economic conditions improved through the year, with some growth in consumer spending, a stronger housing sector and improving agricultural commodity prices. At the same time, inflation remains subdued and interest rates are low and are expected to remain on hold for the medium term. GDP growth is expected to end the financial year at around 2.4% up from 1.1% a year earlier. Despite these trends, the economy remains in a deleveraging phase with credit growth remaining low at around 3% and strong deposit growth at 9%.

Financial Performance Summary

Full Year 2012 – Full Year 2011

Cash Earnings in Full Year 2012 of \$6,598 million were 5% higher compared to Full Year 2011. Core earnings growth of 7% was the key driver of the increase partially offset by higher impairment charges and a small rise in the average tax rate.

The \$680 million rise in core earnings was driven by a 6% rise in operating income comprising an 11% rise in non-interest income and a 3% increase in net interest income. The rise in net interest income reflects a 5% rise in average interest-earning assets and a 5 basis point decline in margins with a rise in funding costs relative to market rates (particularly deposits) and a rise in capital and liquidity costs not fully offset by asset repricing.

Lending growth of 4% primarily reflected a rise in Australian housing lending which increased 4%. Business lending increased 2%, while an uplift in trade finance contributed to the rise in offshore lending. New Zealand lending increased 3%, with growth split between housing and business lending. The rise in customer deposits was more than double that of lending over the year. Customer deposits increased 12% and while term deposits drove much of the increase, rising 21%, good growth was also achieved in savings and transaction accounts. This strong growth in customer deposits enabled the group to reduce certificates of deposit balances, which are largely wholesale, and led to a 7% rise in deposits for the year.

The solid improvement in non-interest income reflects excellent cross-sell of wealth and insurance products combined with a rise in sales of financial risk management products across the Group. The year also benefited from higher performance fees in Hastings and the inclusion of the J O Hambro business.

Expenses were well managed over the year rising 4% with \$238 million in productivity savings assisting to offset increased expenses associated with investment including higher software amortisation, the expansion of the Bank of Melbourne network and an increased investment in mobile technologies.

While asset quality improved through the year, impairment charges were up \$219 million over Full Year 2012. Most of the rise was due to lower write-backs in 2012 and higher charges related to collectively assessed provisions. The provisions were impacted by a \$17 million rise in the economic overlay in Full Year 2012 whereas in Full Year 2011 economic overlay provisions were \$107 million lower as commercial property provisions were utilised and some Christchurch earthquake related provisions were no longer required.

Second Half 2012 – First Half 2012

Cash Earnings in Second Half 2012 of \$3,403 million were up \$208 million over First Half 2011, a rise of 7%. Both Cash Earnings and core earnings were up strongly across Australian Financial Services and New Zealand, with a particularly strong result from St. George and BTFG.

Net interest income was 2% higher over the prior half with a 1% rise in average interest-earning assets and a 1 basis point rise in margins. Treasury income was also up strongly in the half, while WIB was lower and the costs of holding increased levels of liquid assets and hybrids were higher. Lending increased 2% with Australian mortgages continuing to be the main source of growth. Customer deposits rose \$28 billion, materially higher than the \$8 billion rise in lending, boosting the deposit to loan ratio by over 4 percentage points to 67.6%. The rise in margins was principally due to the full period impact of pricing changes implemented in First Half 2012 partially offset by increased costs of retail deposits relative to market rates.

Non-interest income was particularly strong over the prior half with a significant uplift in wealth and insurance earnings and higher trading income. Expenses rose 2% over the half with the impact of productivity savings assisting to offset increased investment costs (particularly depreciation and amortisation), and higher compliance spending.

Impairment charges were \$4 million lower with reductions recorded in Westpac RBB, St. George, New Zealand and WIB partially offsetting an \$18 million increase in the economic overlay.

Significant productivity improvements

In Full Year 2012, the Group delivered \$238 million in expense savings associated with initiatives commenced over the last two years, and contributed to a reduction in average FTE of 1,760. These initiatives can be characterised under three broad headings:

- A broad productivity program seeking to improve key processes across the Group. This ongoing program delivered \$118 million in efficiency benefits over the year;

FULL YEAR RESULTS 2012

REVIEW OF GROUP OPERATIONS

- A divisional restructure creating the Australian Financial Services (AFS) and Group Services divisions delivered \$97 million in savings in the year. This program has reduced duplication and improved coordination between our retail banking and wealth divisions and in our back offices and technology business units; and
- Changes in supplier arrangements delivering \$23 million in benefits in 2012. Commenced in November 2011, this program is nearing completion and has identified ongoing run-rate benefits of over \$65 million per annum.

Asset quality

Asset quality continued to improve in 2012 with the proportion of stressed loans to total committed exposures ending the year 31 basis points lower. At 30 September 2012 the ratio had fallen to 2.17%, down 31 basis points from September 2011 and by 9 basis points since March 2012.

Behind the improvement in stressed assets has been a reduction in new stress and further companies being upgraded and returning to full health. At the same time, the resolution of some impaired assets has seen an increase in write-offs over the year. New impaired assets have consistently declined each half since their peak in 2009, however, were moderately higher in Second Half 2012.

While overall asset quality has improved, the rate of improvement slowed through the year as the softening economic conditions began to see a rise in stress across those sectors of the economy impacted by the continued strength of the Australian dollar (\$) and ongoing consumer caution.

Consumer asset quality has continued to be very sound with consumer delinquencies moderately lower over the year. Mortgage delinquencies greater than 90 days eased to 51 basis points down from 55 basis points at September 2011 while delinquencies greater than 90 days for other consumer lending were 5 basis points lower, ending the year at 1.11%.

Provisioning cover remained strong with impaired provisions to impaired assets of 37% while the ratio of collectively assessed provisions to credit risk weighted assets was lower at 1.13%.

Given some early signs of stress emerging in certain sectors the Group took the opportunity to adjust its economic overlays over the year. In total the economic overlay increased \$17 million over the year. There was an increase in economic overlays for those sectors more impacted by the high \$A, soft consumer demand and lower commodity prices. Partially offsetting this has been a reduction in overlays associated with commercial property and the Christchurch earthquake as provisions have been realised.

Capital and funding

A key feature of the Group's 2012 performance has been the continued strengthening of the balance sheet with both higher capital levels and a strengthened funding and liquidity position.

At 30 September 2012 the Group's Tier 1 ratio measured under APRA's Basel 2.5 standards was 10.25% up from 9.68% at 30 September 2011. The increase was principally due to organic capital generation (net profit less dividends) and which added 82 basis points over the year. The common equity ratio increased by 29 basis points to 8.38%.

Under a fully harmonised Basel III Westpac's common equity ratio would be 10.63%.

The Westpac Group's funding position also strengthened over the year, with the stable funding ratio increasing 6 percentage points to 83%. Customer deposit growth exceeded lending by almost \$20 billion through the year, that, combined with \$32 billion in term wholesale funding raised over the year, allowed the Group to fund maturities, reduce short term wholesale funding, and pre-fund over \$3 billion of debt maturing in 2013.

Summary of business units

Westpac RBB delivered a strong performance over the year with Cash Earnings rising a strong 14% supported by an 8% rise in core earnings and lower impairment charges. The prior investment in Westpac Local continues to deliver benefits with sound lending and deposit growth offset by a modest 3 basis point contraction in margins. Non-interest income was particularly strong from higher business line fees along with higher markets income from assisting customers manage financial risk. Expenses were in line with Full Year 2011 with productivity initiatives implemented more than fully offsetting annual salary increases and increased investment spending

St.George Cash Earnings in Full Year 2012 were little changed (down \$2 million) compared to Full Year 2011 with increased volumes and higher business fees offset by lower interest margins and an increase in impairment charges. A feature of the St.George performance has been the improved momentum through the year with core earnings up 6% and Cash Earnings 14% higher in Second Half 2012 compared to First Half 2012. This good momentum was replicated across all brands: St.George, BankSA, Bank of Melbourne and RAMS. Expenses increased 1% over the year with productivity gains offsetting increased investment, including with the Bank of Melbourne roll-out.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

While delivering good business momentum through the year, weaker markets contributed to a lower result from BTFG in Full Year 2012. The division recorded strong fund flows onto platforms, and improved insurance sales, including a 43% uplift in life insurance sales. Despite these flows, the division was impacted by a weaker contribution from the equities business (including margin lending), lower earnings from the decision to reduce the risk in the lenders mortgage insurance business and lower fees on funds from weaker asset market prices. Earnings substantially improved in Second Half 2012 with Cash Earnings increasing 17% on First Half 2012. The division has continued to lead the market in funds under administration flows, increasing corporate superannuation flows, improving insurance cross-sell, and in expanding its advisor network.

WIB delivered \$1,473 million in Cash Earnings in Full Year 2012, a 3% rise over the year. Core earnings were up a very strong 13% with improved customer flows supporting markets income and increased performance fees in Hastings. Lending increased 4% over the year with most of the growth attributed to increased lending to the natural resources sector and to trade finance. These increases were largely offset by softer margins, principally as higher funding costs have not been fully reflected in lending rates. The strong core earnings growth was partially offset by higher impairment charges due to significant provision write-backs in 2011 that were not repeated in the current year.

New Zealand continued to benefit from its significant front line investment over recent years delivering a NZ\$129 million lift in Cash Earnings, up 22% and a 10% rise in core earnings. While credit growth was modest, the result was supported by improved margins and a significant uplift in wealth and insurance cross-sell. The improved operating environment also contributed to a further decline in impairment charges.

REVIEW OF GROUP
OPERATIONS

3.2 Review of Earnings

3.2.1 Net interest income

Second Half 2012 – First Half 2012

Net interest income increased \$117 million (2%) compared to First Half 2012. The result reflected an increase in the net interest margin of 1 basis point and growth in average interest-earning assets of \$8.2 billion or 1%.

Full Year 2012 – Full Year 2011

Net interest income increased \$394 million (3%) compared to Full Year 2011. The increase was the result of a \$29.5 billion or 5% increase in average interest-earning assets, partially offset by a decrease in the net interest margin of 5 basis points.

Second Half 2012 – First Half 2012

Total loans as at 30 September 2012 were \$8.3 billion or 2% higher than 31 March 2012. Australian housing loans continued to be the primary driver of growth and increased 2%, in line with financial system growth.

Key features of total loan growth were:

- Australian housing loans increasing \$6.2 billion or 2%, with growth across all brands. Growth was strongest across the St.George portfolio of brands, reflecting improved lending momentum in this business;
- Australian personal loans and cards increasing \$0.2 billion or 1%, reflecting growth in the Auto Finance portfolio;
- Australian business loans increased \$0.5 billion. AFS business lending increased while institutional lending declined, mostly due to securitisation of customer facilities; and
- New Zealand lending grew NZ\$1.2 billion or 2%. New Zealand housing loans increased NZ\$0.4 billion or 1%, moderately below system as some aggressive pricing in the market was not matched.

¹ Spot loan balances.

² New Zealand comprises our New Zealand retail and business banking operations, WIB New Zealand, Treasury and New Zealand wealth management business.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

Full Year 2012 – Full Year 2011

Total loans as at 30 September 2012 were \$17.8 billion or 4% higher than 30 September 2011. Growth was primarily driven by Australian housing loans which grew \$11.8 billion or 4%.

Key movements included:

- Australian housing loans increased \$11.8 billion or 4%. This growth was in line with the financial system as the Group sought to achieve an appropriate mix between growth and return;
- Australian personal lending increased \$0.7 billion or 4%, reflecting growth in the Auto Finance portfolio;
- Australian business lending increased \$2.6 billion or 2%. Growth occurred in AFS and institutional lending in First Half 2012;
- New Zealand lending increased NZ\$1.8 billion or 3%, with housing loans increasing NZ\$0.9 billion or 3% and business loans increasing NZ\$0.7 billion or 3%; and
- Other overseas loans increased \$1.0 billion or 16%, mostly reflecting strong growth in trade finance in Asia.

Total	394,991	377,458	370,278	5	7

Second Half 2012 – First Half 2012

Total deposits as at 30 September 2012 were \$17.5 billion or 5% higher than 31 March 2012. Total customer deposits were \$27.8 billion or 9% higher while Treasury deposits were \$10.3 billion or 18% lower.

The increase in customer deposits reflects the Group's preference to enhance its funding mix and increase the proportion of lending supported by customer deposits. This has seen the customer deposit to loan ratio increase 440 basis points to 67.6% as at 30 September 2012.

The reduction in Treasury deposits relates to our decision to reduce our reliance on short term wholesale funding given strong customer deposit growth. This led to the decline in Australian certificates of deposit and other overseas deposits.

Key features of the deposit growth were:

- Australian term deposits increased \$9.2 billion or 7%, with growth across all segments;
- Strong at call savings flows from personal customers driving a \$12.7 billion or 9% increase in Australian at call deposits. The RAMS online product contributed \$1.1 billion following its launch in May;

¹ Spot deposit balances.

² New Zealand comprises our New Zealand retail and business banking operations, WIB New Zealand, Treasury and New Zealand wealth management business.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

- Australian non-interest bearing deposits increased \$1.8 billion or 12% as customers increased balances in mortgage offset accounts;
- Australian certificates of deposit declined \$6.3 billion or 16%, reflecting a reduction in our reliance on short term wholesale funding;
- New Zealand deposits increased NZ\$2.6 billion or 6% with the majority of the growth recorded in term deposits; and
- Other overseas deposits declined \$2.3 billion or 9%, reflecting a reduction in the Group's reliance on offshore short term wholesale funding (offshore certificates of deposit).

Full Year 2012 – Full Year 2011

Total deposits as at 30 September 2012 were \$24.7 billion or 7% higher than 30 September 2011. Total customer deposits were \$37.6 billion or 12% higher while Treasury deposits were \$12.9 billion or 21% lower.

Growth in customer deposits exceeded growth in total loans by \$19.7 billion in Full Year 2012 and the deposit to loan ratio increased 510 basis points.

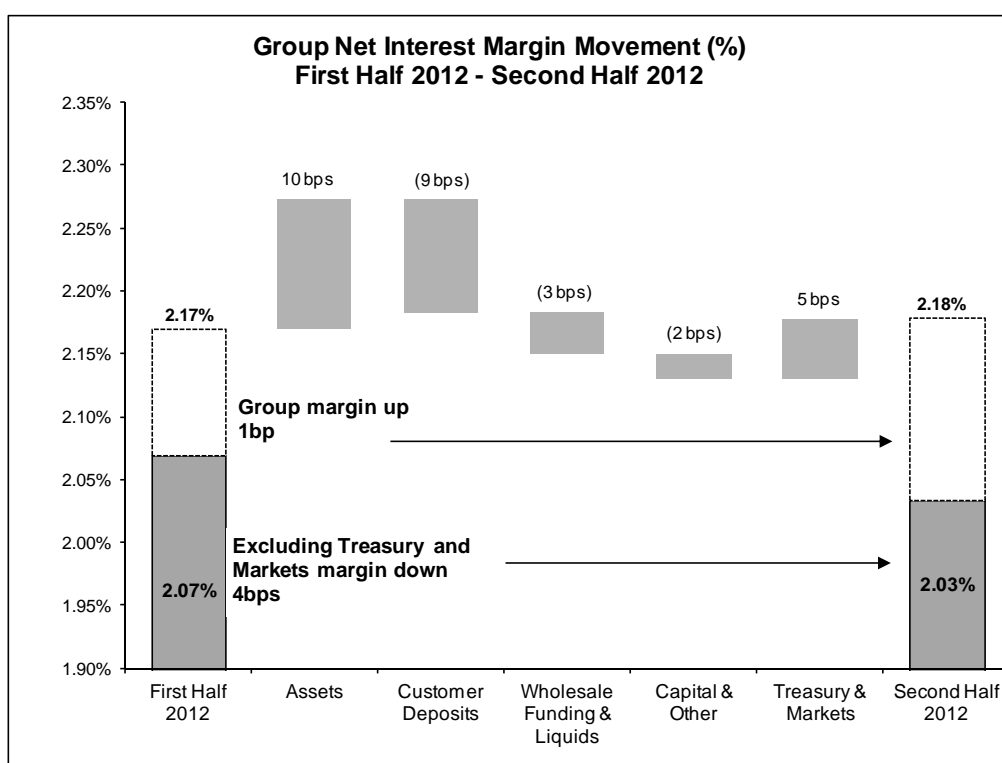

Key movements were:

- Australian term deposits increased \$26.7 billion or 24%, with the Group seeking to improve its funding base by prioritising term deposit growth. Growth was broadly based across all customer segments;
- Australian at call deposits increased \$4.6 billion or 3%, particularly due to customer flows in Second Half 2012;
- Australian non-interest bearing deposits increased \$2.7 billion or 20%, due to increased balances in mortgage offset accounts;
- New Zealand deposits increased NZ\$3.8 billion or 10%, with growth in both at call and term deposits; and
- Other overseas deposits declined \$8.6 billion or 26% and Australian certificates of deposit declined \$4.3 billion or 12% due to reductions in the Group's reliance on short term wholesale funding.

Group net interest margin	2.18%	2.17%	1bps	2.17%	2.22%	(5bps)
Group interest margin excluding Treasury & Markets	2.03%	2.07%	(4bps)	2.05%	2.11%	(6bps)

Second Half 2012 – First Half 2012

Group net interest margin was 2.18% for Second Half 2012, up 1 basis point on First Half 2012.

Net interest margin excluding the contribution from Treasury and Markets was 2.03%, down 4 basis points on First Half 2012. This decrease reflected asset repricing being insufficient to recover increased deposit and wholesale funding costs relative to market rates.

The components of the 4 basis point reduction in margin excluding Treasury and Markets were:

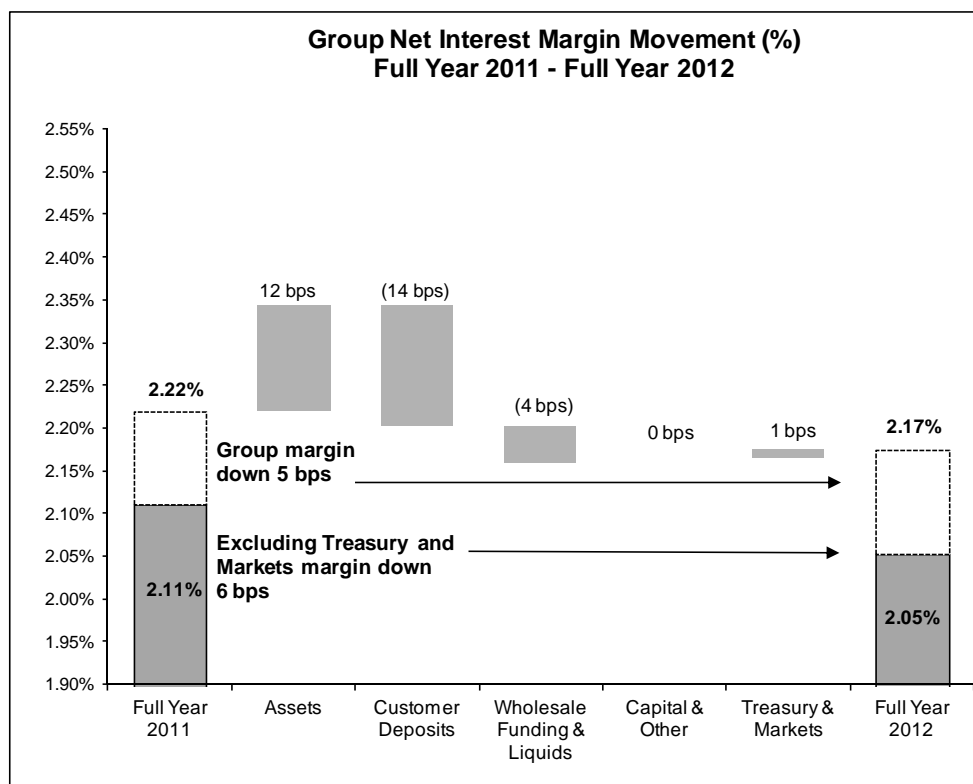

- 10 basis point increase from asset spreads. The increase was attributable to repricing across lending portfolios, particularly mortgages, but also business lending and unsecured consumer lending;
- 9 basis point decline from customer deposit impacts. 7 basis points of the decline was due to spread impacts, reflecting continued intense competition for deposits, particularly term deposits. This 7 basis point decline also included lower hedging benefit on low interest transaction accounts of 1 basis point. Customer preference for lower spread term and online deposits impacted mix reducing the margin by 2 basis points;

¹ Treasury net interest income excludes capital benefit.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

- 3 basis point decline from wholesale funding and liquidity. Wholesale funding costs were higher as the relative cost of new issuance was more expensive than maturing deals. While average funded liquid assets were slightly higher over the second half the impact on margins was small; and
- 2 basis point decline from lower returns on capital balances as interest rates reduced over the half.

Treasury and Markets contributed a 5 basis point improvement to the Group margin as revenue from Treasury management of the liquid asset portfolio and interest rate risk was higher.

Full Year 2012 – Full Year 2011

Group net interest margin was 2.17% for Full Year 2012, a decrease of 5 basis points from Full Year 2011.

Net interest margin excluding the contribution from Treasury and Markets was 2.05%, 6 basis points lower than Full Year 2011, due to funding costs relative to market rates increasing at a faster pace than asset repricing.

The components of the 6 basis point decline in Group margin excluding Treasury and Markets were:

- 12 basis point increase from asset repricing, primarily due to repricing of the housing and business lending portfolios;
- 18 basis point decline from higher retail and wholesale funding costs relative to market rates. This included:
 - 14 basis point decline from customer deposits. 9 basis points reflected the lower spread from intense competition, particularly for term deposits. The 9 basis point decline included a reduction in the benefit from hedging low interest accounts of 2 basis points. Mix impacts reduced margins by 5 basis points, with growth weighted towards lower spread products, particularly term deposits; and
 - 4 basis point decline from wholesale funding costs and the cost of holding increased average liquid asset balances.
- Capital and other impacts were flat with the benefit from higher capital volumes offsetting lower earnings due to falling interest rates.

Contribution from Treasury and Markets income was a benefit of 1 basis point, with increased Treasury interest income offsetting a lower contribution of Markets net interest income. The lower Markets net interest income was due to a change in the composition of income, with more income recognised in non-interest income.

REVIEW OF GROUP
OPERATIONS

3.2.2 Non-Interest Income¹

	Half Year Sept 12	Half Year March 12	% Mov't Mar 12- Sept 12	Full Year Sept 12	Full Year Sept 11	% Mov't Sept 11- Sept 12
\$m						
Fees and commissions	1,321	1,309	1	2,630	2,568	2
Wealth management and insurance income	1,008	801	26	1,809	1,623	11
Trading income	441	406	9	847	558	52
Other income	80	147	(46)	227	205	11
Non-interest income	2,850	2,663	7	5,513	4,954	11

Second Half 2012 – First Half 2012

Non-interest income increased 7% or \$187 million compared to First Half 2012. The increase was driven by higher wealth management and insurance income and an increase in trading income.

Fees and commissions

The \$12 million increase in fees and commissions was primarily driven by:

- Higher facility fees of \$13 million mostly reflecting an increase in business and commercial lending fees of \$27 million following repricing of line fees, offset by lower deposit account fees of \$9 million; and
- Transaction fees and commissions were consistent with the First Half 2012, with higher cards interchange income offset by seasonally lower card reward point redemptions.

