

Our Mobile Planet: New Zealand

Understanding the Mobile Consumer

May 2012

Executive Summary

Smartphones have become an indispensable part of our daily lives. Smartphone penetration is currently at 44% of the population and these smartphone owners are becoming increasingly reliant on their devices. 46% access the Internet every day on their smartphone and most never leave home without it. **Implication:** Businesses that make mobile a central part of their strategy will benefit from the opportunity to engage the new constantly connected consumer.

Smartphones have transformed consumer behavior. Mobile search, video, app usage, and social networking are prolific. Smartphone users are multi-tasking their media with 80% using their phone while doing other things such as watching TV (54%). **Implication:** Extending advertising strategies to include mobile and developing integrated cross-media campaigns can more effectively reach today's consumers.

Smartphones help users navigate the world. Appearing on smartphones is critical for local businesses. 80% of smartphone users look for local information on their phone and 88% take action a result, such as making a purchase or contacting the business. **Implication:** Ensuring that clickable phone numbers appear in local results and leveraging location based services on mobile make it easy for consumers to connect directly with businesses.

Smartphones have changed the way consumers shop. Smartphones are critical shopping tools with 66% having researched a product or service on their device. Smartphone research influences buyer decisions and purchases across channels. 27% of smartphone users have made a purchase on their phone. **Implication:** Having a mobile optimized site is critical and a cross-channel strategy is needed to engage consumers across the multiple paths to purchase.

Smartphones help advertisers connect with consumers. Mobile ads are noticed by 86% of smartphone users. Smartphones are also a critical component of traditional advertising as 57% have performed a search on their smartphone after seeing an offline ad. **Implication**: Making mobile ads a part of an integrated marketing strategy can drive greater consumer engagement.

seeing an ad

Ad location

The First Page of Mobile Search Results is Key

64%

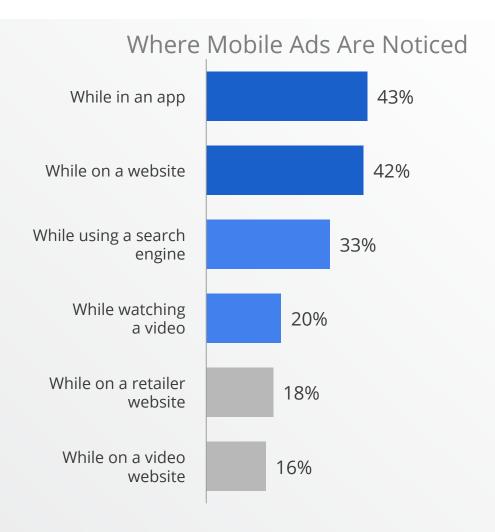

only look at the **first page of results** when
conducting a search on
their smartphone

Mobile Ads Make an Impression

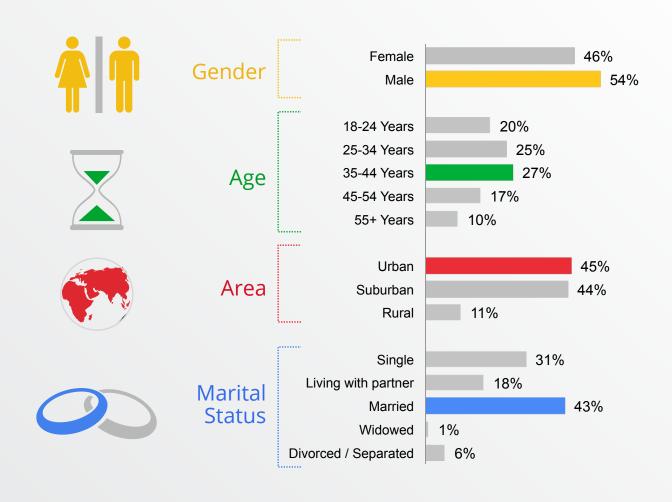

Research Methodology

- In partnership with Ipsos MediaCT, we interviewed a total of 1,000 New Zealand online adults (18-64 years of age) who identified themselves as using a smartphone to access the Internet
- The distribution is according to a national representative CATI Study
- A smartphone is defined as "a mobile phone offering advanced capabilities, often with PC-like functionality or ability to download apps"
- Respondents were asked a variety of questions around device usage, mobile search, video, social, web and commerce behavior and mobile advertising
- Interviews were conducted in Q1 2012
