**74%**  
(scoring 247 times from 335 shots)

Shooting from close in  
**68%**

Accuracy  
**93%**  
(scoring 529 times from 572 shots)

### Cathrine Latu

Latu is the most accurate shooter in the league in 2011, landing 421 of her 461 attempts at goal for a 93.1% strike rate. She has had four perfect 100% games this season, and six in the competition's history. The reason for Latu's phenomenal accuracy is because her feeders put her in strong shooting positions.

Latu has scored 417 goals in the short zone (94.1% accuracy) and only 12 goals from the long range (66.6% accuracy).

### Maria Tutaia

Tutaia's overall scoring average this season of 78.6% puts her well down the list in terms of accuracy, but this is understandable when you consider the bulk of her shots are from long range.

Tutaia eclipses all other shooters in the competition from the long bomb area, scoring 224 goals from 301 attempts at an accuracy of 74.4%, indicating Tutaia is dangerous anywhere in the shooting circle.

### Romelda Aiken

The Firebirds' Romelda Aiken has put up more shots than any other player in the league this year, averaging 34.9 goals per match. While her 86.1% success rate doesn't even put her in the top five in the league for shooting accuracy, Aiken gets a lot of second-chance goals through her strong rebounding ability. The Jamaican leads the competition for rebounds, with 61 - the next best in the league is Latu and Casey Williams, both with 40 and both having played one more game than Aiken.

### Natalie Medhurst

Goal attack Natalie Medhurst has a high workrate, converting 316 of her 378 shots at goal for a shooting percentage of 83.6%. Medhurst has taken 128 long range shots with 95 hitting their target (74.2%) compared to Aiken's 21 attempts. But Medhurst's real value is in her ability to get the ball to Aiken, the Firebirds key strike weapon. The goal attack leads her side in goal assists, with 133 for the season.