Wealth management and insurance income

Wealth management and insurance income increased 26% or \$207 million compared with First Half 2012 with major features:

- Increase in performance fees, mostly in Hastings of \$91 million;
- General Insurance related income increased \$64 million as a result of premium repricing and lower claims as the First Half of the year typically has higher catastrophe claims;
- Life insurance premium income increased \$14 million due to new sales through the expansion of distribution to independent financial advisers through the BT Wrap platform;
- Advice income increased \$15 million reflecting the benefit of increased sales, larger average portfolio sizes and growth in planner numbers;
- J O Hambro contribution was consistent with First Half 2012;
- FUM/FUA related income was flat with the benefit from positive net flows and improved investment markets of 1%, offset by reduced margins. The margin contraction reflected the run-off of higher margin retail products, product mix and competition for flows;
 - Average Group FUM rose \$3.5 billion or 6%, from inflows in Wholesale and Institutional portfolios and an increase in market value of Hastings funds including from corporate activity; and
 - Average Group FUA increased \$3.0 billion, or 4% including positive flows to the Wrap Platforms and Corporate Super portfolios.
- Increase in insurance and funds income in New Zealand.

¹ Refer to Section 5 Note 4 for Reported Results breakdown. Refer to Section 6 Note 4 for Cash Earnings results breakdown. Refer to Section 9 for reconciliation between reported results and Cash Earnings. As discussed in Section 2.4, commentary is reflected on a Cash Earnings basis and does not directly align with reported non-interest income as disclosed in Section 5 Note 4.

Average FUM for the Group ¹	64.6	61.1	6	62.9	52.9	19
Average FUA for the Group ¹	86.4	83.4	4	84.9	82.4	3

Trading

Trading income increased 9% or \$35 million compared to First Half 2012 reflecting improved income in Debt Markets including a lower credit value adjustment (CVA) charge. Foreign exchange income was slightly lower following a relatively strong First Half 2012.

Other income

Other income decreased 46% or \$67 million. Gains on asset sales were lower, with no asset sales in Second Half 2012, compared to the \$46 million gain from the sale of Visa Inc. shares in First Half 2012.

Full Year 2012 – Full Year 2011

Non-interest income increased 11% or \$559 million compared to Full Year 2011 from higher trading and wealth management and insurance income.

Fees and commissions

The \$62 million or 2% increase in fees and commissions was driven by higher facility fees of \$74 million on business and commercial lending fees. Transaction fees and commissions were consistent with Full Year 2011. There was a small decline in merchant fees as average interchange rates reduced in line with changes in the mix of spending by householders.

¹ Average FUM and FUA for the Group for Half Year September 2012 and Half Year March 2012 is based on a six month average. Full Year September 2012 and Full Year September 2011 are based on a twelve month average.

Wealth management and insurance income

Wealth management and insurance income increased 11% or \$186 million primarily driven by:

- Higher performance fees predominantly in Hastings of \$130 million;
- Full year revenue contribution from J O Hambro acquisition of \$73 million;
- General insurance income increased \$57 million as a result of the repricing of premiums, growth in sales through the branch networks and lower claims as Full Year 2011 had significantly higher catastrophe claims;
- Increased life insurance income of \$30 million from increased distribution of life products through BT Wrap platform;
- Lower FUM/FUA related income of \$14 million predominately due to lower margins;
 - Average Group FUM rose \$10.0 billion, or 19% due to the acquisition of J O Hambro contributing \$11.7 billion. Excluding J O Hambro, FUM reduced 3%, with net inflows from Institutional and Wholesale portfolios being offset by lower average investment markets; and
 - Average Group FUA increased \$2.5 billion, or 3% from inflows in the Super portfolios including from the transfer of Westpac staff super into BT Super for Life Corporate.
- LMI income decreased \$36 million due to lower credit demand and as a result of the Group's decision to reduce underwriting risk from June 2009 on the mortgage insurance on loans with a LVR greater than 90%;
- Reduced income in the Equities business of \$17 million due to a reduction in broking volumes and trading revenue; and
- Full Year 2011 also benefited from infrequent items totalling \$33 million not repeated in 2012, including the sale of single manager rights and revaluation gains in Ascalon funds.

Trading

Trading income increased 52% or \$289 million compared to Full Year 2011, driven by increased WIB Markets and Pacific Banking FX income. WIB Markets benefited from volatile market conditions driving customer sales income in foreign exchange and interest rate businesses. Risk management income also increased during Full Year 2012. Markets results are discussed further on page 27.

Other income

Other income increased 11% or \$22 million in Full Year 2012, primarily due to an increase in Technology research and development tax credits.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

Markets Income

	Half Year Sept 12	Half Year March 12	% Mov't Mar 12- Sept 12	Full Year Sept 12	Full Year Sept 11	% Mov't Sept 11- Sept 12
\$m						
Net interest income	70	40	75	110	149	(26)
Non-interest income	330	303	9	633	452	40
Trading income	338	310	9	648	441	47
Other non-interest income	(8)	(7)	(14)	(15)	11	large
Total Markets Income	400	343	17	743	601	24

Second Half 2012 – First Half 2012

Markets income increased \$57 million or 17% compared to First Half 2012. This was mainly driven by an improvement in market risk income and the CVA adjustment was \$24 million lower in Second Half 2012 compared to First Half 2012.

Full Year 2012 – Full Year 2011

Markets income increased \$142 million or 24% compared with Full Year 2011. Increased market volatility saw higher levels of customer activity to manage risk, with increased activity converting to a \$73 million increase in customer sales income. Market risk income also improved, however, this was partially offset by a \$74 million negative movement in the CVA adjustment.

Markets Value at Risk (VaR)¹

Risk taking, as measured by VaR, was lower than previous periods.

Average VaR for Second Half 2012 was \$5.3 million compared to \$8.3 million for First Half 2012 and \$10.2 million for Second Half 2011.

¹ VaR measures the risk of loss using a history of price movements. Therefore, price volatility is a key component of this measure.

3.2.3 Operating Expenses¹

			<i>% Mov't</i>			<i>% Mov't</i>
\$m	Half Year Sept 12	Half Year March 12	Mar 12- Sept 12	Full Year Sept 12	Full Year Sept 11	Sept 11- Sept 12
Salaries and other staff expenses	(2,050)	(2,056)	-	(4,106)	(3,988)	(3)
Equipment and occupancy expenses	(664)	(614)	(8)	(1,278)	(1,111)	(15)
Other expenses	(1,010)	(985)	(3)	(1,995)	(2,007)	1
Total expenses	(3,724)	(3,655)	(2)	(7,379)	(7,106)	(4)

Second Half 2012 – First Half 2012

Total operating expenses increased 2% or \$69 million compared with First Half 2012.

Salaries and other staff expenses

Salaries and other staff expenses were \$6 million lower compared to First Half 2012. The benefits from delivery of productivity programs and lower restructuring costs more than offset the full period impact of average salary increases of 3% applied from January 2012, and continued investment which included increased employees in Bank of Melbourne and WIB's Asian operations.

Equipment and occupancy expenses

Equipment and occupancy costs increased 8% or \$50 million reflecting a 32% increase in software amortisation and impairments, which increased \$48 million to \$200 million in Second Half 2012. The increase primarily reflects the SIPs programs as new systems were delivered and moved into normal business operations. There was a modest expense (\$23 million) from the impairment of assets no longer in use, or replaced by upgraded software.

Refer to page 32 for further detail on capabilities delivered to the business in Second Half 2012.

Other expenses

Total other expenses increased 3% or \$25 million driven by:

- An increase in technology and other information services costs reflecting increased project spend mainly related to productivity, regulatory change and compliance projects; and
- Increased advertising expenses in Second Half 2012, tempered by continued tight management of variable costs and lower credit card reward program costs due to seasonally higher redemptions in First Half 2012.

¹ Refer to Section 5 Note 5 for reported results breakdown. Refer to Section 6 Note 5 for Cash Earnings breakdown. Refer to Section 9 for reconciliation between reported results and Cash Earnings. As discussed in Section 2.4, commentary is on a Cash Earnings basis and does not directly align with reported operating expenses disclosed in Section 5 Note 5.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

Full Year 2012 – Full Year 2011

Operating expenses increased 4% or \$273 million compared to Full Year 2011.

Salaries and other staff expenses

Salaries and other staff expenses increased 3% or \$118 million compared to Full Year 2011, reflecting:

- Average salary increases of 3% and the impact of the J O Hambro acquisition (\$38 million) were partially offset by lower restructuring costs and lower FTE as a result of productivity initiatives. The prior period also benefited from release of excess employee provisions which was not repeated in Full Year 2012; and
- Increased investment in the expansion of Bank of Melbourne, the wealth planner network and WIB's Asia operations as well as higher spend on regulatory change and compliance projects.

Equipment and occupancy expenses

Equipment and occupancy costs increased 15% or \$167 million compared to Full Year 2011. This was primarily driven by:

- Software amortisation, depreciation and impairments increased 24% or \$119 million compared to Full Year 2011 as a result of delivery of strategic programs into normal business operations (BankSmart, Payments and Personal Property Securities Reform), higher depreciation costs associated with the new data centre and Enterprise Perimeter Security SIP and impairment of assets no longer in use, or replaced by upgraded software; and
- Operating lease rentals and other equipment and occupancy costs increased 8% or \$48 million compared to Full Year 2011. The increase was due to cost increases following annual rental reviews and additional expenses associated with expansion of the distribution network. The Westpac Group expanded its footprint with an additional 12 branches, and 42 ATMs.

Other expenses

Other expenses reduced 1% or \$12 million compared to Full Year 2011, due to continued cost management; reduction in variable costs mainly through renegotiation of key vendor contracts, reduced consultant spend, lower travel, advertising and entertainment spend. These more than offset increases in technology and information services from investment spend and contractual rate increases.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

Full Time Equivalent Employees (FTE)

Analysis of movement in FTE	As at 30 Sept 2012	As at 31 March 2012	As at 30 Sept 2011	% Mov't Mar 12- Sept 12	% Mov't Sept 11- Sept 12
Permanent employees	33,418	33,756	33,898	(1)	(1)
Temporary employees	2,257	2,651	3,908	(15)	(42)
Total employees	35,675	36,407	37,806	(2)	(6)
Integration employees	-	-	94	-	(100)
Reported FTE	35,675	36,407	37,712	(2)	(5)
Average reported FTE	36,041	37,060	37,801	(3)	(5)

Second Half 2012 – First Half 2012

Reported FTE decreased 732 (2%) compared to First Half 2012, with the majority of the movements being:

- A net decrease of 636 FTE across Group Services and head office functions from productivity program benefits including new supplier arrangements, partly offset by an increase in FTE to support the delivery of productivity and regulatory change and compliance programs;
- A net decrease of 257 FTE across AFS directly associated with benefits realised from the establishment of the AFS division and delivery of productivity initiatives. Part of these savings were reinvested by expanding the wealth planner network and Bank of Melbourne;
- An increase of 78 FTE in New Zealand Banking mainly to support increases in call centre and loan processing;
- An increase of 61 FTE in WIB attributable to an increased presence in Asia and additional staff to support investment in target segments including natural resources; and
- An increase of 22 FTE in Pacific Banking in customer facing roles.

Full Year 2012 – Full Year 2011

Reported FTE decreased 2,037 (5%) compared to Full Year 2011, with the majority of the movements being:

- A net decrease of 978 FTE across Group Services and head office functions. Productivity program benefits of 1,110 FTE were partly offset by an increase in FTE to support the regulatory change and compliance program;
- A net decrease of 470 FTE as 971 FTE associated with certain services provided by an external supplier have been reclassified, partially offset by a 501 increase in FTE from mortgage processing services being transferred to Westpac from an external supplier.
- A net decrease of 664 FTE across AFS due to benefits realised from the establishment of the AFS division and delivery of productivity program benefits of 858 FTE, partly offset by investment in Bank of Melbourne (124 FTE) as well as additional FTE to support expanded planner network (90 FTE);
- An increase of 44 FTE in WIB directly attributable to increased presence in Asia and additional staff to support investment in target segments including natural resources; and
- An increase of 31 FTE in New Zealand Banking mainly to support projects.

Merger Integration FTE

With the three year merger and integration project being completed in Full Year 2011, there are no longer merger integration related FTE.

Closing Balance	1,551	1,435	1,551	1,303

Second Half 2012 – First Half 2012

Capitalised software balances increased \$116 million to \$1,551 million as at 30 September 2012. The increase comprised \$316 million of additional capitalised expenditure less \$200 million of amortisation and impairment.

The increase in capitalised software was driven by investment in SIPs programs of \$90 million, infrastructure investments of \$39 million, regulatory change and compliance activities of \$58 million, Bank of Melbourne, FX, Security, Card software of \$20 million and a number of smaller projects adding \$109 million (including Asia \$17 million).

Full Year 2012 – Full Year 2011

The capitalised software balance for the Westpac Group increased \$248 million to \$1,551 million as at 30 September 2012. The increase comprised \$603 million of additional capitalised expense less \$352 million of amortisation and impairment.

The increase in capitalised software was driven by investment in SIPs programs of \$220 million, infrastructure investments of \$100 million, regulatory change and compliance activities of \$98 million, Bank of Melbourne, FX, Security, Card software of \$35 million and a large number of smaller projects totalling \$150 million.

¹ Further detail on the SIPs program is on page 32.

² Other includes FX adjustments.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

Strategic Investment Priorities (SIPs)

The Westpac Group remains focused on delivering its Strategic Investment Priorities (SIPs) program, a suite of major investments designed to enhance Westpac's customer interfacing and product systems and strengthen the Group's technology infrastructure.

The current SIPs program involves a number of inter-related programs which are managed individually but controlled centrally. The SIPs programs have also been designed to be modular and of a size that can be managed while generating improved capability, capacity and delivering clear efficiency and revenue benefits. A number of these programs have been successfully completed and the capabilities they have delivered integrated back into our normal operations.

Net expenditure associated with the SIPs program is estimated to be around \$2 billion over approximately five years from 2010.

In Second Half 2012, \$95 million was expensed (including \$65 million in amortisation of previously capitalised expenses) while \$91 million in spend was capitalised. A relatively high portion of expenses incurred during the period were capitalised reflecting the current stage of the investment programs. Amortisation of capitalised expenses typically commences once capabilities have been delivered and are ready for use by the business.

The costs of the SIPs program are being allocated to individual business units based on the recipients of the benefits and capabilities for each program. This approach will typically see Westpac RBB incur much of the SIPs costs, followed by WIB, St.George, and BTFG.

Investment spend \$m	Half Year Sept 12	Half Year March 12	Half Year Sept 11	Half Year March 11	Half Year Sept 10	Half Year March 10	Total to date
Expensed	25	39	59	58	77	100	358
Capitalised software and fixed assets	91	148	220	230	248	82	1,019
Total	116	187	279	288	325	182	1,377

Impact on expenses \$m	Half Year Sept 12	Half Year March 12	Half Year Sept 11	Half Year March 11	Half Year Sept 10	Half Year March 10	Total to date
Direct expenses - investment	25	39	59	58	77	100	358
Operating expenses (net of benefits)	5	9	10	9	-	-	33
Amortisation and depreciation	65	40	24	11	-	-	140
Total	95	88	93	78	77	100	531

Significant benefits and capabilities delivered in Second Half 2012 include:

Branch and contact centre enhancements:

- Successful completion of the Spider@Westpac teller platform roll-out in First Half 2012 continues to provide improved customer experience. Spider@Westpac replaced a 14 year old system. The integrated and more intuitive application has reduced the time it takes to process transactions and the time required for induction training. The system has enabled the removal of cheque deposit slips and improved the cash management of branches; and
- A new integrated call centre desktop application (Unity) has been implemented across all Westpac RBB contact centres. This has resulted in improved productivity and enhanced customer experience with program benefits exceeding expectations. Unity aggregated 46 systems and now our customer facing staff have a single view of a customer's relationship with Westpac. This has reduced the time it takes to resolve customer calls and reduced the need to transfer customers to other teams.

Payments:

- Consolidation of an enterprise-wide payments hub for Westpac's clearing and settlement obligations and a single platform to receive and process high value domestic and international payment instructions; and
- Delivery of the first phase of BPay enhancements improving our procedures and system controls relating to the processing of St.George payments.

Infrastructure:

- Completed the migration of key online platform infrastructure from East Chatswood into the new Western Sydney Data Centre; and
- The initial phases of the virtual security environment migrations are proceeding to plan, with the first migration now complete.

Regulatory Change and Compliance

In Full Year 2012, \$210 million was spent on projects relating to regulatory change and compliance an increase of \$47 million on Full Year 2011. In the wake of the global financial crisis, a raft of regulatory changes are being implemented by governments and regulators globally. These changes are aiming to improve financial stability, strengthen consumer protection and enhance competition. Some changes implemented offshore are seeking to protect tax revenue and support national security.

A number of the projects delivering these changes have moved to implementation phase over the past 12 months, including National Consumer Credit Protection, Personal Properties Securities Reform, Cooper Superannuation Reforms, Future of Financial Advice Reforms (FoFA), Basel III, elements of US Dodd-Frank legislation and OTC Derivatives. Full Year 2012 has seen \$210 million spent on these projects with \$106 million of project spend being expensed and \$104 million being capitalised in Full Year 2012.

Investment spend	Half Year	Half Year	Half Year	Half Year
\$m	Sept 12	March 12	Sept 11	March 11
Expensed	60	46	28	35
Capitalised software and fixed assets	58	46	66	34
Total	118	92	94	69

Significant capabilities delivered in Full Year 2012 include:

- Successful implementation across all brands of system changes addressing responsible lending and credit card requirements under National Consumer Credit Protection;
- Implemented government requirements to make it easier for customers to move their transaction or savings accounts between banks, by facilitating an easy switch of their direct debits and credits to a new bank;
- Enhanced Anti-Money Laundering capability;
- Establishment of a single personal property securities register providing a national view of assets and securities. Security documentation has been simplified to reduce paper and provide the customer with easier to understand legal documents. Registrations will occur directly and more accurately, potentially leading to faster and cheaper settlement and less re-work;
- Implemented changes to enable GST to be charged on the entire amount financed under all hire purchase agreements in compliance with changes to tax legislation;
- Established the infrastructure to improve the settlement of low value payments, to provide better visibility enabling same-day settlement of low value payment obligations;
- Enhanced analytical and assurance capabilities for financial advisers; and
- Enhanced insurance risk management frameworks enabling more accurate measurement, management and pricing of risk resulting in improved risk based decision making, all in line with new regulatory requirements.

OPERATIONS

3.2.4 Impairment Charges

\$m	Half Year Sept 12	Half Year March 12	% Mov't Mar 12- Sept 12	Full Year Sept 12	Full Year Sept 11	% Mov't Sept 11- Sept 12
Individually assessed provisions (IAPs)						
New IAPs	(727)	(715)	(2)	(1,442)	(1,619)	11
Write-backs	208	260	(20)	468	542	(14)
Recoveries	61	43	42	104	60	73
Total IAP, write-backs and recoveries	(458)	(412)	(11)	(870)	(1,017)	14
Collectively assessed provisions (CAPs)						
Write-offs	(397)	(359)	(11)	(756)	(739)	(2)
Other changes in CAPs	251	163	54	414	763	(46)
Total new CAPs	(146)	(196)	26	(342)	24	large
Total impairment charges	(604)	(608)	1	(1,212)	(993)	(22)

While asset quality improved over the year impairment charges in Full Year 2012 were \$219 million higher compared to Full Year 2011. The main reasons for this rise was a \$74 million reduction in write-backs, mostly in WIB, and a net \$124 million movement in economic overlays. In Full Year 2011, economic overlays were reduced by \$107 million while in Full Year 2012 economic overlay provisions increased by \$17 million.

Asset quality has continued to improve as seen by the 31 basis point improvement in the ratio of stressed assets to total committed exposures, to 2.17%, as at 30 September 2012.

New individually assessed provisions were lower, although they have remained relatively high as the work-out of the stressed portfolio continues to see companies downgraded from watchlist and substandard categories of stress into impaired. Some top-up of existing impaired asset provisions, predominately in the First Half 2012 have also been required as security values were reassessed.

The \$17 million increase in the economic overlay in Full Year 2012 principally reflects that some sectors of the economy are seeing early signs of additional stress. These sectors are impacted by structural changes, the continuing high \$A, soft consumer demand and falling commodity prices. This was offset by greater certainty around the impact of the floods and earthquakes of 2011 and reducing stress in the commercial property segment. In total, economic overlays were \$363 million as at 30 September 2012.

Second Half 2012 – First Half 2012

Impairment charges for Second Half 2012 were \$604 million, down \$4 million or 1% compared to First Half 2012 and represented 24 basis points of average gross loans. The economic overlay was increased \$18 million in Second Half 2012.

Key movements included:

- New collectively assessed provisions resulted in a charge of \$146 million in Second Half 2012, \$50 million lower than First Half 2012 principally due to the following:
 - WIB continued to record a benefit for collectively assessed provisions as upgrades and refinancing improved the quality of the portfolio. However, this benefit was \$6 million smaller in Second Half 2012 compared to First Half 2012;
 - Higher new collectively assessed provisions were recorded in both Westpac RBB and St.George business portfolios as the rate of improving stress slowed in the Second Half 2012;
 - Personal lending delinquencies in Second Half 2012 improved in both Westpac RBB and St.George as customers remained cautious and directed more funds to paying down debt. This contributed to a lower collectively assessed provisioning charge, however, higher seasonal direct write-offs particularly in the mortgage portfolio offset this increase; and
 - Asset quality in the New Zealand business and consumer segments continued to improve, leading to a lower impairment charge in Second Half 2012.
- New individually assessed provisions less write-backs and recoveries were \$458 million in Second Half 2012, \$46 million higher compared to First Half 2012 principally due to:
 - Westpac New Zealand experienced an increase in individually assessed provisions with a small number of larger stressed assets becoming impaired, offset partially by higher write-backs;

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

- In both Westpac RBB and St.George new individually assessed provisions were little changed over Second Half 2012 as the level of stressed assets migrating to impaired and the top-up of existing provisions from valuation updates slowed. Write-backs, however, were slightly favourable in Westpac RBB but unfavourable in St.George; and
- This was partially offset by WIB having lower individually assessed provisions as well as fewer write-backs. These write-backs were from work-outs and from the refinancing of some facilities to other parties.

Full Year 2012 – Full Year 2011

The impairment charge for Full Year 2012 was \$1,212 million, up 22% compared to Full Year 2011. The increase was primarily due to higher collectively assessed provisions as the rate of improving asset quality slowed. The higher charge was also due to a \$107 million reduction in economic overlay provisions in Full Year 2011 compared to a small increase (\$17 million) in the economic overlay in Full Year 2012.

Key movements included:

- New collectively assessed provisions were \$366 million higher compared to Full Year 2011 as benefits from improving asset quality were smaller as the recovery slowed. The movement in economic overlay provision also contributed to the rise;
- WIB recorded the largest change in collective provisions from a reduction in upgrades and refinancing from a smaller decrease in watchlist and substandard companies returning to full health. In St.George and New Zealand portfolios the improvement in stressed assets also slowed in Full Year 2012. In Westpac RBB the collective provisioning charge was lower; and
- New individually assessed provisions less write-backs and recoveries were \$147 million lower compared to Full Year 2011 principally due to fewer new impaired assets, particularly in WIB, St.George and New Zealand and much lower write-backs in the WIB portfolio. This was partially offset by higher new individually assessed provisions in Westpac RBB.

3.2.5 Tax Expense

Second Half 2012 – First Half 2012

The effective tax rate of 29.3% in Second Half 2012 decreased compared to First Half 2012 effective tax rate of 30.1%. The lower effective tax rate reflected the benefit from a review of leasehold expenditure and a small reduction in a centrally held provision.

Full Year 2012 – Full Year 2011

The effective tax rate of 29.7% for the Full Year 2012 increased by 0.3% compared to the Full Year 2011 effective tax rate of 29.4%. The effective tax rate increase reflected primarily the release of provisions no longer required in Full Year 2012 being lower than Full Year 2011.

3.2.6 Non-Controlling Interests

The non-controlling interests primarily represents distributions on hybrid equity instruments 2003 TPS¹ and 2006 TPS¹, as well as other non-controlling interests, including the 35.5% of BTIM that Westpac does not own.

Non-controlling interests of \$69 million for Full Year 2012 were \$1 million higher than Full Year 2011 and decreased \$1 million from First Half 2012.

¹ Non-controlling interests include distributions on 2003 TPS and 2006 TPS:

- There are 750,000 2003 TPS issued in the United States of America at US\$1,000 each on 13 August 2003, with non-cumulative semi-annual distributions (31 March and 30 September) in arrears at the annual rate of 5.819% up to but excluding 30 September 2013. From, and including, 30 September 2013 the 2003 TPS will pay non-cumulative quarterly distributions (31 December, 31 March, 30 June and 30 September) payable in arrears at a floating rate of LIBOR plus 2.05% per year; and
- Westpac TPS Trust issued 7,627,375 2006 TPS in Australia at \$100 each on 21 June 2006. The 2006 TPS are preferred units in the Westpac TPS Trust, with non-cumulative floating rate distributions which are expected to be fully franked. Westpac TPS Trust also issued one ordinary unit with an issue price of \$100 to Westpac. Westpac, as holder of the ordinary unit, is entitled to any residual income or assets of the Westpac TPS Trust not distributed to holders of 2006 TPS. The 2006 TPS are scheduled to pay quarterly distributions (30 September, 31 December, 31 March and 30 June) in arrears, subject to certain conditions being satisfied. The distribution rate on 2006 TPS, until 30 June 2016 (the step-up date) is calculated as the Australian 90 day bank bill rate plus 1% per annum (the initial margin), together multiplied by one minus the Australian corporate tax rate (30% during all periods presented.) After the step-up date, the initial margin will increase by a one-time step-up of 1% per annum.

3.3 Credit Quality

Asset quality has continued to improve over Full Year 2012, with a reduction in portfolio stress, improving consumer delinquencies and a decline in the emergence of new stress. Key measures include:

- The ratio of stressed assets to total committed exposures has continued to fall;
- Continued upgrades of facilities moving out of stress and back to performing;
- Resolution has been reached on a number of impaired loans, which has involved some write-backs; and
- Seasonal delinquency peaks in Full Year 2012 have been lower than in prior corresponding periods.

While asset quality has improved, the rate of improvement has slowed through the year as the softening in some sectors of the economy impacted by the continued strength of the \$A and ongoing consumer caution contributed to a small rise in stress in these sectors.

Stressed assets as a proportion of total committed exposures were 2.17% at 30 September 2012, down from 2.26% at 31 March 2012 and 2.48% at 30 September 2011. The decline in the proportion of stressed assets has been principally due to a fall in watchlist and substandard facilities with that ratio declining 21 basis points to 1.24% (see 3.3.1 Credit Quality Key Metrics). While credit quality trends are positive, the overall level of stress remains high relative to long term averages and the work-out of impaired and problem facilities is expected to take some time.

Importantly, new and increased impaired assets peaked in 2009 and have been declining each half however they were moderately higher in Second Half 2012.

The strengthening in asset quality can be traced back to the improvement in the operating environment since 2009, the de-gearing of household and business balance sheets, the cautious behaviour of consumers and the intensive management of the portfolio over the year.

Impaired assets declined slightly over Full Year 2012 and declined as a proportion of total committed exposures by 4 basis points. Commercial property remains the most prominent category within impaired assets and while some stability has returned to this sector, valuations remain under pressure in some regions and impaired assets remain high as the work-out of previously impaired assets continues.

The health of the consumer segment remains strong with prepayment levels increasing as this segment has maintained its cautious bias. As a result, delinquencies have reduced over Full Year 2012 and the usual seasonal peaks in delinquencies were less pronounced during Full Year 2012. This, however, is having an adverse impact on businesses which rely on consumer spending and confidence.

Portfolio segments

The institutional and corporate segment continued to perform well. This segment has seen further improvements in balance sheet strength over the year with gearing further reduced. Stressed assets continued to decline, with the work-out of a number of impaired facilities, while watchlist assets also fell as a number of facilities returned to performing. The rate of improvement has however slowed over Full Year 2012 relative to recent years. Full Year 2012 has continued to see high write-backs, with around \$193 million received from the institutional and corporate segment, although these were less than in Full Year 2011.

The commercial property segment continues to be the sector under the most stress although the trends in the portfolio are generally positive. In particular, the proportion of the property portfolio identified as stressed has declined from 11.7% at 30 September 2011 to 7.7% at 30 September 2012. This decline has been due to some liquidity returning to the property market for cash flow generating assets, allowing for the work-out of existing stressed facilities, some upgrades and a reduction in the incidence of new property stress. There were only two new large (>\$50 million) impaired facilities that emerged during Second Half 2012.

The small and medium business portfolio has performed well over the year although it is beginning to recognise additional stress. Stress started to emerge in sectors impacted by the high \$A and weak discretionary consumer spending and sectors undergoing structural change such as the retail, trade and manufacturing segments.

Credit quality in the consumer sector has remained strong. General consumer caution, a reduced appetite for debt and high repayment levels have combined with low unemployment and lower interest rates to improve this sector's health.

Overall, 90+ day mortgage delinquencies declined 4 basis points since 30 September 2011 to 0.51% and declined 4 basis points from 31 March 2012. New Zealand has seen the greatest improvement with delinquencies declining 20 basis points to 0.40% from 30 September 2011.

Low doc lending represents around 6% of the portfolio and has a much higher delinquency profile, with delinquencies two to three times the portfolio average. However, because of the more conservative underwriting standards, including not writing loans with an LVR greater than 80%, realised low doc losses are small.

Queensland delinquencies are around 50% higher than the portfolio average reflecting the more challenging conditions in that State.

Australian properties in possession were modest at 289. The level has fallen over Full Year 2012 as clearance rates improved and delinquencies declined. Realised mortgage losses in Australia were \$94 million for Full Year 2012.

The New Zealand economy has continued to show signs of improved momentum evidenced by a reduction in stressed assets and improving delinquencies, particularly mortgages. This has led to declining impairment charges. The stressed business portfolio represents 3.17% of exposures (down 21 basis points) and in the consumer segment, 90+ day delinquencies are lower in both mortgages (down 20 basis points) and in other consumer lending (down 8 basis points) since 30 September 2011.

Provisioning

Westpac has maintained strong provisioning coverage with:

- The ratio of impaired asset provisions to total impaired assets at 37%; and
- The ratio of collectively assessed provisions to credit risk weighted assets at 1.13% This ratio has eased from 1.26% at 30 September 2011 but remains strong as provisions have moderated in line with reducing stress.

Total provisions were \$4,241 million with individually assessed provisions of \$1,470 million and collectively assessed provisions of \$2,771 million. Individually assessed provisions were slightly higher over the year, as the new individually assessed provisions were higher than the provision write-off of \$952 million as facilities were worked out.

Collectively assessed provisions also include an economic overlay of \$363 million, which was increased by \$17 million in Full Year 2012. The composition of the overlay changed over the year with greater certainty around the impact of the floods and earthquakes of 2011 and utilisation of provisions in the commercial property segment. These declines were offset by an increase in the economic overlay for some sectors of the economy seeing emerging signs of stress. These sectors are being impacted by structural changes in the economy, the high \$A, soft consumer demand and falling commodity prices.

Second Half 2012 – First Half 2012

Significant movements during the half included:

Assets

- Cash and balances with central banks increased \$1.1 billion due to higher holdings of liquid assets;
- Receivables due from other financial institutions increased \$3.6 billion mainly attributable to higher collateral posted with counterparties as a result of derivative movements;
- Trading securities, other financial assets designated at fair value and available-for-sale securities increased by \$2.6 billion due to increased securities trading activity in WIB;
- Derivative assets increased \$4.8 billion, primarily driven by strong customer flows and interest rate movements during the Second Half; and
- Loans grew \$8.3 billion or 2%, with the majority of the increase in Australian housing loans. Refer to Section 3.2.1 Loans for further information on loans movements.

Liabilities

- Deposits increased \$17.5 billion. Refer to Section 3.2.1 Deposits for further information on deposits movements;
- Trading liabilities and other financial liabilities designated at fair value increased \$3.8 billion due to increased securities trading activity in WIB;

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

- Derivative liabilities increased \$7.6 billion primarily driven by strong customer flows and interest rate movements during Second Half 2012;
- Debt issues and acceptances decreased \$9.7 billion primarily due to a reduction in short term wholesale funding outstandings and the impact of the appreciation in the Australian dollar during the year. Within this category, covered bonds on issue now total \$12.0 billion at 30 September 2012. Refer to Section 3.4.2 Funding and Liquidity Risk Management for further information on debt programs and funding; and
- Loan capital increased \$1.2 billion, due to the issuance of new subordinated debt.

Equity

The \$1.3 billion increase in equity was due to an increase in net retained profits after payment of the interim dividend and the issuance of shares to satisfy the dividend reinvestment plan.

Full Year 2012 – Full Year 2011

Significant movements during the year included:

Assets

- Cash and balances with central banks decreased \$3.7 billion due to lower holdings of this form of liquid assets;
- Receivables due from other financial institutions increased \$1.7 billion. The majority of this increase was attributable to higher collateral posted with counterparties;
- Trading securities, other financial assets designated at fair value and available-for-sale securities increased by \$2.7 billion due to increased securities trading activity in WIB;
- Derivative assets decreased \$13.7 billion due to the impact on foreign exchange forwards and swaps of the Australian dollar strengthening against the US dollar and other major currencies; and
- Loans grew \$17.8 billion or 4%. Refer to Section 3.2.1 Loans for further information on loans movements.

Liabilities

- Payables due to other financial institutions decreased \$6.9 billion, primarily due to a decrease in collateral balances received from counterparties in relation to derivatives;
- Deposits increased \$24.7 billion. Refer to Section 3.2.1 Deposits for further information on deposit movements;
- Debt issues and acceptances decreased \$18.1 billion. This decline was due to a reduced need for short term wholesale funding, given the strong growth in customer deposits along with the impact of the appreciation in the Australian dollar during the year on foreign currency denominated debt. Refer to Section 3.4.2 Funding and Liquidity Risk Management for further information on debt programs and funding; and
- Loan capital increased \$1.4 billion due to the issuance of a new hybrid, Westpac CPS, and issuance of new subordinated debt. This was partially offset by maturing subordinated debt and the impact of the appreciation in the Australian dollar during the year.

Equity

Equity attributable to owners of Westpac Banking Corporation increased \$2.4 billion. This increase was due to an increase in net retained profits after the payment of dividends and the issuance of shares to satisfy the dividend reinvestment plan.

3.4.2 Funding and Liquidity Risk Management

The Westpac Group has a robust liquidity risk management framework to ensure its ability to meet cash flow obligations under a wide range of market conditions, including name-specific and market-wide stress scenarios.

Liquidity risk is the risk that the Group is not able to fund increases in assets or meet its payment obligations as they become due, without incurring unacceptable losses. This could potentially arise as a result of mismatched cash flows generated by the Group's banking business. This risk is not specific to the Westpac Group, but inherent in all banks through their role as intermediaries between depositors and borrowers. On 16 November 2011, Australian Prudential Regulation Authority (APRA) released a Discussion Paper "Implementing Basel III Liquidity Reforms in Australia" and draft "Prudential Standard APS 210: Liquidity". APRA outlined the proposed implementation and timeframes of the Basel III liquidity framework in Australia which included meeting the Liquidity Coverage Ratio (LCR) by 1 January 2015 and the Net Stable Funding Ratio (NSFR) by 1 January 2018. The Reserve Bank of Australia (RBA) concurrently issued a press release regarding the Committed Liquidity Facility (CLF). The CLF provides a pathway for Australian banks to meet the requirements of the LCR by allowing access to a pre-specified amount of liquidity through repurchase agreements of eligible securities outside the RBA's normal market operations.

A number of important details regarding APRA's draft APS 210 and the RBA's CLF are yet to be finalised; as such, the potential impact on the composition and size of the Group's liquid asset portfolio, and the impacts on the liquidity risk management framework, are yet to be confirmed. Final details, subject to consultation periods, are expected towards the end of 2012 through to 2014.

Westpac's liquid asset portfolio provides a source of reserve liquidity as eligible collateral under the Central Bank repurchase agreement facility and CLF. Unencumbered liquid assets of \$110 billion at 30 September 2012 comprised of:

- \$42 billion of cash and balances on deposit at Central Banks, Government and semi-Government bonds;
- \$25 billion of repo-eligible private securities and Government Guaranteed bonds; and
- \$43 billion of self-originated AAA rated mortgage backed securities, which in extraordinary circumstances are eligible for repurchase with the RBA or the Reserve Bank of New Zealand (RBNZ).

As at 30 September 2012, the Group held sufficient liquid assets to cover all short term wholesale debt outstanding and all wholesale debt maturities for over 16 months.

The Westpac Group monitors the composition and stability of its funding base to ensure it remains appropriately within the Group's funding risk appetite. This includes a target stable funding ratio (SFR) greater than 75%. Stable funding includes customer deposits, wholesale term funding including securitisation with residual contractual maturity greater than 12 months and equity. The Group aims to fund all new lending through these stable funding sources.

Over the year, the Group has significantly improved its overall funding profile. At 30 September 2012, the Group's SFR was 83%, up 6 percentage points from 77% at 30 September 2011. This was largely the result of the Group's strong focus during the year on attracting and retaining customer deposits. Customer deposits as a percentage of total funding rose 6 percentage points over the year to 58%. A further 16% of the Group's total funding came from wholesale funding with a residual maturity greater than 12 months with an additional 2% sourced from securitisation and 7% from equity.

The improvement in the Group's SFR was also due to a reduction in short term wholesale funding, which was down 5 percentage points over the year to 13% of total funding. This was largely the result of the Group reducing its issuance of short term debt, as well as some impact from foreign exchange movements on offshore short term wholesale funding.

The Group's deposit to loan ratio increased to 67.6%, up 510 basis points on 30 September 2011. This reflects the trend of recent periods of loan growth being more than fully funded by customer deposits, with the Group's customer deposits increasing \$37.6 billion over the year and net loans increasing \$17.8 billion.

Despite challenging conditions for much of the year, the Group continued to access longer term wholesale funding markets, supported by its high credit rating, well timed and executed transactions and ongoing investor contact. The Group issued in a broad range of formats and currencies, including Tier 1 capital, subordinated notes, senior unsecured debt and secured debt, both domestically and offshore. The Group also issued its inaugural Australian covered bond in December 2011 and in total completed \$10.7 billion of covered bond issuance during the year. In aggregate, the Group issued \$32 billion of new term debt during 2012 plus a further \$1.2 billion in Tier 1 capital, with a weighted average maturity of 4.3 years (excluding securitisation). This was ahead of its 2012 term maturities and positions the Group well for 2013.

FULL YEAR RESULTS 2012

¹ Refer to Section 5 Note 22 for a detailed analysis of the funding view of the balance sheet. Liquid assets are defined as assets that are eligible for re-purchase agreements with the Reserve Bank.

² Liquid assets in net loans include internally securitised assets that are eligible for repurchase agreements with the Reserve Bank.

3.5 Capital and Dividends

Basel II	As at 30 Sept 2012	As at 31 March 2012	As at 30 Sept 2011
Common equity capital ratio	8.4%	8.0%	8.1%
Tier 1 capital ratio	10.3%	9.8%	9.7%
Total regulatory capital ratio	11.7%	10.8%	11.0%
Risk w eighted assets (RWA)	297,901	300,046	279,961

Tier 1 Capital Ratio Movement for the Second Half 2012

The Westpac Group's Tier 1 capital ratio of 10.25% at 30 September 2012 was 44 basis points higher than the 31 March 2012 Tier 1 ratio. The increase in the ratio reflected organic capital generation and lower market related RWA.

The key drivers of the increase in Tier 1 ratio over the period included:

- Second Half 2012 Cash Earnings of \$3.4 billion (114 basis point increase);
- Dividends payable, net of Dividend Reinvestment Plan (DRP)¹ (69 basis point decrease);
- RWA reduced by 1% (7 basis points increase) reflecting lower RWA for market risk, from reduced exposure to A\$ interest rates; and lower IRRBB following an increase in embedded gain because interest rates fell. The small increase in credit RWA mostly related to changes in the measurement of off-balance sheet exposures, while operational risk RWA increased reflecting the finalisation of the new operational risk capital model; and
- Other movement is mainly due to Cash Earnings adjustments (refer to page 5 for details) (9 basis point decrease) and other minor capital movements (1 basis point increase).

Redemption of \$1.3 billion of Tier 2 subordinated debt was replaced by \$2.5 billion of new issuance in August 2012, resulting in an 86 basis point increase in Westpac's total regulatory capital ratio during Second Half 2012.

¹ DRP is calculated as the estimated DRP for the 2012 final dividend, and the difference between actual and estimated DRP for the 2012 interim dividend.

Tier 1 Capital Ratio Movement for the full year ended 30 September 2012

The Westpac Group's Tier 1 capital ratio of 10.25% at 30 September 2012 was 57 basis points higher than the 30 September 2011 Tier 1 ratio. This reflected organic capital generation and new capital issuance exceeding the impact of Basel 2.5 implementation and growth in RWA. It is important to highlight that the capital ratios have been measured using the new Basel 2.5 standards introduced 1 January 2012. These standards principally involved changes in risk weighted assets applied to market risk and securitisation. These changes had a negative impact on capital ratios of 34 basis points and 4 basis points respectively. Accordingly, capital ratios for the full year should only be compared after considering the 38 basis point impact.

Outside the Basel 2.5 changes, the key drivers of the increase in the Tier 1 ratio over the period included:

- Full Year 2012 Cash Earnings of \$6.6 billion (221 basis point increase);
- Dividends payable, net of DRP¹ (139 basis point decrease);
- RWA growth reflected the implementation of a new operational risk capital model (23 basis point decrease); credit risk growth mainly related to the measurement of off-balance sheet exposures (29 basis point decrease); lower market risk RWA following reduced exposure to A\$ interest rates and higher embedded gain saw IRRBB reduce (27 basis point increase); and other asset risk RWA (5 basis point increase);
- The issuance of \$1.2 billion of Tier 1 hybrid capital (39 basis point increase);
- The recognition of the 2012 component of St. George merger tax consolidation benefit (9 basis point increase);
- Other movement primarily due to Cash Earnings adjustments (refer to page 5 for details) (16 basis point decrease) and other capital movements (1 basis point increase).

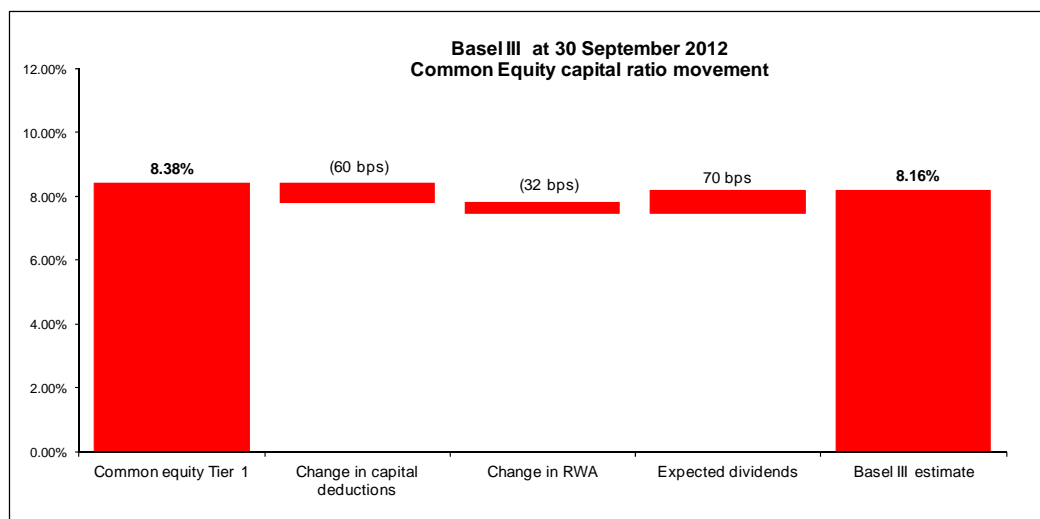

Westpac redeemed \$2.6 billion of Tier 2 subordinated debt, which were replaced by new issuance of \$3.0 billion during the year which contributed to an increase of 61 basis points in the total regulatory capital ratio for the Full Year 2012.

¹ DRP is calculated as the estimated DRP for the 2012 final dividend and the difference between actual and estimated DRPs for the 2011 final and 2012 interim dividends.

Basel III

On 28 September 2012, the Australian Prudential Regulation Authority (APRA) released new prudential standards for capital, which come into effect from 1 January 2013. These standards adopt the Basel Committee on Banking Supervision (BCBS) reforms, commonly known as Basel III, to the Australian Financial System. The chart below shows our estimated impact of the new rules on the Group's common equity Tier 1 ratio.

APRA has confirmed it will continue with many of the national discretions currently applied under the current framework and as such capital ratios calculated under APRA's standards are not directly comparable to those calculated under BCBS standards.

In moving to APRA's Basel III standards the following changes to capital ratios will be applied:

- capital deductions, where deductions previously applied to Tier 1 and Tier 2 capital on a 50/50 basis, and equity investments previously subject to thresholds, are now a 100% deduction against common equity;
- the addition of two elements to RWA. The first element is a credit capital charge, known as the Credit Valuation Adjustment (CVA) and represents counterparty default risk. The charge is applied to credit derivative exposures and increases RWA. The second element is a credit multiplier, known as Asset Value correlation (AVC), which reflects the interconnected nature of financial firms. The multiplier is applied to Bank exposures and increases RWA; and
- future expected dividend payments, previously deducted from capital on an accrual basis, are now deducted when declared.

Westpac's preferred range for the common equity Tier 1 ratio calculated according to APRA's Basel III prudential standards is 8-8.5%. Our range takes the following into consideration:

- regulatory minimums and capital conservation buffer;
- APRA's proposed standards governing the capitalisation of financial conglomerates and insurance businesses, which we expect to have a modest effect;
- stress testing to maintain an appropriate buffer in a downturn; and
- quarterly volatility of capital ratios under Basel III associated with dividend payments.

The key differences between Australian implementation of new capital requirements and the BCBS standards are:

- the treatment of deferred tax assets, investments in non-consolidated financial institutions, non-consolidated subsidiaries (NCS), equity investments in commercial entities held in the banking book and underwriting positions held more than 5 business days;
- the mortgage risk weights are based on different parameters; and
- APRA applies a RWA requirement for interest rate risk in the banking book, which is currently not considered under BCBS Basel III requirements.

These differences mean that Westpac's common equity Tier 1 ratio would be higher if assessed using the BCBS standards. Our best estimate is that application of the fully harmonised Basel III standard would add 247 basis points to Westpac's Common equity Tier 1 ratio. That would see our ratio at 10.63% at 30 September 2012.

Total non-credit				52,802	45,104	17
(% of total RWA)				18%	16%	
Total	514,445	496,609	4	297,901	279,961	6

The Westpac Group's RWA increased by 6% during the year. Of the 6% increase in RWA, \$11.6 billion increase or 4% was due to the implementation of Basel 2.5 rules which added \$1.2 billion to RWA associated with securitisation conduits (included in business off-balance sheet assets) and added \$10.4 billion to RWA associated with market risk (because the VaR used to calculate RWA is based on a stressed VaR).

Other movements in RWA were driven by the following factors:

- Credit RWA rose 4%, due to changes in the treatment of undrawn commitments arising from the annual update of our credit risk models (Consumer and Business off-balance sheet); and increase in Business off-balance sheet RWA arising from derivatives;
- Equity risk fell 16% due to equity divestments;
- Market risk decreased due to a reduction in exposure to \$A interest rates;
- Operational RWA rose 36% following the implementation of a new Group operational risk capital model;
- IRRBB fell 13% predominantly due to higher embedded gain associated from lower interest rates; and
- Other assets RWA fell 34% due a change in the treatment of accrued interest.

¹ Pacific Banking's RWA are classified as consumer. RWA in Pacific Banking are calculated using the Standardised approach.

OPERATIONS

Capital Deduction for Regulatory Expected Credit Loss

For capital adequacy purposes, APRA requires the amount of Basel II expected credit losses in excess of eligible provisions to be deducted from capital. The following table shows how the deduction is calculated. In applying the capital deduction, 50% is deducted from Tier 1 capital and 50% is deducted from Tier 2 capital.

\$m	As at 30 Sept 2012	As at 31 March 2012	As at 30 Sept 2011
Provisions associated with eligible portfolios			
Total provisions for impairment charges (Section 5 Note 11)	4,241	4,391	4,414
plus general reserve for credit losses adjustment	131	119	38
plus provisions associated with partial write-offs	706	699	559
less ineligible provisions ¹	(150)	(152)	(168)
less certain deferred tax assets	(708)	(731)	(746)
Total eligible provisions	4,220	4,326	4,097
Regulatory expected downturn loss²	5,758	5,944	5,877
Capital deduction in provisions for regulatory expected downturn loss	(1,538)	(1,618)	(1,780)
Deducted from Capital as follows:			
Tier 1 reduction	(769)	(809)	(890)
Tier 2 reduction	(769)	(809)	(890)

The capital deduction for regulatory expected downturn loss has decreased as a result of:

- Total provisions for impairment charges have moderated in line with reducing stress particularly in the commercial property segment; and
- Decreased regulatory expected loss primarily reflecting lower early stage delinquencies in the residential mortgage portfolio;
- This has been slightly offset by a higher general reserve for credit losses from relatively longer-dated lending.

¹ Provisions associated with portfolios subject to the Basel standardised approach to credit risk are not eligible.

² Regulatory expected loss is calculated for portfolios subject to the Basel advanced IRB approach to credit risk. The comparison between regulatory expected loss and eligible provisions is performed separately for defaulted and non-defaulted exposures.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

Dividends

Ordinary dividend (cents per share)	As at 30 Sept 2012	As at 31 March 2012	Full Year 30 Sept 2012	Full Year 30 Sept 2011
Interim (fully franked)	-	82	82	76
Final (fully franked) - determined dividend	84	-	84	80
Total ordinary dividend	84	82	166	156

The Directors have declared a fully franked final dividend of 84 cents per share, an increase of 4 cents per share or 5% over the 2011 final dividend. Total dividends for the year of 166 cents per share represents an increase of 10 cents or 6% over the total dividends for the Full Year 2011.

The final dividend represents a payout ratio of 76% on a Cash Earnings basis for Second Half 2012. The Full Year dividend of 166 cents represents a payout ratio of 77%.

The Group's ability to continue to frank dividends remains very strong, with our adjusted franking account balance after allowing for the reduction in franking credits for the 2012 final dividend, at \$1,029 million as at 30 September 2012.

The Group has also applied New Zealand imputation credits to the dividend of 8 cents (NZ) per share. New Zealand imputation credits can be utilised by shareholders that are also New Zealand tax payers.

Dividend Reinvestment Plan (DRP)

The Board has determined to satisfy the DRP for the 2012 final dividend via the issuance of new shares.

The Board has also determined that in relation to the 2012 final dividend, the market price at which new shares will be issued under the DRP will not include a discount. The pricing period for setting the market price will be the 10 trading days commencing 19 November 2012.

Common Equity Activity during Full Year 2012

With the exception of issuing ordinary shares to satisfy the DRP and employee share plans, there was no further equity issuance during Full Year 2012.

Residual Tier 1 Capital

As at 30 September 2012, Westpac had \$5.6 billion of Residual Tier 1 capital instruments on issue.

On 23 March 2012, Westpac raised \$1.2 billion of hybrid Tier 1 capital through the issue of 11,893,605 Westpac Convertible Preference Shares (Westpac CPS) at \$100 each.

There were no redemptions of Residual Tier 1 capital instruments during the year. Total Residual Tier 1 capital represents 18% of net Tier 1 capital at 30 September 2012.

Exchange Rate Risk on Future NZ\$ Earnings

Westpac's policy in relation to the hedging of the future earnings of our New Zealand retail business is to manage the economic risk where Westpac believes there is a strong likelihood of significant adverse movements to the A\$/NZ\$ exchange rate. Westpac manages these flows over a time horizon under which up to 100% of the expected earnings for the following twelve months and 50% of the expected earnings for the subsequent twelve months can be hedged. Hedges are executed on a pre-tax basis.

3.6 Other Significant Developments

Commencement of new Chairman

On 14 December 2011, Lindsay Maxsted became Chairman of Westpac Banking Corporation following the retirement of Ted Evans AC. Mr Maxsted joined the Board in 2008 as an independent Director and Chairman of the Audit Committee.

New organisational structure

On 24 November 2011 Westpac announced a new organisational structure for the Westpac Group creating two new divisions:

- AFS which encompasses Westpac RBB, St.George, BTFG, and Banking Products and Risk Management; and
- Group Services encompassing Technology, Banking Operations, Property Services and Legal.

Consolidation of office space in Sydney and Melbourne

On 22 June 2012 Westpac announced that it had committed to a long-term lease at Sydney's Barangaroo development, which is expected to be completed in 2015. Westpac will lease approximately 60,000 square metres at Barangaroo. The developer, Lend Lease, has also agreed to purchase two Westpac-owned buildings at 182 George Street and 33-35 Pitt Street. Once completed, it is expected that the new site will enable the Group to consolidate into two locations in the Sydney CBD – its existing head office at 275 Kent Street and Barangaroo.

On 9 December 2011 Westpac announced that it had committed to consolidate its Melbourne city office space from 360 and 367 Collins Street to a new building at 150 Collins Street, a joint development by APN Property Group and Grocon.

Liquidity

On 16 December 2010, the Basel Committee on Banking Supervision (BCBS) released the final text of the Basel III liquidity framework. The framework introduces two new liquidity measures; the Liquidity Coverage Ratio (LCR) and the Net Stable Funding Ratio (NSFR).

The LCR requires banks to hold sufficient high-quality liquid assets, as defined, to withstand 30 days under an acute stress scenario. Since there are insufficient Government bonds available in the Australian marketplace to allow institutions to meet the LCR, the Reserve Bank of Australia (RBA) has announced, jointly with the Australian Prudential Regulation Authority (APRA), that it will make available to Australian institutions a committed secured liquidity facility that can be used to meet the LCR requirement.

The timetable for implementing the liquidity standard schedules the LCR to be introduced from 1 January 2015 and the NSFR from 1 January 2018. Both liquidity measures are subject to an observation and review period prior to implementation and as such are potentially subject to modification.

In November 2011, APRA released for consultation a discussion paper outlining its proposed implementation of the Basel III liquidity reforms in Australia. However, until the final Australian standards are released, the full extent of the impact on the Westpac Group is uncertain.

Capital

On 16 December 2010, the BCBS released the final text of the Basel III capital framework. The framework was revised in June 2011 and incorporates higher global minimum capital requirements and the introduction of two new capital buffers. The framework includes:

- an increase in the minimum common equity requirement from 2.0% to 4.5%;
- an increase in the minimum Tier 1 capital requirement from 4.0% to 6.0%;
- a capital conservation buffer at 2.5%, to be met with common equity; and
- a countercyclical buffer of between 0% to 2.5% to be met with common equity or other fully loss absorbing capital (subject to further BCBS guidance). The buffer is intended to be applied during times of excess credit growth.

The framework includes a compliance timetable, with phase-in arrangements starting from 1 January 2013 and some elements not becoming fully effective until 1 January 2019.

On 28 September 2012, APRA released the four final revised capital adequacy standards that will govern the implementation of the Basel III capital framework in Australia. APRA is requiring Australian ADIs to meet the new minimum capital requirements from 1 January 2013 and has proposed that the capital conservation buffer apply in full from its introduction date of 1 January 2016. Westpac believes it is well placed to meet the new capital requirements within the timeframes proposed.

Westpac Convertible Preference Shares

On 23 March 2012, Westpac issued approximately \$1.19 billion of new Tier 1 hybrid securities known as Westpac Convertible Preference Shares (Westpac CPS), which qualify as Non-innovative Residual Tier 1 capital of Westpac for regulatory capital purposes. Westpac CPS will also be eligible for transitional treatment as Additional Tier 1 capital under APRA's Basel III capital adequacy framework.

Credit ratings

On 1 December 2011, Standard & Poor's announced that, following changes to its criteria for assessing bank credit ratings globally, the ratings of the major Australian banks, including Westpac, were lowered by one notch. As a result, Westpac's long-term, senior unsecured credit rating was assessed as AA- down from AA. The outlook for the rating is stable. Westpac's short term credit rating was affirmed at A1+.

On 24 February 2012, Fitch Ratings advised that Westpac, along with the other major Australian banks, had its long-term senior unsecured issuer default rating downgraded to AA- down from AA. The outlook for the rating is stable. Westpac's short-term issuer default rating was affirmed at F1+.

Systemically Important Financial Institutions (SIFI)

In November 2011, the BCBS published 'Global systemically important banks: Assessment methodology and the additional loss absorbency requirement'. This document announced the final methodology for determining Global Systemically Important Banks (G-SIBs), and the Financial Stability Board (FSB) named 29 G-SIBs that would be subject to higher capital requirements and greater oversight. No Australian bank has been named as a G-SIB based on the current methodology and data.

The G20 also directed the FSB to consider how to extend the framework to a broader set of SIFIs, including Domestic Systemically Important Banks (D-SIBs), and to make recommendations to the G20. On 12 October 2012, the BCBS issued the paper 'A framework for dealing with domestic systemically important banks'. The paper sets out a principles based framework for regulating D-SIBs. However, until APRA develops the rules for implementing the framework in Australia, any impact on Westpac cannot be determined.

Recovery and resolution planning

In November 2011, the FSB finalised a comprehensive package of policy measures to improve the capacity of authorities to resolve failing SIFIs, without systemic disruption and without exposing taxpayers to risk of loss. As part of the package, a Recovery and Resolution Plan is required for any firm deemed by its home authority to have systemic importance to the domestic economy. In addition, SIFIs will be subject to resolvability assessments to ensure they may be resolved without severe systemic disruption and taxpayer loss while at the same time protecting systemically important functions. APRA has undertaken a pilot Recovery Planning project applying to Australia's largest banks, with final plans delivered to APRA in mid-2012. APRA has indicated that it intends to extend its recovery planning program once the results of the pilot program have been analysed. The final form of any resulting requirements, the implications, and the timing for Westpac are at this stage unknown.

OTC derivatives reform

The over-the-counter (OTC) derivatives market is undergoing significant regulatory reform globally. The reforms aim to improve transparency, mitigate systemic risk and protect against market abuse in the OTC derivatives market by encouraging clearing through central counterparties, reporting to trade repositories, exchange trading where appropriate, and imposing higher capital requirements on non-cleared contracts.

Locally, the Council of Financial Regulators (APRA, ASIC, RBA and the Australian Treasury) issued a report on OTC Derivatives Market Reform Considerations in March 2012, which was followed by the release of the draft Corporations Legislation Amendment (Derivatives Transactions) Bill 2012, which creates a framework to allow the Minister for Financial Services and Superannuation to determine that mandatory obligations should apply to certain classes of OTC derivatives, requiring those classes to be reported, centrally cleared, and traded on suitable trading platforms.

Westpac is closely monitoring the local and international OTC derivatives reforms including regulatory changes being implemented by the US Commodity Futures Trading Commission under the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) and is actively engaging with regulators, trade associations, banks and clearing houses. Westpac is developing clearing, reporting and trade processing solutions to ensure that it is compliant with applicable global regulations within the required timeframes, including any foreign registration obligations. As both the international and local reforms are yet to be finalised, the full extent of the impact on the Westpac Group's operations remains unclear.

Exception fees class action

On 16 December 2011 a class action was commenced against Westpac in the Federal Court of Australia on behalf of certain customers of Westpac. A second class action against Westpac, brought on behalf of certain customers of St.George Bank and BankSA, was commenced on 1 February 2012. The claims in both class actions allege that certain exception fees charged by Westpac prior to October 2009 were unlawful. The claims against Westpac form part of a series of class actions against a number of Australian banks initiated by the litigation funding company IMF (Australia) Ltd. Westpac intends to defend the proceedings. By agreement between the parties, the proceedings against Westpac are on hold until at least December 2012, pending developments in a related class action against another Australian bank.

Bell litigation

Westpac was one of 20 defendant banks named in proceedings concerning the Bell Group of companies. The proceedings were brought by the liquidators of several Bell Group companies who challenged the defendant banks' entitlement to receive the proceeds of realisation of Bell Group assets in the early 1990s. Judgment was delivered on 28 October 2008 and final orders were handed down on 30 April 2009.

Westpac, along with the other defendant banks, was found liable to repay its share of the monies received from the Bell Group plus interest. The defendant banks appealed the decision. Judgment was handed down by the Court of Appeal of the Supreme Court of Western Australia on 17 August 2012. By a majority decision, the defendant banks were unsuccessful in the appeal and the amount of interest payable was increased. The defendant banks have applied for special leave to appeal to the High Court of Australia.

Tax developments

Following the Tax Forum conducted by the Australian Federal Government in Canberra on 4 and 5 October 2011, to discuss tax reform following the report from Australia's Future Tax System Review (the Henry Review), the Deputy Prime Minister and Treasurer announced the appointment of a business tax working group to look at how the Australian tax system could be improved. Measures considered by this working group include the carry back of tax losses and the possible reduction of the corporate tax rate where it is funded by the business tax base broadening. The working group released a draft final report on 24 October 2012. The working group concluded that while there could be benefits associated with a cut in the company tax rate, they declined to make a recommendation as to how such a cut could be undertaken in a revenue neutral manner. This was based on a conclusion by the Group that there was a lack of agreement in the business community as to how to fund such a reduction in the corporate tax rate.

On 30 March 2011, the Assistant Treasurer announced a review of the tax consolidation provisions dealing with rights to future income and the residual tax cost setting rules. The consideration was whether these rules needed to be amended, and, if so, whether any amendments will take effect retrospectively. The residual tax cost setting rules are the provisions under which amounts were allocated to the St.George in the money derivatives in the tax consolidation process (and from which deductions are claimed by Westpac under the general taxing provisions).

In June 2012, the Government passed new legislation (*Tax Laws Amendment (2012 Measures No.2) Act*) that introduced a number of changes to the income tax law as it applied to the Taxation of Financial Arrangements (TOFA) and tax consolidated groups. The new legislation:

- confirmed the tax treatment adopted by Westpac for the derivative assets and liabilities consolidated as part of the St.George Bank merger. This gave rise to a reduction in income tax expense of approximately \$685 million for the 2010 financial year and approximately \$1,110 million for the 2011 financial year, as previously announced in October 2010 and March 2011; and
- applied retrospective amendments to TOFA that applied to certain liabilities consolidated as part of the St.George Bank merger. This gave rise to an additional income tax expense of approximately \$165 million for the 2012 financial year, as reported on 27 June 2012.

Changes to accounting standards

In continuing response to the global financial crisis, governments, regulators and accounting standard setters are working to revise certain accounting standards. The objective is to achieve convergence towards a single set of high-quality, global and independent accounting standards. The specific areas that have been targeted include accounting for financial instruments, provisioning for loan impairment charges, off-balance sheet exposures and the impairment and valuation of financial assets and lease accounting. The Group expects that there will be a number of new standards issued in the next three years that will require changes to our current accounting approaches.

United States

There are a number of significant regulatory reforms currently occurring in the United States (US). These include:

Dodd-Frank Act

In response to the global financial crisis, legislation designed to reform the system for supervision and regulation of financial firms in the US was signed into law on 21 July 2010. The Dodd-Frank Act contains a wide range of provisions that will affect financial institutions operating in the US, including foreign banks like Westpac. Included among its provisions are reforms designed to reduce systemic risk presented by very large financial institutions, promote enhanced supervision, regulation, and prudential standards for financial institutions, establish comprehensive supervision of financial markets, impose new limitations on permissible financial institution activities and investments, expand regulation of the derivatives markets, protect consumers and investors from financial abuse, and provide the US Government with the tools needed to manage a financial crisis. Many of the provisions of the Dodd-Frank Act require extensive rulemaking by US regulatory agencies before the provisions become effective. The issuance of final rules under the Dodd-Frank Act remains far from complete, with the process continuing. Aside from the observations regarding OTC derivatives reform above, until there is greater clarity regarding the final forms of the rules and the extra-territorial application, it is not possible to assess the full impact of the law and the regulations on our operations. However in the event that some of the rules are implemented in or close to the current draft, significant investment in compliance and reporting programs and changes to business activities are likely to be required.

Foreign Account Tax Compliance Act (FATCA)

Legislation incorporating provisions referred to as FATCA was passed in the US on 18 March 2010. The legislation and subsequent guidance require Foreign Financial Institutions (FFIs) (such as Westpac) to enter into an FFI agreement under which they agree to identify and provide the US Internal Revenue Service (IRS) with information on accounts held by US persons and US owned foreign entities, or otherwise face 30% withholding tax on certain payments made to the FFI. In addition, FFIs that have entered into an FFI agreement will be required to withhold on certain payments made to FFIs that have not entered into an FFI agreement and account holders who do not respond to requests to confirm their US person status and/or do not agree to the FFI reporting certain account related information to the IRS. This description is based on guidance issued to date by the IRS, including proposed regulations. Future guidance may affect the application of FATCA to Westpac. Given Westpac's expectation that the FATCA provisions will be implemented in or near to their current form, substantial investment will be required to ensure that Westpac will be able to adhere to the FATCA requirements from a compliance and reporting perspective across all jurisdictions in which Westpac operates.

The IRS has published a Model Intergovernmental Agreement (the Model IGA) in connection with the implementation of FATCA. The Australian Government is currently exploring the feasibility of entering into such an Intergovernmental Agreement (IGA) with the US. If the Australian Government does enter into an IGA with the US, based on the Model IGA, Westpac would likely be able to report the required information relating to its Australian branches to the ATO, which would provide such information to the IRS under existing Exchange of Information protocols. Further, Westpac's Australian branches/affiliates would be relieved of the requirements to enter into an FFI Agreement with the IRS and to withhold from payments to, or close the accounts of, certain account holders at such branches/affiliates but will still be required to identify certain US accounts. While it is anticipated that such an IGA would reduce the compliance costs and operational burdens of FATCA for Westpac, there is no certainty that Australia will enter into an IGA with the US. Moreover, even if such an IGA is entered into, Westpac currently expects that it will enter into an FFI agreement, as described above, with respect to its branches and affiliated FFIs not located in Australia or another country that has entered into an IGA.

New Zealand

Regulatory reforms and significant developments in New Zealand include:

Transfer of additional banking operations to Westpac New Zealand Limited on 1 November 2011

Until 1 November 2006, Westpac conducted its banking operations within New Zealand through a branch structure. On that date, and after extensive consultation with the Reserve Bank of New Zealand (RBNZ), Westpac adopted a dual registration operating model comprised of a locally incorporated subsidiary, WNZL, to conduct its consumer and business banking operations in New Zealand, and a branch, Westpac's NZ Branch (NZ Branch), to conduct its institutional and financial markets operations.

Following an independent review of the structure of the operating model of Westpac's business in New Zealand, the RBNZ, WNZL and Westpac reached agreement on changes to the operating model. As a result, and pursuant to the *Westpac New Zealand Act 2011*, the following assets and liabilities associated with certain business activities and associated employees were transferred from the NZ Branch to WNZL on 1 November 2011:

- institutional customer deposits;
- institutional customer transactional banking;
- institutional customer lending other than trade financing activities;
- debt capital markets activities carried out in assisting corporates to obtain funding, such as customer loan syndication and securitisation arrangements, but excluding the debt securities team activities, such as arrangement of commercial paper and bond programme;
- corporate advisory; and
- institutional customer foreign currency accounts.

The NZ Branch has retained its financial markets operations for external customers, including sales and trading of capital markets products and foreign exchange for corporate and institutional customers, pricing and risk management for interest rate, foreign exchange and commodity products for retail, business and institutional customers of WNZL and trading of capital markets products and foreign exchange as principal. In addition, the NZ Branch has retained its global intra-group financing functions, correspondent bank relationships, debt securities team activities, such as arrangement of commercial paper and bond programmes, and international business (including trade finance activities but excluding customer foreign currency accounts).

Open Bank Resolution (OBR)

The RBNZ released a consultation paper on OBR in March 2011. OBR contemplates a bank being open for business on the next business day following an insolvency event or event that triggered putting it under statutory management. The RBNZ's consultation paper recommended that all locally incorporated banks with retail funding over NZ\$1 billion participate in a pre-positioning process and therefore the policy will apply to WNZL. In the event of failure, a bank must be able to achieve certain outcomes which include being able to freeze accounts and process pending payments, determine customers' account balances on a per account basis, set aside a proportion of account balances that have been frozen, and resume customers' access to their transaction and other accounts on the next business day following the bank's closure. Banks were required to submit detailed implementation plans to the RBNZ by 29 February 2012 and the RBNZ is requiring that they be fully pre-positioned for OBR by 30 June 2013. A new condition of registration to formally impose the OBR requirements is expected to be in place by the end of the calendar year and take effect from 1 July 2013.

Basel III

The RBNZ is adopting the core Basel III capital measures relating to new capital ratios, including the conservation buffer, and most of the recommendations relating to the definition of capital. Total Tier 1 capital will increase to 6.0% plus the conservation buffer of 2.5%. Tier 1 capital will need to include common equity of 7.0% (Tier 1 ratio of 4.5% and the conservation buffer). The countercyclical capital buffer is also being adopted and will be imposed when the RBNZ judges that excess private sector credit growth or rapid growth in asset prices is leading to a build-up of system-wide risk. The RBNZ is not specifying any upper limit on the countercyclical buffer. The leverage ratio is not being adopted. The RBNZ is implementing Basel III ahead of the Basel Committee on Banking Supervision's (BCBS) and APRA's timetable. The new capital ratios will come into effect on 1 January 2013. The conservation buffer will be implemented in full from 1 January 2014, in contrast to the BCBS's Framework which proposes that the buffer be implemented over a three year period (from 2016). The countercyclical capital buffer will be able to be deployed from 1 January 2014.

Financial Markets Conduct Bill (FMCB)

The FMCB was introduced into the New Zealand Parliament in October 2011 and was reported back from Select Committee in early September 2012. It is expected to be passed in the first half of 2013. The FMCB represents an overhaul of the existing securities law regime in New Zealand and will impact various aspects of the wider Westpac New Zealand business. It introduces changes to product disclosure and governance, and introduces new licensing and registration requirements. The new regime will do away with the existing prospectus/investment statement dual disclosure model and introduce a single product disclosure statement, supported by an online register of other material documentation. Much of the detail from the Bill has been left to be prescribed in regulations.

Credit law reform/responsible lending

The New Zealand Government is proposing to amend the *Credit Contracts and Consumer Finance Act 2003* (CCCFA) by introducing a duty to lend responsibly. An exposure draft of the amendment Bill was released in April 2012. The Bill will provide for a regulatory responsible lending code and will strengthen existing consumer protections by changing current CCCFA provisions on disclosure, fees, hardship and 'oppressive contracts'.

Reserve Bank of New Zealand (Covered Bonds) Amendment Bill

A bill that provides a legislative framework for the issuance of covered bonds by New Zealand registered banks was introduced into Parliament in May 2012 and is expected to be passed this year. New Zealand registered banks are currently permitted by the RBNZ to issue covered bonds and have conditions of registration which impose a limit on this issuance of 10% of total assets. However, the legislation will provide certainty for investors that the cover pool assets will be disgorged from statutory management and liquidation regimes. The Bill will require the registration of covered bond programs and provides for a transition period for the registration of existing covered bond programs.

Further regulatory developments

The Australian Federal Government has embarked on a program of regulatory reform, which will affect Westpac. This includes:

- Credit law reform – as part of the second phase of the credit law reforms, since 1 January 2012, credit providers have been required to produce Key Facts Sheets for standard home loans. Further reforms relating to credit cards commenced on 1 July 2012. These reforms include a credit card Key Facts Sheet, a minimum repayment warning on statements, a mandatory order of application of payments, over the limit notifications and a requirement for consent before sending written credit limit increase invitations. In addition, through the *Consumer Credit and Corporations Legislation Amendment (Enhancements) Act 2012*, amendments have been introduced to the regulation of reverse mortgages, hardship applications under the National Credit Code, short-term and small amount loans, consumer leases and other 'enhancements', most of which will commence 1 March 2013.
- Superannuation changes – the Government's response to the Super System (Cooper) Review will require introduction of a new 'MySuper' product from 1 July 2013. MySuper is a low cost, simple superannuation product. A MySuper product will be the default investment option where investment choice is not elected by the member. Other legislative changes include enhanced trustee and director obligations as well as 'SuperStream', a measure to improve the efficiency of processing superannuation transactions through the use of technology. All legislation to execute this reform agenda should be in force by the end of 2012. A project team has been created to assess the impact of these changes to our existing superannuation products and to ensure compliance with the new requirements.
- Financial advice changes – on 27 June 2012 the Government's Future of Financial Advice (FOFA) reforms became law. Regulations were registered on 12 July 2012 and 2 October 2012, and further regulations are still expected. The FOFA reforms are aimed at improving consumer trust and confidence in, and the quality of, financial advice. The FOFA reforms include a ban on certain conflicted payments and soft dollar benefits, a ban on volume-based shelf space fees, a ban on the charging of asset-based fees on borrowed funds, a statutory best interests duty so that financial advisers must act in the best interests of their clients, and an 'adviser charging regime' where the investor will be required to opt-in every two years to receive ongoing advice and where advisers will be required to give annual disclosure of ongoing fees and services to investors. The majority of the proposed reforms will commence for the Westpac Group on 1 July 2013. Certain aspects of the reforms, including an anti-avoidance provision and increased ASIC powers, commenced on 1 July 2012.

- Privacy law reform – the *Privacy Act*, first introduced in Australia in 1988, regulates how personal information is collected, used, disclosed and maintained by organisations. It also grants rights to individuals to access and request the correction of their personal information. The Privacy Amendment (Enhancing Privacy Protection) Bill 2012 has been passed by the House of Representatives and is currently before the Senate. This Bill contains new Australian Privacy Principles to replace the current National Privacy Principles and amends, among other things, how credit reporting is conducted.
- Proposed amendments to the Insurance Contracts Act – on 21 March 2012, the *Insurance Contracts Amendment Bill 2011* was passed by the Australian Parliament, introducing a standardised definition of ‘flood’ for home and contents insurance policies and establishing additional mandatory disclosure requirements for home and contents insurance policies. In addition to those changes, the Government is currently reviewing the availability and affordability of flood insurance, while amendments to the *Insurance Contracts Act 1984 (Cth)* and related legislation may result in insurance contracts being subject to the ‘unfair contracts’ regime; updated duties of disclosure being imposed upon insurers; and the option of providing notices and documents under the Act electronically.
- The introduction of a new regulatory framework for personal property securities – on 30 January 2012 the *Personal Property Securities Act (PPSA)* commenced. The PPSA is a national personal property securities regime involving a single register and a uniform set of rules that replaces a wide range of complex State and Territory based legislation and registers. The PPSA regime has introduced fundamental changes to the treatment of security interests in personal property in Australia.
- Changes to APRA’s crisis management powers – on 12 September 2012 the Australian Federal Treasury released for public consultation a paper entitled *Strengthening APRA’s Crisis Management Powers* which seeks comments on a series of reform proposals directed at strengthening APRA’s crisis management powers. Proposals under consideration include providing APRA with the ability, in times of financial distress, to direct regulated entities (including Westpac) in relation to disclosure requirements and broadening APRA’s powers to issue other directions to regulated entities. If implemented, these proposals could impact on the regulatory framework applying to Westpac and its controlled entities. However, until final proposals are published and implemented, the full extent of the impact on us is uncertain.
- Covered bonds – on 13 October 2011, the Australian Parliament passed an amendment to the *Banking Act 1959* permitting ADIs to issue covered bonds. Among other things, this legislation caps at 8% the value of an ADI’s assets in Australia that can be included in a cover pool supporting covered bonds.

Westpac continues to review these developments, engage with Government, regulators and industry bodies as appropriate, and amend its systems, processes and operations to align with regulatory changes as they occur.

In December 2011 the Board endorsed a sustainability strategy to anticipate and respond to the most pressing emerging societal issues where the bank has the skills and experience to make a meaningful, positive impact. We have identified three initial focus areas: anticipating the big shifts of demographic and cultural change; creating economic solutions to environmental challenges; and helping customers achieve sustainable financial futures in a changed landscape. This overall strategy and three focus areas are well embedded in our business planning processes, and are supported by ten objectives against which new targets have been established for FY2013.

An update on how Westpac is tracking against its existing FY2008-2013 sustainability objectives is provided below.

Performance highlights

Full Year 2012

- More than \$4 million donated together by Westpac and employees to approximately 600 Australian based charities through our *Matching Gifts* program; and 85 microfinance loans totalling \$34,000 donated through our *Matching Loans* program;

¹ Employee Voluntary Attrition refers to the total voluntary separation of permanent employees / 12 month average total permanent headcount (includes full time, part time and maximum term employees). Excludes Pacific Banking.

² Total New Starter retention / 12 month rolling New Starter headcount for the period (includes full time and part time permanent employees). Excludes Pacific Banking.

³ Total High Performer Retention / 12 month rolling High Performer headcount for the period (includes full time, part time permanent and maximum term employees). Excludes Pacific Banking.

⁴ Lost Time Injury Frequency Rate (LTIFR) measures the number of injuries or illnesses resulting in an employee being unable to work for a full scheduled day (or shift) where work was a significant factor, per one million hours worked. Excludes Pacific Banking.

⁵ Women in Leadership refers to the proportion of women (permanent and maximum term employees) in people leadership roles or senior roles of influence as a proportion of all leaders across the Group. Includes CEO, Executive Team, General Managers, Senior Managers as direct reports to General Managers and the next two levels of management. Aligned to the Equal Opportunity for Women in the Workplace Agency (EOWA) standard. Excludes Pacific Banking

⁶ Employee engagement score is determined through a voluntary employee survey conducted internally using Towers Watson's licensed survey methodology and is a score of employee engagement levels at the time the survey is administered. 2011 data excludes Pacific Banking.

⁷ Refers to Scope 1 and 2 emissions in Australia and New Zealand. Full Year covers the period 1 July to 30 June, Half Year Sept covers the period 1 January to 30 June and Half Year March covers the period 1 July to 31 December. Prepared in line with the Greenhouse Gas Protocol, ISO 14064-1 standard, the National Greenhouse and Energy Reporting Act (2007) for Australia, and the Certified Emissions Measurement and Reduction Scheme (CEMARS) for New Zealand.

⁸ Total paper consumed (in tonnes) by Westpac Group as reported by its suppliers. Full Year covers the period 1 July to 30 June, Half Year Sept covers the period 1 January to 30 June and Half Year March covers the period 1 July to 31 December. Includes copy paper and printed materials, including direct mail and marketing documents. Australian figure also includes stationery, and kitchen and bathroom products.

FULL YEAR RESULTS 2012
REVIEW OF GROUP
OPERATIONS

- Westpac sponsored Diversity Council Australia's 'Mainstreaming Flexibility' reports in March and August 2012 and formed a Gender Equality Partnership with the Melbourne Business School's Centre for Ethical Leadership; Westpac exceeded its 2014 objective to achieve 40% of women in leadership roles;
- During Full Year 2012 Westpac launched an Employee Action Group to support greater inclusion of the GLBTi (gay, lesbian, bisexual, transgender and intersex) community;
- Westpac launched the Westpac-SunPower Flexi Loan providing a discounted interest rate for customers wishing to finance their solar products;
- Westpac was selected by the New South Wales Government to undertake a trial of Social Benefits Bonds providing \$10 million over five years from the funds' establishment date to support 550 families in need;
- Westpac exceeded its three-year Australian Employment Covenant (AEC) goal of recruiting at least 100 Australian Indigenous people by 30 September 2012 and is currently finalising more ambitious targets;
- An offshore validation program was implemented as part of the Sustainable Supply Chain Management framework to complement our current internal and external validation program;
- Full Year 2012 marked the first year of the Westpac Group and Financial Review Group '100 Women of Influence Awards' partnership. A complementary internal employee program was launched to identify Westpac's own internal inspiring women of influence;
- Ongoing volunteering and fundraising for the charitable funds which are supported by the Westpac Group and which distributed over \$4 million in grants to not-for-profit organisations; and
- The Westpac Foundation, St.George Foundation, Bank of Melbourne Neighborhood Fund and BankSA & Staff Charitable Funds have formed the Family of Giving, making it possible for shareholders to be part of the important work of all four charitable funds through one easy way to donate.

External recognition of the Group's sustainability activities

Features:

- Westpac was awarded the Equal Opportunity for Women in the Workplace Agency's (EOWA's) Employer of Choice for Women citation for 2012;
- Westpac was ranked amongst Corporate Knights 2012 Global 100 Most Sustainable Corporations in the world for the third year in a row. In 2012, Westpac ranked 7th. Westpac was the only Australian bank named in the list and was included along with only six other Australian companies;
- Received a score of 92% in the Dow Jones Sustainability Index - the strongest ever score for the Westpac Group;
- Named as one of the World's Most Ethical Companies from 2008 – 2012 by the Ethisphere Institute;
- Listed in the CDP 2012 Global 500 Carbon Performance Leadership Index for the third year in a row;
- Included in the FTSE4Good Index;
- Attained the Oekom Prime status. A company is classified as "Prime" if it ranks among the world's best companies within the same industry and fulfils the sector-specific minimum requirements defined by Oekom research (best in class);
- Voted Best Trading Company in Australasia in the global Environmental Finance Awards;
- Awarded the 2011 NZI Sustainable Business of the year in New Zealand by the Sustainable Business Network; and
- BT Wholesale Ethical Share Fund won the 2012 Money Manager of the Year award in the Ethical/Socially Responsible Investment category.

Update on objectives and performance

Customers

Update on objectives

- *Top 3 regional player in carbon related markets by 2013;*

Westpac Institutional Bank (WIB) offers a full range of financial solutions across regional carbon markets. Westpac has traded in the European carbon market since 2006 and is the largest financial intermediary and principal New

FULL YEAR RESULTS 2012

REVIEW OF GROUP OPERATIONS

Zealand Unit (NZU) price maker in domestic currency. In November 2011, the Australian Government passed the Clean Energy Act, including the introduction of the Carbon Price Mechanism (CPM) from 1 July 2012. Westpac's capabilities in carbon markets are well positioned to support the CPM and its future linkage with the EU ETS.

WIB has also developed a comprehensive range of financing solutions for clients impacted by the carbon price. This includes the Energy Efficient Equipment Lease launched in February 2012, providing finance for the procurement and financial management of more efficient equipment.

Westpac provides over \$3 billion in finance for environmental activities such as renewable energy, greening the property sector or water and waste management activities. Of Westpac's institutional Infrastructure and Utilities portfolio, direct or indirect exposures to electricity generation activities across Australia and NZ were \$2,795 million at 30 September 2012 (up from \$2,565 million as at 30 September 2011). Of this amount, over 50% can be directly or indirectly attributed to Hydro and Renewables exposures in either lending or other product exposures.

- *To be ranked as the top 1 and 2 for Net Promoter Score (NPS) in Australia amongst the major banks and St.George, and achieve scores of +1 for retail and -12 for business in Westpac New Zealand;*

St.George continues to be ranked 1 for NPS¹ amongst the major banks for business customers², while Westpac is currently ranked 3. St.George and Westpac also hold these ranks in the SME business segment, while in the Commercial business segment St.George and Westpac are currently ranked 3 and 2 respectively³. For consumer NPS⁴ St.George and Westpac are currently ranked 1 and 4 respectively amongst the major banks. In the Affluent segment, Westpac holds 5th place.

While the NZ retail NPS has steadily improved the target has not yet been met. The target has been revised from 2011, as we are now using a business unit NPS measure.

Next year we will adopt "Growth in MyBank customers" as a more appropriate measure to assess our progress on driving deep and enduring customer relationships (one of our key strategic objectives). MyBank customers have a quality and frequent transaction relationship with us and at least two additional quality financial needs met.

Employees

Update on objectives

- *To increase the percentage of women in leadership roles to 40% by the end of 2014;*

We have built a recognised market leading position for Women in Leadership and as at 30 September 2012, 40% of leadership roles are filled by women against our FY12 target of 38.5% and from a base of 33% in early 2010.

This momentum is driven by: the implementation of detailed business unit action plans that are reviewed quarterly; strengthening the focus on key HR processes including recruitment and talent management; regularly reviewing pay equity outcomes and the implementation of action plans to address areas where inequities exist; expanding the range of Women in Leadership development programs and increasing participation by 27.5% in 2012; increasing the participation of women in core leadership development and high potential programs; launching an internal employee awards program to identify Westpac Group's 10 Women of Influence; launching the market leading 100 Women of Influence Awards in partnership with the Australian Financial Review; partnering with UN Women to celebrate International Women's Day, and sponsoring programs to promote thought leadership and community involvement.

- *Implement initiatives to address the outcomes of our Diversity Audit;*

In addition to our focus on Women in Leadership, Westpac continues to build momentum in our broader Diversity Program including:

- The development of a roadmap to enhance workplace flexibility. Market leadership in flexibility will significantly support our goals of creating a more agile, engaged and productive workforce. Westpac has many market leading flexibility practices in place and is well positioned to take an industry leading position;

¹ Net Promoter Score (NPS) is calculated by subtracting percentage of customers who are Detractors (rating 6 or less out of 10 for likelihood to recommend) from Promoters (rating of 9-10), which excludes non-responses ie. Respondents who did not provide a rating at all.

² DBM Consultants; 6 month average, February 2012 – September 2012 (n=7,837).

³ DBM Consultants; 6 month average, February 2012 – September 2012 (SME n=4,868; Commercial n=1,588)

⁴ Source: Roy Morgan Research, Overall Consumer 6 month rolling average to September 2012, Australians Aged 14+. Net Promoter ScoreSM and NPSSM is a service mark of Bain & Company, Inc., Satmetrix Systems, Inc, and Mr. Frederick Reicheld.

- Continuing our commitment to Indigenous communities in Australia, New Zealand and the Pacific. Westpac's second Reconciliation Action Plan (RAP) was launched in Australia during July 2012. The RAP sets out our intentions and specific goals for supporting Aboriginal and Torres Strait Islander peoples and their communities. Our approach continues to revolve around a range of initiatives to address the educational, financial and employment disadvantages faced by Indigenous people, as well as meeting their specific banking needs;
- Building strength in making our workplace accessible to all including people with disabilities. In Full Year 2012 we have focused on delivering on the promises in our Accessibility Action Plan. A refreshed Accessibility Action Plan is currently being developed and will be released in the second quarter of 2013;
- Refreshing our mature age strategy to further cement Westpac Group's position as an employer of choice and fully optimise the benefits of greater workplace participation by mature age employees. The refreshed strategy outlines enhancements to our current offering in the areas of Career Development; Talent Management; and Retirement Planning;
- Supporting greater inclusion of the GLBTi (gay, lesbian, bisexual, transgender and intersex) community through the establishment of an Employee Action Group (EAG), commemoration of International Day Against Homophobia and Transphobia and the implementation of training to support inclusive and non discriminatory language. The Employee Action Group was successfully launched at a group wide event that featured the Hon. Michael Kirby as guest speaker in September 2012; and
- Extending the range of EAG. EAGs form a critical component of our diversity program by providing employees with a vehicle to directly contribute to the development of policies and practices to promote a more diverse and inclusive workplace. We now have seven EAGs, each sponsored by an Executive Team member, covering: Accessibility; Indigenous; Youth; Mature Age; Women; Flexibility; and GLBTi.

A comprehensive Diversity Program has been scoped for 2013 that will support our strategy and continue to maintain a leading position for Westpac in Women in Leadership.

Community

Update on objectives

- *Reduce Scope 1 and 2 emissions by 30% on 2008 levels by 2013;*
Emissions are currently tracking below pre-2008 levels but are above the levels required to meet the 2013 five year target.
- *Embed organisational mentoring into operational processes by 2013;*
Organisational mentoring is now fully embedded into operational processes. In Full Year 2012, there were approximately 75 active participants supporting approximately 30 not-for-profit organisations, social enterprises and social sector projects. Organisational mentoring is also being utilised by employees as a unique development opportunity in addition to providing meaningful community support.
- *Provide the Managing Your Money Program to 45,000 New Zealanders by 2013; and Implement financial literacy education for small and medium sized (SME) customers in New Zealand;*
Since launching 'Managing Your Money' in 2006, over 63,000 New Zealanders have participated in the workshops and on-line tutorials, and 137 employees have been trained to deliver the program. Building on this success, Westpac launched a new program in Full Year 2012 aimed at the SME market.
- *Launch a major initiative to help address social disadvantage;*
In its second year, the Group's partnership with Mission Australia provided funding for specific projects to help address family homelessness in Australia including a national research project with the goal to enhance the wellbeing of homeless children and a new Mission Australia Centre in Kingswood (NSW), which will provide accommodation options and support services for families in need.
Westpac Group, in a consortium with The Benevolent Society (TBS) and Commonwealth Bank of Australia, was selected by the New South Wales Government to undertake a trial of Social Benefits Bonds with the aim of helping families in need. Social Benefit Bonds aim to involve the private sector in the provision of certain social services with the Government promising to pay back the value of the bonds at the end of the term based on the effectiveness of the program funded. The bonds, which would be the first of their kind in Australia, will provide \$10 million to fund the establishment of a Family Preservation Service, supporting 550 families over five years.

Business

Update on objectives

- *Consideration of Environmental Social and Governance (ESG) issues incorporated into relevant risk management policies, practices and decision making processes by 2013;*

In Full Year 2012, the Group's ESG Risk Management Framework, ESG Credit Risk Policy and suite of position statements were reviewed and updated to ensure that ESG considerations are embedded more consistently across the Group's activities. ESG risk management training sessions were also conducted during Full Year 2012 for risk and credit managers.

- *Responsible lending and investment practices embedded in key processes by 2013;*

The Group's Principles for Responsible Lending were updated in Full Year 2011 and continue to be practiced in Full Year 2012. Our responsible investment practices are led by our wealth management business, BT Financial Group (BTFG), which is a signatory to the United Nations Principles of Responsible Investment (UN PRI). These principles commit institutional investors to incorporate ESG considerations into investment analysis, decision making and ownership priorities. As part of our commitment to the UN PRI BTFG participated in a voluntary pilot of the UN PRI's new reporting framework. The new reporting framework is structured according to implementation approach and asset class, and has been tailored to different investment approaches. Progress against this objective also continues in the Advance Asset Management business where the development of an ESG Research Framework saw further embedding of ESG factors into the investment process, manager selection and new mandates.

4.0 DIVISIONAL RESULTS

Divisional results are presented on a management reporting basis. Internal charges and transfer pricing adjustments are included in the performance of each business reflecting the management rather than the legal structure (these results cannot be compared to results for individual legal entities). Where management reporting structures or accounting classifications have changed, comparatives have been revised and may differ from results previously reported. Results below are presented on a Cash Earnings basis.

Our internal transfer pricing framework attributes value between divisions. Its primary attributes are:

- Treasury funding product balances are fully transfer priced at inter-bank rates according to the tenor of the underlying transactions; and
- Overhead costs are allocated to revenue generating businesses, and capital is allocated to business groups using designated risk factors.

Organisational Changes

During Second Half 2012 the Group updated its approach on how capital is allocated and how transfer pricing is determined.

These new models have been designed to better align the Group's economic capital and pricing approaches to the new regulatory requirements, especially minimum prudential capital and liquidity requirements. The models also take into account the changed funding markets, especially higher marginal deposits and term wholesale funding costs.

During First Half 2012 the Group also transferred management responsibility for:

- The Equities business from WIB to BTFG;
- RAMS from Westpac RBB to St.George; and
- The New Zealand Institutional banking business transferred from WIB to Westpac New Zealand. Refer page 55 for further information on this transfer.

First Half 2012, and Full Year 2012 and Full Year 2011 results have been prepared on the basis that transfers and methodology changes took place on 1 October 2010.

4.1.1 Westpac Retail & Business Banking

Westpac Retail & Business Banking (Westpac RBB) is responsible for sales and service for our consumer, small-to-medium enterprise customers and commercial customers (typically with turnover of up to \$100 million) in Australia under the Westpac brand. Activities are conducted through Westpac RBB's network of branches and business banking centres and specialised consumer and business relationship managers, with the support of cash flow, financial markets and wealth specialists, customer service centres, automatic teller machines (ATMs) and internet and mobile channels. The majority of revenue from wealth products sold to Westpac RBB customers is included in BTFG's financial results.

Financial Performance

Second Half 2012 - First Half 2012

- Strong result benefiting from the Westpac Local strategy with Cash Earnings growth of 11% and core earnings rising 7%;
- A disciplined performance with sound margins, strong non-interest income, a decline in expenses and a small fall in impairments; and
- Strengthened franchise while maintaining momentum with improved customer deposit to loan ratio, increase in customers, a further rise in products per customer, and higher revenue per employee.

Westpac RBB delivered Cash Earnings of \$1,113 million, up \$112 million, or 11%. Core earnings were up 7% at \$1,760 million.

A feature of Westpac RBB's strong performances is the Westpac Local strategy that continues to improve both the capability and capacity of the front line. This performance has been repeated in Second Half 2012 with the franchise delivering stronger earnings from disciplined balance sheet growth, deeper customer relationships and an improvement across a number of key metrics over the half including:

- Customer deposit to loan ratio improved 180 basis points to 55.3%;
- Customer numbers have continued to increase, up 1% or 77,000;
- Customers with 4+ products has risen 70 basis points to 30.2%, with particular success in the cross-sell of BT Super for Life and general insurance products;
- High customer retention rate of 97.6% overall with high performance in our key segments of SME, Commercial and Affluent;
- Revenue per FTE was up 7%;
- Rated in top two of the major banks in NPS across SME, Agribusiness and Commercial; and
- Employee engagement up 4 percentage points to 89%, well ahead of global high performance norm.

Net interest income increased 3% with average interest-earning assets rising 1% and margins improving:

- Interest margins rose 4 basis points to 2.25%:
 - Lending spreads increased 15 basis points, mostly from the full period impact of the repricing of mortgages in First Half 2012 to better recover increased funding costs; and

¹ Net Promoter ScoreSM and NPSSM is a service mark of Bain & Company, Inc., Satmetrix Systems, Inc. and Mr Frederick Reichheld.

² Affluent NPS Source: Roy Morgan Research. Metric based on six month rolling average. Affluent NPS = NPS of main financial institution, aged 25-59 & household income \$100k+ or aged 60+ & household income \$50k+ or aged 14+ & banking & finance (excluding WB super) footings \$400k+.

³ DBM Consultants Business Financial Services Monitor: 6 month average; Net Promoter Score is calculated by subtracting the percentage of Total Detractors (0-6) from the percentage of Promoters (9-10), who answer the following question: "Please use a scale ranging from 0 to 10, where 0 means 'extremely unlikely' and 10 means 'extremely likely'. How likely would you be to Recommend (MFI) to others for business banking? All businesses. SME NPS = NPS of main financial institution. All businesses with annual turnover under \$5 million (excluding Agricultural business). Commercial NPS = NPS of main financial institution. All businesses with annual turnover over \$5 million and under \$100 million (excluding Agricultural business).

⁴ Peer group is the weighted average of the Big 4 Banks. Weighted Big 4 average includes: WBC, ANZ, CBA and NAB 6 month moving average.

FULL YEAR RESULTS 2012

DIVISIONAL RESULTS

- Deposit spreads were lower due to more competitive pricing and the full period impact of strong growth in lower margin term deposits in First Half 2012.

- Lending up \$3.9 billion (or 2%):

- Achieved balanced growth in mortgages with outstandings rising \$2.7 billion or 1% without leading on price:
 - o Mortgages written through the Westpac network accounted for 56% of flows over the half; and
 - o Mortgage growth impacted by a higher level of accelerated repayments.
- Business lending increased \$1.3 billion (or 3%) with much of the growth in term lending in the SME sector in Victoria and Western Australia.
- Other consumer lending decreased \$0.1 billion (1%) with growth in personal lending offset by a decline in credit card balances due to the run-off in the Ignite credit card portfolio.

- Deposits more than fully funded loan growth, increasing \$6.7 billion (up 5%) in line with system growth of 5%:

- Growth was mostly in reward saver products \$5.4 billion, transaction accounts \$1.8 billion following increased efforts to deliver more flexible solutions for customer's everyday deposit and savings needs. Term deposits balances were little changed in the half.

Non-interest income was up \$22 million (4%):

- Strong collaboration with WIB has contributed to a rise in financial markets income from customers seeking to manage foreign exchange and interest rate risks;
- An increase in business lending line fees, which have been gradually repriced to more appropriately reflect the cost of providing business facilities;
- Good wealth cross-sell was also a feature of the result, although most of the income is recorded within BTFG; and
- These were partly offset by seasonally lower credit card income from reduced credit card reward activity.

Operating expenses decreased \$19 million (down 1%):

- Productivity has continued to be a focus leading to a reduction in around 460 FTE over the half. Major efficiency gains have been achieved through:
 - Implementation of the Spider (Teller) and Unity (Call centre) platforms has enabled a streamlining of service and support roles;
 - The AFS restructure has driven synergies in support, contact centre and other head office functions; and
 - Improved banker productivity and lower credit growth has led to a reduction in roles related to home lending, providing capacity for an increase in broader sales roles.
- These declines were partially offset by normal salary increases and higher expenses associated with investment including SIPs project amortisation.

Impairment charges fell \$7 million with lower consumer impairment charges partially offset by a rise in business impairment charges:

- Consumer impairment charges declined \$29 million:
 - Mortgage 90+ day delinquencies were down 4 basis points to 48 basis points primarily due to consumers remaining cautious and strengthening their balance sheets; and
 - Other consumer delinquencies were down 28 basis points to 99 basis points largely driven by lower credit card and personal loan delinquencies.
- Business impairments increased \$22 million mostly due to the review of provisioning for existing facilities and some increase in customer financial stress in the retail sector.

Full Year 2012 – Full Year 2011

- The Westpac Local strategy continued to deliver with Cash Earnings growing 14% and core earnings rising 8%. The result was supported by non-interest income, well managed expenses and a fall in impairment charges.
-

Westpac RBB delivered Cash Earnings of \$2,114 million, up \$264 million, or 14%. Core earnings were up 8% at \$3,409 million.

Net interest income increased 3% with average interest earning assets rising 4% and margins declining:

- Margins fell 3 basis points to 2.23%:
 - Lending spreads increased 17 basis points, mostly from the repricing of mortgages and business loans to better reflect higher funding costs; and
 - Deposit spreads were lower due to both more competitive pricing, particularly in term deposits, and mix impacts with strong growth occurring in the higher interest rate term deposits.
- Lending up \$8.2 billion (or 3%):
 - Mortgages accounted for the majority of lending growth, rising \$6.5 billion (up 3%);
 - Mortgages written through the Westpac network accounted for 56% of flows over the year; and
 - Mortgage growth was impacted by higher levels of accelerated repayments.
 - Business lending increased 4% over the period mostly in term lending with sound growth across commercial and SME lending with relatively stronger growth in Victoria and Western Australia; and
 - Other consumer lending was flat.
- Deposits increased \$13.4 billion (up 11%) relative to system growth of 8%:
 - Term deposits increased \$7.4 billion (up 14%), mostly in the first half of the year; and
 - Other deposits were up \$6.0 billion (up 8%) driven by growth in consumer (reward saver/transactional) and business deposits, partly offset by a decline in online deposits as the business chose not to match higher market rates including those associated with our new RAMS online offer.

Non-interest income was up 9% reflecting:

- An increase in business lending fees, which have continued to be repriced to more appropriately reflect the cost of providing business facilities; and
- A rise in financial markets income related to growth in customers managing interest rate risk.

Operating expenses decreased \$8 million:

- Improving productivity was a key focus over the year with a range of initiatives implemented to streamline roles and tightly manage variable expenses. These initiatives contributed to over \$31 million in savings and a reduction of almost 800 roles and included:
 - The implementation of the Spider and Unity platforms streamlining activity;
 - The AFS restructure has driven synergies in head office and support costs;
 - Lower credit growth and improved productivity has reduced the need for resources supporting housing lending; and
 - Disciplined management across all variable costs including professional services, printing and travel contributed around \$13 million in cost savings.
- These savings were partially offset by normal salary increases processed in January and a rise in investment related spending, particularly amortisation of technology investments.

Impairment charges fell \$118 million (22%) with lower consumer and business impairment charges:

- Consumer impairment charges declined \$89 million;

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

- Mortgage 90+ day delinquencies were down 4 basis points to 48 basis points primarily due to healthier household balance sheets;
- Other consumer delinquencies were down 23 basis points to 99 basis points largely driven by cautionary consumer behaviour and a strong performance from our collections activities; and
- Business impairments decreased \$29 million mostly due to lower stressed assets.

4.1.2 St.George Banking Group

St.George Banking Group (St.George) is responsible for sales and service for consumer, business and corporate customers in Australia under the St.George, BankSA, Bank of Melbourne and RAMS brands. RAMS is a financial services group specialising in mortgages and online deposits. Consumer activities are conducted through a network of branches, third party distributors, call centres, ATMs, EFTPOS terminals and internet banking services. Business and corporate customers (businesses with facilities typically up to \$150 million) are provided with a wide range of banking and financial products and services including specialist advice for cash flow finance, trade finance, automotive and equipment finance, property finance, transaction banking and treasury services. Sales and service activities for business and corporate customers are conducted by relationship managers via business banking centres, internet and customer service centre channels. The majority of revenue from wealth products sold to St.George customers is included in BTFG's financial results.

Financial Performance

Second Half 2012 – First Half 2012

- Reinvigorated strategy generated improved momentum in Second Half 2012 with Cash Earnings growth of 14% and core earnings rising 6%. All brands: St.George; BankSA; Bank of Melbourne; and RAMS contributed to the good momentum;
- The result was supported by solid net interest income, well managed expenses and a 20% fall in impairment charges; and
- Solid improvement across all key metrics including the deposit to loan ratio, rising customer numbers, increasing products per customer and higher revenue per FTE.

St.George delivered Cash Earnings of \$657 million in Second Half 2012, up \$83 million, or 14%. Core earnings were up 6% at \$1,129 million.

With the repositioning of the St.George business now complete (including a reduction in commercial property lending), the division has reinvigorated its strategy, building on its position as a local/regional alternative to the major banks and generating improved momentum. The success of this change has been reflected in a pick-up in balance sheet growth and improvement across a number of key metrics over the half including:

- Deposit to loan ratio improved 310 basis points to 54.8%;
- Customer numbers have continued to increase, up 2.3%;
- Customers with 4+ products has risen 110 basis points to 28.6%;
- Revenue per FTE up 5%; and
- Continuing to lead the major banks in NPS scores across both consumer and business;

Net interest income increased 5% with average interest-earning assets rising 1% and margins improving:

- Margins increased 8 basis points to 2.16%:
 - Lending spreads increased 18 basis points, mostly from repricing completed in Second Half 2012; and
 - Deposit spreads were lower due to more competitive pricing, and mix impacts from strong growth in lower margin deposits, including term deposits and online.
- Lending up \$3.8 billion (or 3%):
 - Mortgages accounted for majority of loan growth, rising \$3.4 billion (up 3%):
 - Strongest growth was seen in the St.George brand (up \$1.5 billion) and Bank of Melbourne (up \$1.2 billion) with good growth in RAMS with its portfolio rising \$0.5 billion; and
 - Growth in mortgages was achieved across both the proprietary and third party channels.
 - Business lending was flat over Second Half 2012; and

¹ Net Promoter ScoreSM and NPSSM is a service mark of Bain & Company, Inc., Satmetrix Systems, Inc. and Mr Frederick Reichheld.

² Consumer NPS source: Roy Morgan Research. Metric based on the six month rolling average. Consumer NPS = NPS of main financial institution, aged 14+.

³ St.George - includes St.George Bank, Bank of Melbourne (from August 2011), BankSA, Advance Bank, Dragondirect and RAMS (from January 2012).

⁴ Peer group is the weighted average of the Big 4 Banks. Weighted Big 4 average includes WBC, ANZ, CBA and NAB 6 month moving average.

⁵ Source: DBM Consultants Business Financial Services Monitor. Metric based on the six month rolling average. All Australian businesses.

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

- Other consumer lending increased \$0.4 billion (up 6%) mainly due to fixed term personal loans.
- Deposits increased \$6.5 billion (up 9%) relative to system growth of 5%:
 - Growth was driven by online deposits (up \$4.8 billion) including our new RAMS online account, launched in May 2012, generating over \$1.1 billion in deposits;
 - Term deposits, primarily from businesses, increased \$2.0 billion; and
 - Savings deposits were \$1.4 billion lower with some customers switching to online accounts.

Non-interest income was up 2%:

- Good growth in credit card transaction fees including foreign purchases partially offset by softer merchant fees; and
- Ongoing repricing of business line fees to better reflect the cost of these facilities.

Operating expenses increased \$15 million (up 2%):

- Most of the rise in expenses related to the investment in Bank of Melbourne including increased employee expenses, higher occupancy costs and a rise in advertising. Costs associated with project amortisation also increased;
- Launch of new deposit products in RAMS added to advertising costs; and
- Excluding this investment, expenses were lower, including a fall in restructuring costs and benefits associated with creation of the AFS structure.

Impairment charges fell \$47 million (down 20%) with lower consumer impairment charges partially offset by higher business impairment charges:

- Consumer impairment charges declined \$60 million:
 - Mortgage 90+ day delinquencies were down 2 basis points to 58 basis points primarily due to improvements in RAMS' portfolio as a result of focus on collection activities; and
 - Other consumer delinquencies were down 11 basis points to 134 basis points largely driven by cautious consumer behaviour.
- Business impairment charges increased \$13 million mostly due to lower write-backs in Second Half 2012.

Full Year 2012 – Full Year 2011

- St.George Cash Earnings were little changed (down \$2 million) with a \$34 million increase in core earnings (up 2%) offset by higher impairment charges; and
- The year was one of two distinct halves with First Half 2012 continuing to feel the impacts of the repositioning of the business and restructuring associated with the creation of AFS. In Second Half 2012, with this repositioning complete, the business demonstrated improved momentum and good success in deepening relationships.

St.George delivered flat Cash Earnings of \$1,231 million. Core earnings were up \$34 million (up 2%) at \$2,190 million.

Net interest income was up \$36 million (up 1%) with average interest-earning assets rising 3% and margins declining:

- Margins fell 3 basis points to 2.12%:
 - Lending spreads increased 22 basis points, mostly from the repricing of mortgages and, to a lesser extent, business to better reflect increased funding costs; and
 - Deposit spreads were significantly lower due to both more competitive pricing, particularly in term deposits, and mix impacts with most new growth occurring in the higher interest rate term deposits.
- Lending up \$5.6 billion (or 4%):
 - Mortgages accounted for majority of loan growth, rising \$5.1 billion (up 5%):
 - Mortgages written through the proprietary network accounted for 62% of flows over the year; and

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

- Mortgage growth impacted by higher levels of run-offs.
- Business lending decreased moderately over the period mostly from lower commercial property lending; and
- Other consumer lending was up \$0.8 billion (up 13%) due to growth in fixed term personal loans and a modest rise in credit card balances.
- Deposits increased \$10.1 billion (up 14%) relative to system growth of 8% and more than fully funded loan growth:
 - Term deposits represented the majority of the increase rising \$6.5 billion (up 19%) sourced evenly from consumer and business customers; and
 - Other deposits (online/saving/transaction) were up \$3.6 billion (up 10%) driven by good growth in consumer online savings products.

Non-interest income was up 3%:

- Solid pick-up in foreign exchange and interest rate risk management income from good demand and strong support from WIB product specialists; and
- Income share from the sale of home and contents insurance also lifted on the back of improved cross-sell.

Operating expenses increased \$18 million (up 1%):

- Costs associated with the investment in Bank of Melbourne including increased employees, higher lease costs and higher depreciation and amortisation was the main contributor to the increase;
- Higher restructuring costs (up \$12 million) were mostly related to the AFS restructure with most recorded in First Half 2012; and
- These costs were offset by:
 - Lower professional services costs (down \$12 million) associated with the design and launch of Bank of Melbourne;
 - Productivity initiatives, including from the AFS restructure; and
 - Strong control of variable expenses.

Impairment charges were up \$40 million (up 10%) with higher consumer and business impairment charges:

- Consumer impairment charges up \$5 million:
 - Mortgage 90+ day delinquencies were up 5 basis points to 58 basis points primarily due to the ageing of loans written in 2007 and 2008; and
 - Other consumer delinquencies were up 22 basis points to 134 basis points due to deterioration in the Auto Finance portfolio; and
- Business impairment charges increased \$35 million mostly due to higher collective provisioning charges, offsetting falls in individual impairments. Stressed exposures reduced 7.5% over Full Year 2012.

¹ Income on Invested Capital represents revenue generated from investing BTFG's capital balances (required for regulatory purposes).

² Full Year 2012 includes \$11.4 billion of spot FUM and \$10.5 billion of average FUM acquired at the time of acquisition of J O Hambro.

³ Average Funds are based on six month averages for Half Year September 2012 and Half Year March 2012. Full Year September 2012 and Full Year September 2011 are based on 12 month averages.

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

Financial Performance

BTFG delivered a strong second half of the year with Cash Earnings up \$51 million or 17%. This result reflects the strength of the BT franchise with sector leading platforms, high market share of new flows and continued strong insurance and superannuation cross-sell.

Second Half 2012 – First Half 2012

- Cash Earnings increased \$51 million, or 17%, principally due to a strong performance from insurance;
 - The Funds Management result was up \$5 million or 3% with strong fund flows, improved advice revenue and higher net interest income from Private Wealth. Growth was partly offset by lower FUM/FUA margins, a lower contribution from the Equities business and higher expenses from increased investment;
 - The Insurance result was up \$54 million or 65% to \$137 million with higher earned premiums across Life and General Insurance and the seasonal nature of catastrophe claims in General Insurance (which typically sees these claims higher in the first half of the year); and
 - Contribution from Capital and other was \$8 million lower principally due to lower investment earnings.
-

Full Year 2012 – Full Year 2011

- Cash Earnings decreased \$76 million, or 10%, due primarily to the impact of lower equity markets (average ASX 200 down 8%) and investor sentiment over the period combined with increased investment in wealth platforms and in growing the financial planner network;
 - The Funds Management result was down \$101 million or 22% with good funds flows, higher net interest income from Private Wealth balances and stronger advice revenue offset by weak asset markets and a lower contribution from the Equities business;
 - The Insurance result was up \$21 million with a solid improvement in Life and General Insurance earnings offset by a fall in the contribution from Lenders Mortgage Insurance (LMI) from the prior de-risking of the portfolio and lower credit growth; and
 - Contribution from Capital and other was \$4 million higher principally driven by higher levels of capital.
-

Financial Performance

Second Half 2012 – First Half 2012

- Cash Earnings of \$181 million was up 3% with improved income from funds flows, higher net interest income from Private Wealth balances and stronger advice revenue growth partly offset by lower FUA/FUM margins, lower contribution from the Equities business and higher expenses; and
- Continuing high share of new flows from sector leading platforms supported by an expanded advice channel.

The Funds Management business delivered Cash Earnings of \$181 million, up \$5 million.

A key feature behind the performance has been the continued strong growth in sales through our broad distribution channels with particular success in sales via the branch networks of the Group's brands. Key metrics show BTFG open architecture approach to platforms, low cost BT Super for Life product and Asgard Infinity products continuing to deliver:

- Number 1 share of annual new business in BT Wrap/Asgard Platforms (including Corporate Super) (87% of annual net flows) taking market share to 20.8% (rank 1st);
- Number 1 share of annual new business in Corporate Super (69% of annual net flows) taking market share to 13.8% (rank 3rd);
- Number 1 share of annual new business in Retail Super excluding cash (with new growth more than twice the size of total system growth) lifting market share to 19.0% (rank 1st);
- BT Super for Life retail balances are up \$359 million (18%) to \$2.3 billion. Each month around 7,000 new accounts were opened and the number of active accounts on BT Super for Life continues to rise, up 12% over the half to 163,421. Asgard Infinity balances are now \$2.3 billion since launch in October 2011; and
- Revenue per salaried and aligned advisor up 4%:

Net interest income was up \$13 million (up 8%):

- An increase in mortgage and deposit margins mostly related to the Private Wealth business; and
- Partially offset by lower margin lending balances as customers continue to reduce their exposure to geared equities.

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

Non-interest income (net of commission expense) increased \$17 million, or 3%:

- FUM related revenue declined \$2 million or 1%:
 - Average FUM improved 4% over the period driven by growth in the average ASX 200 of 1%; and
 - Average FUM margins declined 2 basis points driven a change in product mix.
- FUA revenue was flat:
 - Average FUA increased 4% over the period driven by inflows onto the BT Wrap and Asgard platforms and the growth in the average ASX 200 of 1%; and
 - Average margins declined 2 basis points driven by margin compression in the platform businesses from heightened competition for flows and changes in product mix toward lower margin products.
- Advice income was up \$15 million reflecting strong insurance sales, larger average portfolio sizes and growth in planner numbers;
- Revenue from the Equities business declined \$5 million as a result of weak investor sentiment leading to lower equities broking volumes and a reduction in income from structured products; and
- Private Wealth income increased \$4 million driven by improved diversification of revenue through Direct Wealth sales.

Operating expenses increased \$33 million (up 7%):

- Higher costs associated with increased investment including expanding distribution and capability in Advice and Private Wealth, and a rise in project costs;
- Normal volume impacts related to end of financial year processing and other costs (\$17 million increase); and
- Higher employee costs related to the timing of investment management performance fees.

The impairment charge benefit of \$5 million was principally due to a reduction in the collective provision on the margin lending portfolio.

Full Year 2012 – Full Year 2011

- Cash Earnings of \$357 million, down \$101 million, or 22%.
-

Net interest income was down \$18 million (5%):

- A \$25 million reduction mostly from lower margin lending balances (down \$16 million) and lower revenue from structured product sales (down \$6 million); and
- Partially offset by increased loan and deposit balances with mortgage margin improvement offset by deposit margin compression.

Non-interest income (net of commission expense) decreased \$14 million, or 1%:

- FUM related revenue declined \$21 million or 8% (excluding J O Hambro) and increased \$52 million or 20% including J O Hambro:
 - Average FUM declined 5% (excluding J O Hambro) over the period driven by the runoff of retail products and the decline in the average ASX 200 of 8%; and
 - Average FUM margins declined 4 basis points (excluding J O Hambro) reflecting a change in product mix.
- FUA revenue increased \$7 million or 2%:
 - Average FUA increased 3% over the period driven predominately by flows and the transfer in of the Westpac Group staff superannuation to BT Super for Life Corporate, offsetting this was the decline in the average ASX 200 of 8%; and
 - Average margins improved 1 basis point driven by the repricing of corporate superannuation and platform insurance arrangements offset by platform margin compression.
- Advice and Private Wealth income was up \$23 million or 9% driven by new business revenue and higher fee income offset by lower trail commissions due to a weaker ASX 200;

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

- Income from the Equities business declined \$17 million or 41% driven by lower broking volumes and equity trading revenue;
- In asset management, the acquisition of J O Hambro added \$73 million to revenue partially offset by lower income from Ascalon mainly driven by lower seed pool mark-to-market valuations of \$11 million; and
- Partially offsetting these gains were some benefits in 2011 not repeated in 2012 totalling \$54 million. These included the sale of single manager rights, changes in the accounting treatment of certain deferred income and expense items and FX hedge gains associated with the J O Hambro acquisition.

Operating expenses increased \$110 million (up 13%):

- Costs relating to J O Hambro contributed \$51 million to expenses in Full Year 2012 which compared to pre-acquisition costs of \$13 million incurred in Full Year 2011;
- Increased investment related expenses of \$29 million including the expansion of the distribution network and initial planning associated with the development of our next generation funds platform; and
- Other costs were also higher including personnel costs, other sales related costs and compliance and regulatory costs.

Impairment charges were higher in Full Year 2012 as Full Year 2011 included more write-backs and recoveries of provisions.

Total Cash Earnings	137	83	65	220	199	11

Financial Performance

Second Half 2012 – First Half 2012

- Strong Cash Earnings of \$137 million up 65% primarily driven by higher earned premiums across Life and General Insurance and lower claims costs from the seasonal nature of catastrophe claims in General Insurance.

The Insurance business delivered Cash Earnings of \$137 million, up \$54 million, or 65%.

A key feature of the performance has been the further improvement in cross-sell of insurance across both Westpac RBB and St.George. This combined with a further expansion into the independent and aligned planner network has led to solid growth of Life in-force premiums and a rise in Life Insurance new business market share up by 72 basis points to 8.9%.

Net operating income increased \$80 million to \$268 million (up 43%):

- Life Insurance revenue increased \$14 million (11%) with in-force premiums up 11% due to strong sales, higher premiums and only a small increase in claims of \$1.3 million relative to the growing book. New business sales are stronger following the expansion of distribution to the Independent Financial Advisor (IFA) and the aligned financial advisor market;
- General Insurance revenue was up \$64 million driven by improved sales and annual pricing reviews on renewal premiums. Claims were down \$49 million compared to First Half 2012 consistent with normal seasonal movements. Home and contents penetration has also continued to improve, rising 20 basis points to 7.2%; and
- Lenders Mortgage Insurance (LMI) revenue was up \$2 million due to revenue recognition from policy cancellations offset by de-risking of the book.

Operating expenses were up \$3 million (up 4%) due to new business sales and acquisition costs.

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

Full Year 2012 – Full Year 2011

- Cash Earnings increased \$21 million, or 11% due to higher revenue from the expanded distribution network and improved sales across the Group's brands.
-

Net operating income increased \$50 million to \$456 million (up 12%):

- Life Insurance revenue increased \$30 million (up 12%) with net earned premiums rising 15%. New business sales were stronger following the expansion of distribution to the IFA and aligned financial advisor market;
- General Insurance revenue increased \$57 million with net earned premium growth of \$45 million (19%) as a result of annual pricing reviews and higher new business volumes;
- General insurance claims were \$17 million lower compared to the very high catastrophe claims in Full Year 2011; and
- LMI income was down \$36 million (down 33%) due to slowing mortgage growth and the decision to de-risk the portfolio, including no longer underwriting loans with a loan to value ratio greater than 90%.

Expenses were up \$21 million (up 18%). This included:

- Higher volume costs associated with the expanded distribution network in life insurance and additional amortisation costs associated with enabling distribution of life insurance via the IFA and aligned financial advisor market.

Financial Performance

Second Half 2012 – First Half 2012

- Strong customer business has seen Cash Earnings remain at a high level of \$739 million, up 1%;
 - Core earnings were little changed (down \$5 million) with stronger non-interest income offset by softer margins and higher expenses; and
 - Asset quality remains strong supporting a small fall in impairment charges of 5% to \$62 million.
-

WIB delivered Cash Earnings of \$739 million, up \$5 million, or 1%. Core earnings were flat at \$1,099 million.

WIB delivered a strong result in Second Half 2012 generating \$1.6 billion in revenues, a further increase of \$22 million from the very high level achieved in First Half 2012. Income was supported by good revenue in transactional banking, improved markets income and a strong contribution from Hastings. WIB has continued to maintain leadership in institutional banking highlighted by:

- Number 1 Relationship Strength¹;
- Number 1 for Overall Satisfaction²; and
- Number 1 Lead Bank³.

Net interest income was down 6% with average interest-earning assets up 1% and margins declined by 20 basis points. Components of the change included:

- The softening of the economic environment in Second Half 2012 has seen demand for credit low with modest declines in business lending and securitisation;
- Deposits increased \$12 billion, up 23% as corporates remain highly liquid, combined with the division's efforts to grow transactional deposits; and
- The decline in margins was primarily due to some non-recurring items in First Half 2012 (including the accelerated recognition of establishment fees). Loan margin pressures from competitive market conditions was offset by an improved deposit funding position.

Non-interest income increased \$78 million (up 11%), reflecting:

- Markets income was up solidly, with good flows across the business segments, particularly in interest rate products. There was a small positive movement in the CVA over the prior half;
- A \$91 million increase in Hastings contribution from performance fees including those connected with corporate activity in its listed funds; and
- Partially offsetting these increases was a lower contribution from FX&CCE.

Operating expenses increased \$27 million (up 6%):

- Higher costs associated with increased investment in Asia (more FTE and expanding infrastructure) and extending our Trade capability;
- Timing of performance related remuneration contributed to a rise in Second Half 2012; and
- Annual expense increases were partially offset by strong control of variable expenses.

Asset quality has remained solid and combined with the sale of some stressed assets has contributed to a \$3 million fall in the impairment charge. Key movements in the half included:

- A lower number of top-ups to existing provisions offset by lower write-backs;
- Small number of stressed exposures moving into impaired; and
- A reduction in watchlist and substandard exposures from repayments and upgrades following improved financial performance has contributed to lower collective provisions.

³ Peter Lee Associates Large Corporate & Institutional Relationship Banking survey, Australia 2004 (Equal No. 1) 2005, 2007 (Equal No. 1), 2009, 2010 (Equal No. 1), 2012.

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

Full Year 2012 – Full Year 2011

- WIB delivered Cash Earnings of \$1,473 million, (up 3%);
 - Strong core earnings (up 13%), were driven by improved revenues across all businesses; and
 - Impairment charges moved from a benefit of \$90 million in Full Year 2011, to a charge of \$127 million in Full Year 2012.
-

Net interest income was flat with average interest-earning assets up \$3 billion (up 5%) offset by an 11 basis point decline in margins:

- Lending rose \$2 billion due to an increase in business lending and trade finance from both solid demand and from increased resources devoted to this sector, particularly in Asia;
- Deposits increased \$16 billion, up 34% from both a more concerted focus on transactional business and a preference of corporates to remain highly liquid; and
- Margins decreased 11 basis points to 2.49% primarily due to a lower proportion of markets income recorded as net interest income and increased competition for lending.

Non-interest income increased \$302 million (up 26%), reflecting:

- Strong growth in Markets income from both improved customer flows and a stronger risk management performance;
- A \$130 million increase in revenue from Hastings including the impact from corporate activity in the division's listed funds; and
- These increases were partially offset by CVA, which was a charge of \$58 million in Full Year 2012 compared to a \$16 million benefit in Full Year 2011.

Operating expenses increased \$49 million (up 5%):

- Increasing the division's investment in Asia has contributed to higher FTE and increased technology costs, which was partially offset by controlled variable expenses.

Asset quality improved over the year although the rate of reduction in stressed assets has slowed. Full Year 2011 had an impairment benefit of \$90 million and in Full Year 2012 an impairment charge of \$127 million:

- In Full Year 2011 write-backs and recoveries totalled \$305 million whereas in Full Year 2012 write-backs and recoveries were \$206 million accounting for a large portion of the movement in impairment charges;
- Further top-ups to provisions on existing stressed and impaired assets as valuations ease;
- Downgrades to some companies coming under pressure from the high Australian dollar and soft consumer spending; and
- Partially offset by reduction in new stress, sale of some exposures and some companies returning to full health from asset sales and improved cash flows.

4.3 Westpac New Zealand

Westpac New Zealand is responsible for sales and service of banking, wealth and insurance products for consumers, business and institutional customers in New Zealand. Westpac conducts its New Zealand banking business through two banks in New Zealand: Westpac New Zealand Limited, which is incorporated in New Zealand and Westpac Banking Corporation (NZ Division), a branch of Westpac, which is incorporated in Australia. The division operates via an extensive network of branches and ATMs across both the North and South Islands. Business and institutional customers are also served through relationship and specialist product teams. Banking products are provided under the Westpac and WIB brands while insurance and wealth products are provided under Westpac Life and BT brands, respectively. All figures are in New Zealand dollars (NZ\$).

Financial Performance (NZ\$)

Second Half 2012 – First Half 2012

- Westpac New Zealand delivered a good performance with a 3% uplift in core earnings and a 4% increase in Cash Earnings;
 - The result reflects the increased investment in the franchise over recent years and was supported by higher margins, good balance sheet growth and a deepening of customer relationships from increased cross-sell of wealth and insurance products; and
 - Strong deposit growth together with sustainable lending growth resulted in an increase in the customer deposit to loan ratio.
-

Over recent years, Westpac New Zealand has made a significant investment in its front line, including banker training, improved technology and a redesigned branch network. These changes have contributed to sound growth, improved cross-sell through better meeting customers' financial needs and improved risk decisioning. These strategic changes continue to be reflected in the division's strong performance including the 4% uplift in Cash Earnings and an improvement across key metrics:

- Deposit to loan ratio improved 3 percentage points to 71%;
- Customers with 4+ products have risen 62 basis points to 49.6%;
- Revenue per FTE up 1%;
- Customers with wealth products increased from 21.2% to 23.4%; and
- The number of active online customers increased 2% and mobile banking customers increased six-fold.

Net interest income increased \$19 million (up 2%) driven by a 2% rise in average interest-earning assets and improved margins:

- Margins increased 2 basis points to 2.73%:
 - Improved spreads, particularly fixed rate mortgages and from the continued repricing of business term lending; and
 - Partially offset by tighter deposit spreads from both strong competition and mix impacts given most growth was in lower spread term deposits.
- Total lending increased \$1.2 billion (up 2%):
 - Business lending increased \$0.8 billion (up 4%) with growth across both business and institutional balances. Key growth areas were in the agricultural, mining and media/telecommunication sectors; and
 - Mortgages increased \$0.5 billion (up 1%) in a very competitive low growth market.
- Deposits increased \$2.6 billion (up 7%), relative to system growth of 4%. The rise in deposits was more than double that of lending contributing to a 3 percentage point rise in the deposit to loan ratio:
 - Term deposits increased \$2.2 billion (up 11%); and
 - Other deposits increased \$0.4 billion (up 2%) with most growth in personal online savings and business savings accounts.

Non-interest income increased \$5 million (up 2%) with improved cross-sell the main contributor to the rise including:

- Higher wealth management income with funds under management rising 13% over Second Half 2012; and
- Strong insurance premium growth and favourable claims experience.

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

Operating expenses increased \$7 million (up 2%):

- Operating expenses were well managed with the modest increase driven by wage inflation, continued investment in technology, including the roll-out of more smart ATMs and the new public website with improved functionality and enhanced online security features. These were partially offset by ongoing productivity initiatives, including the roll-out of paper-free lending across the retail network.

The further improvement in asset quality has contributed to a \$5 million decline (5%) in impairment charges:

- A continued decline in business stressed assets, down \$0.2 billion;
- Reduced collective provision charges from improving consumer asset quality including declines of 15 basis points and 16 basis points in 90+ day delinquencies for mortgages and other consumer lending respectively; and
- Partially offset by a small number of pre-2007 exposures requiring an increase in the amount of impairment provisions.

Full Year 2012 – Full Year 2011

- Very strong Cash Earnings growth up \$129 million or 22% to \$707 million supported by strong core earnings growth of 10% and a 21% reduction in impairment charges; and
- Core earnings were driven by a 7% uplift in operating income from good balance sheet growth including strong deposit growth of 11%, improved margins, and a solid uplift in wealth and insurance cross-sell.

Key metrics over the year:

- Total customer numbers up 1%;
- Customers with 4+ products up 4%;
- Revenue per FTE up 8%; and
- Customers with wealth products increased more than 4 percentage points from 19.1% to 23.4%.

Net interest income increased \$91 million (up 6%) with an 8 basis point rise in margins and a 3% increase in average interest-earning assets:

- Margins increased from 2.64% to 2.72%, mostly from improved mortgage and business lending spreads;
- Total lending increased \$1.8 billion (up 3%) in line with system:
 - Mortgage balances outstanding increased \$1.0 billion (up 3%) whilst business and institutional lending increased \$0.8 billion (up 4%).
- Deposits increased \$4.0 billion (up 11%) ahead of system retail deposit growth of 9%:
 - Term deposits increased \$2.3 billion (up 11%) and other deposits increased \$1.7 billion (up 10%) driven by growth in consumer online savings and business transaction accounts; and
 - The \$4.0 billion rise in deposits was significantly higher than the increase in lending leading to a 5 percentage point rise in the deposit to loan ratio to 71%.

Non-interest income increased \$36 million (up 9%) driven by:

- Improved cross-sell contributing to strong insurance premium growth, and increased wealth fee income; and
- Increased business and institutional fees.

Operating expenses increased \$22 million (up 3%):

- Most of the rise was due to normal annual salary increases and higher occupancy costs associated with adding 6 new branches to the network in 2011;
- Technology costs were also higher from both investment and volume driven demand; and
- These increases were offset by productivity initiatives contributing to lower average FTE and lower costs associated with the completion of the transfer of the New Zealand institutional business from WIB to Westpac New Zealand. The transfer was completed during the first quarter of Full Year 2012.

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

Impairment charges decreased \$50 million (down 21%) as asset quality continued to improve:

- Collective provisions improved from declines in mortgage and other consumer 90+ day delinquencies by 20 basis points and 8 basis points respectively;
- Lower individually assessed provisions in the year; and
- Partially offset by a small number of pre-2007 exposures requiring an increase in the amount of impairment provisions.

A change in the corporate tax rate from 30% to 28% effective from 1 October 2011 contributed to a reduction in the division's tax rate in Full Year 2012.

4.4 Pacific Banking

Pacific Banking provides banking services for retail and business customers in seven Pacific Island Nations. Branches, ATMs, telephone banking and internet banking channels are used to deliver business activities in Fiji, Papua New Guinea (PNG), Vanuatu, Cook Islands, Tonga, Solomon Islands and Samoa. Pacific Banking's financial products include personal savings, business transactional accounts, personal and business lending products, business services and a range of international products.

Financial Performance

Second Half 2012 – First Half 2012

- Cash Earnings down 5% with a 4% uplift in core earnings offset by higher impairment charges; and
- Core earnings growth driven by a 6% increase in net interest income and a 6% reduction in operating expenses partly offset by lower markets income.

Pacific Banking delivered core earnings of \$105 million, up \$4 million, driven by solid performances across all regions. Cash Earnings of \$52 million were a little lower with the rise in core earnings offset by higher impairment charges from the softer economic conditions in some regions. Earnings across the region have been supported by modest economic growth, good foreign exchange earnings and a dramatic increase in customer numbers as the business has expanded its provision of basic banking services to people who previously did not hold a bank account. Providing basic accounts, combined with financial education, is introducing banking to a much broader proportion of the community and assisting in the development of these Pacific nations. Approximately 10,000 new transaction accounts are being set up each month.

Translation gains from movements between the \$A and local currencies benefited Cash Earnings by 4% in Second Half 2012. Excluding the impact of these movements Cash Earnings were down by 9% and core earnings increased 1%.

Net interest income increased 6%, (up 4% in local currency) reflecting:

- Deposits were up 4%, mostly in transactional and savings accounts; and
- Margins were up 17 basis points as strong liquidity levels in key markets contributed to lower deposit yields offsetting falling lending spreads from intense competition.

Non-interest income decreased 4% to \$74 million (down 8% in local currency) driven by:

- Lower foreign exchange volumes and tighter foreign exchange spreads, following a very strong First Half 2012; and

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

- The decline was partially offset by an increase in ATM and transaction fee revenue driven by the rise in the number of new accounts opened.

Operating expenses decreased \$3 million, down 6% (down 8% in local currency):

- Productivity improvements across the region more than offset higher personnel costs and charges from the amortisation of technology projects.

Impairment charges increased \$11 million to \$21 million:

- Impacted by subdued economic conditions in the smaller Pacific island nations;
 - Increased collectively assessed provisions from downgrades to a number of businesses; and
 - Further impairment of a significant exposure in Vanuatu.
-

Full Year 2012 – Full Year 2011

- Cash Earnings were up 41% with a strong rise in core earnings of \$63 million and favourable movements in exchange rates offsetting a \$6 million increase in impairment charges; and
 - Core earnings growth of 44% driven by a 22% increase in net interest income and 41% uplift in non-interest income.
-

Pacific Banking delivered strong Cash Earnings growth of \$31 million to \$107 million driven by solid performances across all regions. Translation gains for movements between the \$A and local currencies benefited Cash Earnings by 17% during Full Year 2012. Adjusting for these movements Cash Earnings were still up a strong 24% and core earnings increased 28%.

Net interest income increased 22% to \$148 million (12% up in local currency):

- Average interest-earning assets increased 17% through strong lending growth and higher holdings of liquid assets;
- Deposits were up 4%, with the mix shifting from term deposits into savings and transactional accounts; and
- Margins were up 14 basis points with improved deposit spreads partially offset by increased levels of lower yielding liquid assets.

Non-interest income grew 41% (27% higher in local currency) driven by higher foreign exchange volumes and improved market spreads. Fee income improved driven by net customer growth of approximately 68,000 to over 361,000.

Operating expenses increased 9% (up 4% in local currency), as higher personnel costs and amortisation of technology projects were partially offset by productivity improvements.

Impairment charges increased \$6 million to \$31 million predominately driven by further impairment of a significant exposure in Vanuatu.

RESULTS

4.5 Group Businesses

This segment comprises:

- Group items, including earnings on capital not allocated to divisions, accounting entries for certain intra-group transactions that facilitate the presentation of the performance of our operating segments earnings from non-core asset sales and certain other head office items such as centrally raised provisions;
- Group Services, which encompasses technology, banking operations, legal and property services;
- Treasury, the primary focus of which is the management of the Group's interest rate risk and funding requirements by managing the mismatch between Group assets and liabilities. Treasury's earnings are primarily impacted by the hedging decisions taken on behalf of the Group to manage net interest income outcomes and assist net interest income growth; and
- Core Support, which comprises those functions performed centrally, including finance, risk and human resources.

Financial Performance

Second Half 2012 – First Half 2012

Features:

- Higher net operating income from Treasury;
- Lower non-interest income as asset sales in First Half 2012 were not repeated; and
- Increase in centrally held economic overlay impairment provision.

Cash Earnings decreased \$54 million or 21% from lower net operating income and higher impairment charges.

Net operating income decreased \$26 million (5%) to \$454 million. Net interest income decreased \$7 million or 2%, driven by lower earnings on surplus capital and increased cost of new hybrid and subordinated debt issues partially offset by improved Treasury performance. The decrease in non-interest income was driven by the sale of shares in Visa Inc. in First Half 2012 not repeated in Second Half 2012. Operating expenses are broadly in line with First Half 2012.

Impairment charges rose to \$50 million in Second Half 2012 following an increase in existing centrally held economic overlay impairment provision related to sectors undergoing structural change. During Second Half 2012 the economic overlay increased \$18 million, however, the composition of the overlay changed over the period and there was a release of some economic overlay provisions held in the Divisions.

The effective tax rate increased in Second Half 2012 as a result of more income earned in higher tax jurisdictions.

FULL YEAR RESULTS 2012
DIVISIONAL
RESULTS

Full Year 2012 – Full Year 2011

Features:

- Treasury net operating income increased 17%;
 - Asset sales broadly unchanged; and
 - Increase in centrally held economic overlay for impairment charges.
-

Cash Earnings were 13% lower as higher net operating income was offset by higher operating expenses, higher impairment charges and a higher effective tax rate.

Net interest income increased \$114 million primarily from improved Treasury income (\$95 million).

Non-interest income increased \$35 million on Full Year 2011 reflecting higher research and development tax credits. Profit from asset sales was broadly unchanged.

Operating expenses increased from higher restructuring expenses and employee provisions.

The increase in impairments reflects changes to the centrally held economic overlay impairment provisions with Full Year 2011 recording a release in economic overlay provisions consistent with the very strong economic environment compared with a modest increase in the economic overlay in Full Year 2012.

The effective tax rate increased from 26.1% in Full Year 2011 to 34.8% in Full Year 2012. Full Year 2011 included a higher benefit from the release of excess tax provisions.

Treasury Value at Risk (VaR)

Risk taking as measured by VaR remained at a moderate level over the period. Average daily VaR for Full Year 2012 was \$31.6 million compared to \$30.6 million for Full Year 2011.

Average daily VaR for Second Half 2012 was \$29.7 million compared to \$33.4 million for First Half 2012 and \$33.1 million for Second Half 2011. The decrease reflects a reduction in the average exposure to short dated AUD interest rate risk.

5.6 Notes to Full Year 2012 Reported Financial Information

Note 1. Basis of preparation of financial information

The accounting policies and methods of computation adopted in the financial year were in accordance with the requirements for an authorised deposit-taking institution under the Banking Act 1959 (as amended), Australian accounting standards (A-IFRS), other authoritative pronouncements of the Australian Accounting Standards Board, Urgent Issue Group Interpretations and the Corporations Act 2001. Westpac's financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board. Where necessary, comparative figures have been adjusted to conform to changes in presentation in the current period. All amounts have been rounded to the nearest million dollars unless otherwise stated.

TOFA tax consolidation adjustment ⁴	165	-	-	165	-	-
Other items ⁵	(48)	21	large	(27)	28	196
Total income tax expense in the income statement	1,499	1,327	(13)	2,826	1,455	(94)
Effective income tax rate	33.1%	30.7%	(240bps)	31.9%	17.1%	large
Effective tax rate (excluding life company accounting)	33.0%	30.5%	(250bps)	31.8%	17.2%	large

¹ During 2012 the company tax rates in the UK and Fiji reduced from 26% to 24%, and 28% to 20% respectively. The impact of these changes has been taken into account in the measurement of deferred tax at the end of the reporting period. The impact of the change in New Zealand's company tax rate from 30% to 28% was included in 2011.

² In accordance with the requirements of AASB 1038, tax expense for 2012 includes a \$12 million tax charge on policyholders' investment earnings (2011: \$14 million tax benefit) of which \$4 million is a prima facie tax expense (2011: \$4 million tax benefit) and the balance of \$8 million tax expense (2011: \$10 million tax benefit) is shown here.

³ Following the redemption of St.George Bank Limited's hybrid instruments on 31 March 2009, St.George and all its wholly owned Australian subsidiaries joined the Westpac tax consolidated group. Westpac was required to reset the tax value of certain St.George assets to the appropriate market value of those assets. Given the complexity of this process, the assessed tax treatment for the 2009 and 2010 financial years was finalised and the approach agreed with the ATO in October 2010. The assessed tax treatment for the 2011 financial year and following years was agreed with the ATO in March 2011 and gave rise to a reduction of income tax expense of \$1,110 million.

⁴ New legislation that included retrospective amendments to the income tax law as it applies to the Taxation of Financial Arrangements (TOFA) and tax consolidated groups was introduced during the 2012 financial year. The amendments have an adverse application to certain liabilities that were consolidated as part of the St.George merger. This gave rise to an additional income tax expense of \$165 million for the 2012 financial year.

⁵ This includes adjustments to leasehold improvements.

The Group operates a DRP that is available to holders of fully paid ordinary shares who are resident in, or whose address on the register of shareholders is in Australia or New Zealand. As noted in Section 3.5, the Directors have made certain determinations in relation to the calculation of the Market Price which will apply to the DRP for the 2012 final dividend only. Shareholders who wish to commence participation in the DRP, or to vary their current participation election, must complete and return a DRP election form to Westpac's share registry by 5.00pm (Sydney time) on 15 November 2012 which is the record date for the final 2012 dividend.

Earnings per ordinary share (cents)	98.1	95.5	97.8	94.5	195.8	190.5	233.0	223.6

¹ While the equity granted to employees remains unvested, Restricted Share Plan (RSP) treasury shares are deducted from ordinary shares on issue in arriving at the weighted average number of ordinary shares outstanding. Despite the shares being unvested, employees are entitled to dividends and voting rights on the shares. Consequently, a portion of the profit is allocated to RSP Treasury shares to arrive at earnings attributed to ordinary shareholders.

¹ Corporate – Typically includes exposure where the borrower has annual turnover greater than \$50 million and other business exposures not captured under the definitions of either Business Lending or Small Business.

² Business Lending – Includes exposures where the borrower has annual turnover less than or equal to \$50 million and exposure greater than \$1 million.

³ Sovereign – Includes exposures to Governments themselves and other non-commercial enterprises that are owned or controlled by them.

⁴ Bank – Includes exposures to licensed banks and their owned or controlled subsidiaries and overseas central banks.

⁵ Small Business – Includes exposures less than or equal to \$1 million.

⁶ Specialised Lending: Property & Project Finance – Includes exposures to entities created to finance and/or operate specific assets where, apart from the income received from the assets being financed, the borrower has little or no independent capacity to repay from other activities or assets.

⁷ Securitisation – Exposures reflect Westpac's involvement in activities ranging from originator to investor and include the provision of securitisation services for clients wishing to access capital markets.

⁸ Operational Risk – The risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, including legal risk but excluding strategic or reputational risk.

FINANCIAL INFORMATION

Note 19. Derivative financial instruments (continued)

Value at Risk (VaR) is used as the primary method for measuring and monitoring market risk exposure against Board approved limits. VaR is an estimate of the worst case loss in the value of trading positions, to a 99% confidence level, assuming positions were held unchanged for one day. The types of market risk arising from trading activity include interest rate, foreign exchange, commodity, equity, credit spread and volatility risks. The table below depicts the aggregate Markets VaR for the last three half year reporting periods.

Markets - Daily Value at Risk (VaR)¹

\$m	High	Low	Average
Six months ended 30 September 2012	10.2	3.1	5.3
Six months ended 31 March 2012	12.7	4.0	8.3
Six months ended 30 September 2011	14.6	6.7	10.2

Average	Half Year 30 Sept 2012	Half Year 31 March 2012	Half Year 30 Sept 2011
\$m			
Interest rate risk	4.4	4.5	8.3
Foreign exchange risk	2.3	4.0	3.2
Equity risk	0.6	0.5	0.6
Commodity risk ²	1.7	3.2	3.5
Other market risks ³	2.1	3.2	4.3
Diversification benefit	(5.8)	(7.1)	(9.7)
Net market risk	5.3	8.3	10.2

Treasury's Traded Risk and Non-Traded Interest Rate Risk

\$m	High	Low	Average
Six months ended 30 September 2012	40.0	14.9	29.7
Six months ended 31 March 2012	41.7	26.3	33.4
Six months ended 30 September 2011	47.8	22.9	33.1

¹ The daily VaR presented in Note 19 above reflects a divisional view of VaR being the VaR for Markets and the VaR for Treasury's traded risk and non-traded interest rate risk. This presentation aligns with the presentation of Markets and Treasury, as referred to in Sections 3.2.2 and 4.5 respectively. It varies from the presentations of VaR in Westpac's 2012 Annual Report and Australian Prudential Standard (APS) 330 Prudential Disclosure under Basel II where market risk disclosures are segregated as trading and banking book. The different treatment reflects the aggregation of Treasury's trading activities with those of Markets in the trading VaR disclosure under the Basel II presentation whereas these activities are included in Treasury's traded risks and non-traded interest rate risk in the table above.

² Includes electricity risk.

³ Includes prepayment risk and credit spread risk (exposures to movements in generic credit rating bands).

Note 23. Contingent liabilities

Litigation

Contingent liabilities exist in respect of actual and potential claims and proceedings. An assessment of the Group's likely loss has been made on a case-by-case basis for the purpose of the financial statements and specific provisions have been made where appropriate.

- Westpac has been served with two separate class action proceedings by customers seeking to recover exception fees paid by those customers. The first set of proceedings was commenced by customers of the Westpac brand; the second by customers of the St.George Bank and BankSA brands. Westpac has agreed with the plaintiffs to put the proceedings against Westpac, St.George and BankSA on hold until at least December 2012, pending further developments in similar litigation commenced against another Australian bank.
- Westpac was one of 20 defendant banks named in proceedings concerning the Bell Group of companies. The proceedings were brought by the liquidators of several Bell Group companies who challenged the defendant banks' entitlement to receive the proceeds of realisation of Bell Group assets in the early 1990s. Judgment was delivered on 28 October 2008 and final orders were handed down on 30 April 2009.

Westpac, along with the other defendant banks, was found liable to repay its share of the monies received from the Bell Group plus interest. The defendant banks appealed the decision. Judgment was handed down by the Court of Appeal of the Supreme Court of Western Australia on 17 August 2012. By a majority decision, the defendant banks were unsuccessful in the appeal and the amount of interest payable was increased. Westpac considers that appropriate provisioning has been made for this matter. The defendant banks have applied for special leave to appeal to the High Court of Australia, however, the outcome and timing of the application for special leave and, if granted, the appeal are uncertain. Westpac is also entitled to lodge a claim as a creditor in the liquidation of the Bell Group.

Note 24. Events subsequent to balance date

No matter or circumstance has arisen since the year ended 30 September 2012 which is not otherwise dealt with in this report, that has significantly affected or may significantly affect the operations of the Group, the results of its operations or the state of affairs of the Group in subsequent periods.

7.2 Disclosure Regarding Forward-Looking Statements

This Full Year Results Announcement contains statements that constitute 'forward-looking statements' within the meaning of Section 21E of the *US Securities Exchange Act of 1934*.

Forward-looking statements are statements about matters that are not historical facts. Forward-looking statements appear in a number of places in this Annual Report and include statements regarding our intent, belief or current expectations with respect to our business and operations, market conditions, results of operations and financial condition, including, without limitation, future loan loss provisions and financial support to certain borrowers. We use words such as 'will', 'may', 'expect', 'intend', 'seek', 'would', 'should', 'could', 'continue', 'plan', 'estimate', 'anticipate', 'believe', 'probability', 'risk' or other similar words to identify forward-looking statements. These forward-looking statements reflect our current views with respect to future events and are subject to change, certain risks, uncertainties and assumptions which are, in many instances, beyond our control, and have been made based upon management's expectations and beliefs concerning future developments and their potential effect upon us. There can be no assurance that future developments will be in accordance with our expectations or that the effect of future developments on us will be those anticipated. Actual results could differ materially from those which we expect, depending on the outcome of various factors, including, but not limited to:

- the effect of, and changes in, laws, regulations, taxation or accounting standards or practices and government policy, particularly changes to liquidity, leverage and capital requirements;
- the stability of Australian and international financial systems and disruptions to financial markets and any losses or business impacts Westpac or its customers or counterparties may experience as a result;
- market volatility, including uncertain conditions in funding, equity and asset markets;
- adverse asset, credit or capital market conditions;
- changes to our credit ratings;
- levels of inflation, interest rates, exchange rates and market and monetary fluctuations;
- market liquidity and investor confidence;
- changes in economic conditions, consumer spending, saving and borrowing habits in Australia, New Zealand and in other countries in which Westpac or its customers or counterparties conduct their operations and our ability to maintain or to increase market share and control expenses;
- the effects of competition in the geographic and business areas in which Westpac conducts its operations;
- reliability and security of Westpac's technology and risks associated with changes to technology systems;
- the timely development and acceptance of new products and services and the perceived overall value of these products and services by customers;
- the effectiveness of our risk management policies, including our internal processes, systems and employees;
- the occurrence of environmental change or external events in countries in which Westpac or its customers or counterparties conduct their operations;
- internal and external events which may adversely impact our reputation;
- changes in political, social or economic conditions in any of the major markets in which Westpac or its customers or counterparties operate;
- the success of strategic decisions involving business expansion and integration of new businesses; and
- various other factors beyond Westpac's control.

The above list is not exhaustive. For certain other factors that may impact on forward-looking statements made by us, refer to 'Risk factors' under the section 'Risk and risk management'. When relying on forward-looking statements to make decisions with respect to us, investors and others should carefully consider the foregoing factors and other uncertainties and events.

Westpac is under no obligation, and does not intend, to update any forward-looking statements contained in this Full Year Results Announcement, whether as a result of new information, future events or otherwise, after the date of this Full Year Results Announcement.

7.3 Financial Calendar

Westpac shares are listed on the securities exchanges in Australia (ASX) and New Zealand and as American Depositary Receipts in New York. Westpac Convertible Preference Shares (Westpac CPS) and Westpac Stapled Preferred Securities (Westpac SPS and Westpac SPS II) are listed on the ASX.

Important dates for shareholders to note over the following months are:

Ex-dividend date for final dividend	9 November 2012
Record date for final dividend (Sydney) ¹	15 November 2012
Record date for final dividend (New York) ²	14 November 2012
Annual General Meeting ³	13 December 2012
Final dividend payable	20 December 2012

Important dates for Westpac CPS investors to note over the following months are:

Record date for March 2013 semi-annual dividend	22 March 2013
Payment date for March 2013 semi-annual dividend	2 April 2013

Important dates for Westpac SPS and Westpac SPS II investors to note over the following months are:

Record date for December 2012 quarter distribution	21 December 2012
Payment date for December 2012 quarter distribution	31 December 2012
Record date for March 2013 quarter distribution	22 March 2013
Payment date for March 2013 quarter distribution	2 April 2013

¹ Transaction and integration expenses related to the St. George merger.

² Amortisation of intangible assets reflects the amortisation of St. George intangible assets including the core deposit intangible and credit card and financial planner relationships.

³ Impact of finalisation of tax consolidation impact in relation to the merger with St. George for the years subsequent to 2010.

Notes

Cash Earnings Adjustments

(1) *Policyholder tax recoveries*

The Life Insurance standard AASB 1038 requires the grossing up of tax expense and income for the tax on earnings applicable to holders of our life policies (policy holders tax recoveries). Westpac reverses the impact of this gross up to provide comparability across reporting periods.

(2) *Hybrid revaluations*

TPS revaluations

Adjustment for movements in economic hedges, including associated tax effects impacting the Foreign Currency Translation Reserve, relating to hybrid instruments classified as non-controlling interests. The adjustment is required as these hybrid instruments are not fair valued, however, the hedges are fair valued and therefore, there is a mismatch in the timing of income recognition in the reported results. The mismatch is added back to reported results in deriving Cash Earnings as it does not affect the Group's profits over time.

(3) *Treasury shares*

Under A-IFRS, Westpac shares held by the Group in the managed funds and life business are deemed to be Treasury shares and the results of holding these shares are not permitted to be recognised as income in the reported results. In deriving Cash Earnings, these results are included to ensure there is no asymmetrical impact on the Group's profits because the Treasury shares support policyholder liabilities and equity derivative transactions which are re-valued in deriving income.

(4) *Fair value gain/(loss) on other economic hedges (which do not qualify for hedge accounting under A-IFRS) comprises:*

- The unrealised fair value gain/(loss) on foreign exchange hedges of future New Zealand earnings impacting non-interest income is reversed in deriving Cash Earnings as they may create a material timing difference on reported earnings but do not affect the Group's Cash Earnings during the life of the hedge;
- the unrealised fair value gain/(loss) on foreign exchange hedges of fees payable for the use of the Government guarantee on foreign denominated wholesale funding is reversed in deriving Cash Earnings as they may create a material timing difference on reported earnings but do not affect the Group's Cash Earnings during the life of the hedge; and
- the unrealised fair value gains/(losses) on hedges of accrual accounted term funding transactions are reversed in deriving Cash Earnings as they may create a material timing difference on reported earnings but do not affect the Group's Cash Earnings during the life of the hedge.

(5) *Ineffective hedges*

The gain/(loss) on ineffective hedges is reversed in deriving Cash Earnings for the period because the gain or loss arising from the fair value movement in these hedges reverses over time and does not affect the Group's profits over time.

(6) *Gain/(loss) on buyback of Government guaranteed debt*

During 2011, the Group bought back some Government guaranteed debt which reduced Government guarantee fees (70 basis points) paid. In undertaking the buybacks, in addition to the 70 basis points fee saving, a cost was incurred reflecting the difference between current interest rates and the rate at which the debt was initially issued. In the reported result, the cost incurred is recognised at the time of the buybacks. In Cash Earnings, the cost incurred is being amortised over the original term of the debt that was bought back. The Cash Earnings adjustment gives effect to the timing difference between reported earnings and Cash Earnings.

(7) *Supplier Program*

In Full Year 2012, the Group incurred and provisioned for non-recurring expenses as part of its program to increase the use of global specialists in certain technology and back office operations. These expenses included costs associated with streamlining and better documenting systems and processes, technology costs to enable infrastructure and enhance interaction with suppliers, and costs associated with restructuring the workforce. Given the significant size of these expenses and that they are not considered in determining dividends they are being treated as Cash Earnings adjustments.

(8) *Litigation Provision*

The Group recognised a provision of \$111 million (\$78 million after tax) with respect to longstanding legal proceedings. This has been treated as a Cash Earnings adjustment due to its size, the historical nature of the proceedings and it does not reflect ongoing operations.

(9) *Tax Provision*

In Full Year 2011, the Group increased tax provisions by \$70 million in respect of certain existing positions for transactions previously undertaken by the Group. The increase reflected the recent trend of global taxation authorities challenging the historical tax treatment of cross border and complex transactions. This increase in tax provisions was treated as a Cash Earnings adjustment as it related to the global management of existing tax positions and does not reflect ongoing operations. The Group's management of tax positions has moved to disclosing any such transactions to the taxation authorities at or around the time of execution.

(10) *St.George merger and J O Hambro acquisition related Cash Earnings adjustments*

- (a) as part of the merger with St.George, transaction and integration expenses incurred over three years following the merger were treated as a Cash Earnings adjustment as they did not impact the earnings expected from St.George following the integration period. The integration project was completed in Full Year 2011;
- (a) the accounting for the merger with St.George resulted in the recognition of fair value adjustments on the St.George retail bank loans, deposits, wholesale funding and associated hedges, with these fair value adjustments being amortised over the life of the underlying transactions. The amortisation of these adjustments is considered to be a timing difference relating to non-cash flow items that do not affect cash distributions available to shareholders and therefore, has been treated as a Cash Earnings adjustment;
- (a) tax consolidation adjustment – finalisation of tax consolidation related to the merger with St.George gave rise to a reduction in income tax expense of \$1,110 million in First Half 2011. The tax consolidation process required Westpac to reset the tax value of certain St.George assets to the appropriate market value of those assets as at the effective date of the tax consolidation (31 March 2009). These adjustments have been treated as a Cash Earnings adjustment due to their size and because they do not reflect ongoing operations;
- (a) TOFA tax consolidation adjustment - New legislation that included retrospective amendments to the income tax law as it applies to the TOFA and tax consolidated groups was introduced during the 2012 financial year. The amendments have an adverse application to certain liabilities that were consolidated as part of the merger with St.George. This gave rise to an additional income tax expense of \$165 million for the 2012 financial year. Consistent with other tax adjustments relating to the merger with St.George this adjustment has been treated as a Cash Earnings adjustment due to its size and because it does not reflect ongoing operations;
- (b) amortisation of intangible assets – The merger with St.George resulted in the recognition of core deposit intangibles and customer relationships intangible assets that are amortised over their useful lives, ranging between five and nine years. The amortisation of intangible assets (excluding capitalised software) is a Cash Earnings adjustment because it is a non-cash flow item and does not affect cash distributions available to shareholders; and

FULL YEAR RESULTS 2012
GROUP
RECONCILIATIONS

- (b) amortisation of intangible assets – The acquisition of J O Hambro, previously a privately owned London-based equity investment manager, by BT Investment Management (BTIM) during First Half 2012 resulted in the recognition of management contract intangible assets. These intangible items are amortised over their useful lives, ranging between five and twenty years. The amortisation of intangible assets (excluding capitalised software) is a Cash Earnings adjustment because it is a non-cash flow item and does not affect cash distributions available to shareholders.

FULL YEAR RESULTS 2012

ECONOMIC PROFIT

10.0 ECONOMIC PROFIT

Group economic profit is defined as Cash Earnings less a capital charge calculated at 11% of average ordinary equity plus a value on franking credits.

Divisional economic profit is defined as Cash Earnings less a capital charge. The capital charge is calculated at 11% on allocated capital plus 70% of the value of Australian tax paid.

Economic profit is used as a key measure of financial performance because it focuses on shareholder value generated by requiring a return in excess of a risk-adjusted cost of capital.

11.0 GLOSSARY

Earnings	Cash Earnings	Net profit attributable to owners of WBC adjusted for the impact of the economic hedges related to TPS, earnings from Treasury shares, gains/losses on ineffective hedges, the impact of unrealised New Zealand earnings hedges gains/losses, and the impact of integration costs and the amortisation of certain intangibles in relation to the merger with St.George, fair value gains/losses on economic hedges, tax consolidation adjustment, buyback of Government guaranteed debt, provision adjustment, costs associated with the supplier program, the amortisation of intangibles relating to the acquisition of J O Hambro, TOFA tax consolidation adjustment and a litigation provision.
	Core earnings	Core earnings is operating profit, before income tax and impairment charges.
Shareholder Value	Earnings per ordinary share	Net profit attributable to the owners of WBC divided by the weighted average ordinary shares (statutory basis).
	Cash Earnings per ordinary share	Cash- Earnings divided by the weighted average ordinary shares (Cash Earnings basis).
	Weighted average ordinary shares (Cash Earnings)	Weighted average number of fully paid ordinary shares listed on the ASX for the relevant period.
	Weighted average ordinary shares (reported)	Weighted average number of fully paid ordinary shares listed on the ASX for the relevant period less Westpac shares held by the Group ('Treasury shares').
	Fully franked dividends per ordinary shares (cents)	Dividends paid out of retained profits which carry a credit for Australian company income tax paid by Westpac.
	Dividend payout ratio – net profit	Ordinary dividend per share divided by net profit per share attributable to the owners of WBC.
	Dividend payout ratio – Cash Earnings	Ordinary dividend divided by Cash Earnings.
	Return on equity (ROE)	Net profit attributable to the owners of WBC divided by average ordinary equity.
	Cash ROE	Cash Earnings divided by average ordinary equity.
	Cash Earnings to average tangible equity	Cash Earnings divided by average tangible ordinary equity.
	Economic profit – Group	Cash Earnings less a capital charge calculated at 11% of average ordinary equity plus a value on franking credits calculated as 70% of the Group's Australian tax expense.
	Economic Profit – Divisions	Cash Earnings less a capital charge calculated at 11% of allocated capital plus 70% of the value of Australian tax paid.
	Average ordinary equity	Average total equity less average non-controlling interests.
Average tangible ordinary equity	Average ordinary equity less average goodwill and other intangible assets (excluding capitalised software).	
Productivity and efficiency	Net tangible assets per ordinary share	Net tangible assets (total equity less goodwill and other intangible assets less minority interests) divided by the number ordinary shares on issue (statutory basis)
	Operating expenses	Operating expenses do not include impairment charges on loans.
	Expense to income ratio	Operating expenses divided by net operating income.
	Total banking expense to income ratio	Total banking operating expenses divided by total banking operating revenue. Total banking business includes Westpac RBB, St.George Banking Group, WIB, Private Bank (part of BTFG), New Zealand banking operations, Pacific Bank and the Group Businesses.
	Revenue per FTE	Total operating income divided by the average number of FTE for the period.
Full-time equivalent employees (FTE)	A calculation based on the number of hours worked by full and part-time employees as part of their normal duties. For example, the full-time equivalent of one FTE is 76 hours paid work per fortnight.	

Business Performance	Net interest spread	The difference between the average yield on all interest bearing assets and the average rate paid on interest bearing liabilities.
	Net interest margin	The net interest margin is calculated by dividing net interest income by average interest earning assets.
	Average interest earning assets	The average balance of assets held by the Group that generate interest income. Where possible, daily balances are used to calculate the average balance for the period.
	Average interest bearing liabilities	The average balance of liabilities owed by the Group that incur an interest expense. Where possible, daily balances are used to calculate the average balance for the period.
	Divisional margin	Net interest income (including capital benefit) for a division as a percentage of the average interest earning assets for that division.
Capital Adequacy	Total regulatory capital ratio	Total regulatory capital as defined by APRA divided by risk-weighted assets.
	Tier 1 capital ratio	Total Tier 1 capital as defined by APRA divided by risk-weighted assets.
	Common equity Tier 1 capital ratio	Total common equity capital as defined by APRA divided by risk weighted assets.
	Risk Weighted Assets (RWA)	Assets (both on and off-balance sheet) of the Group are assigned within a certain category, amounts included in these categories are multiplied by a risk weighting, and with the resulting weighted values added together to arrive at total risk weighted assets.
	Credit Risk Weighted Assets	Credit risk weighted assets represent risk-weighted assets (on-balance sheet and off-balance sheet) that relate to credit exposures and therefore exclude equity risk, market risk, operational risk, interest rate risk in the banking book and other assets. Note 18 in Section 5 provides a breakdown of risk weighted assets between credit risk weighted assets and other risk weighted assets.
Asset quality	Individually Assessed Provisions (IAPs)	Provisions raised for losses that have already been incurred on loans that are known to be impaired and are individually significant. The estimated losses on these impaired loans will be based on expected future cash flows discounted to their present value and as this discount unwinds, interest will be recognised in the income statement.
	Collectively Assessed Provisions (CAPs)	Loans not found to be individually impaired or significant will be collectively assessed in pools of similar assets with similar risk characteristics. The size of the provision is an estimate of the losses already incurred and will be estimated on the basis of historical loss experience for assets with credit characteristics similar to those in the collective pool. The historical loss experience will be adjusted based on current observable data.
	Impaired assets	<p>Includes exposures that have deteriorated to the point where full collection of interest and principal is in doubt, based on a conservative assessment of the customer's outlook, cashflow, and the net realisation of value of assets to which recourse is held:</p> <ul style="list-style-type: none"> ■ facilities 90 days or more past due, and not well secured – exposures where contractual payments are 90 or more days in arrears and the net realisable value of assets to which recourse is held may not be sufficient to allow full collection of interest and principal, including overdrafts or other revolving facilities that remain continuously outside approved limits by material amounts for 90 or more calendar days; ■ non-accrual assets – exposures with individually assessed impairment provisions held against them, excluding restructured loans; ■ restructured assets – exposures where the original contractual terms have been formally modified to provide for concessions of interest or principal for reasons related to the financial difficulties of the customer; ■ other assets acquired through security enforcement (includes other real estate owned) – includes the value of any other assets acquired as full or partial settlement of outstanding obligations through the enforcement of security arrangements; and ■ any other assets where the full collection of interest and principal is in doubt.

Asset quality (cont'd)	90 days past due – well secured	Includes facilities where: <ul style="list-style-type: none"> ■ contractual payments of interest and/or principal are 90 or more calendar days overdue, including overdrafts or other revolving facilities that remain continuously outside approved limits by material amounts for 90 or more calendar days; or an order has been sought for the customer's bankruptcy or similar legal action has been instituted which may avoid or delay repayment of its credit obligations; and ■ the estimated net realisable value of assets/security to which Westpac has recourse is sufficient to cover repayment of all principal and interest, and interest is being taken to profit on an accrual basis. These facilities, while in default, are not treated as impaired for accounting purposes.
	Watchlist and Substandard	Loan facilities where customers are experiencing operating weakness and financial difficulty but are not expected to incur loss of interest or principal.
	Stressed assets	Stressed assets are Watchlist and Substandard, 90 days past due well secured and impaired assets.
	Total Committed Exposure (TCE)	Total Committed Exposure (TCE) represents the sum of the committed portion of direct lending (including funds placement overall and deposits placed), contingent and pre-settlement risk plus the committed portion of secondary market trading and under-writing risk.
Other	Accounting reclassifications	Adjustments made for accounting treatments that have the effect of grossing up the income statement (primarily between income and tax expense/profits attributable to non-controlling interests). Key reclassifications include gross ups for policyholder tax recoveries and the impact of Treasury shares. These adjustments have no impact on Cash Earnings.
	Second Half 2012	Six months ended 30 September 2012.
	First Half 2012	Six months ended 31 March 2012.
	Full Year 2012	Twelve months ended 30 September 2012.
	Full Year 2011	Twelve months ended 30 September 2011.
	Prior comparative period	Refers to the twelve months ended 30 September 2011.
	Prior half	Refers to the six months ended 31 March 2012.
	Net Promoter Score (NPS) ¹	Refers to an external measure of customer advocacy which looks at how willing our customers are to recommend Westpac and St.George to their family and friends.
St.George	In this announcement references to 'St.George' refer to the division and its brands namely: 'St.George Bank', 'Bank of Melbourne', and 'BankSA', and RAMS unless it clearly means the St.George Bank brand.	

¹ Net Promoter Scoresm and NPSsm is a service mark of Bain and Company Inc., Satmetrix Systems Inc. and Mr Frederick Reichheld.
